## INTELLIGENT MOTORIST ALERT MESSAGING SYSTEM

## HOW IT WORKS

The IMAMS device is a robust Dynamic Digital LED Directive Messaging Sign with multiple safety features, securely mounted atop the rear doors or cab of semi-trucks and trailers.

Its purpose is to provide high-visibility, instantly recognizable alerts to oncoming traffic when the vehicle is disabled, or during maneuvers such as wide turns and lane changes. It can be mounted onto any vehicle that has a standard 7-pin wiring harness. It also doubles as a 3rd brake light when the brakes are applied. It has infrared front & rear-view recordable camera and backup beeper.

It has 4G communication and GPS for fleet tracking. It can be used by local authorities to broadcast local Amber alerts and severe weather warnings. It connects right into the 7-pin wiring junction box for easy installation. It provides older fleets with modern communications, tracking, and comes pre-programmed.

## FEATURES

- ✓ Emergency Alert Messaging
- ✓ High-mount 3rd Brake Light
- ✓ High-mount Turn Signals
- ✓ High Visibility Messages
- ✓ GPS Tracking
- ✓ 4G Communications
- ✓ Environmental Sensor
- ✓ Light Adjustment Sensor
- ✓ Amber Alert Capable
- ✓ Weather Alert Capable
- ✓ Front/Rear Infrared Cameras
- ✓ Backup Warning Beeper
- ✓ Revenue Generator, Quick ROI
- ✓ Fits all 7-pin Wire Harnesses
- ✓ Compact Design 2"x 6"x30"

## BENIFITS

- ✓ Safer Driving for all Motorist
- ✓ Communication with Fleet
- ✓ Broader Local Safety Alerts
- ✓ Pays for itself, Quick ROI
