

WETCHEM

SODIUM BISULPHATE (#48)

DESCRIPTION

Sodium Bisulphate acts as a pH adjustment agent. It is frequently used as a replacement of Sulphuric Acid which is highly dangerous to handle and transport.

APPLICATION PROCEDURE

1. Fill the chemical tank about half (1/2) full with portable water
2. Start the mixer
3. Turn on the water valve and slowly pour the 25 kg #48 into the chemical tank until the solution reaches the required level
4. Agitate the solution for 30 minutes or until the #48 is completely dissolved

CHEMICAL COMPOSITION

Sodium Bisulphate	100%
-------------------	------

TECHNICAL PROPERTIES

Form	Granular Solid
Colour	White
Solubility	Soluble in Water
pH	1.3 (1% of aq. Solution)

Powdered Sodium Bisulphate

Packaging: 25 kg/bag
