Lajoie Bros. Contracting Ltd.

Senior Driller

Location: Sault Ste. Marie, ON | **Salary:** TBD

About the Role

We are seeking a motivated, experienced and mechanically inclined Senior Driller to join our team. This hands-on role involves operating truck- and track-mounted drilling rigs, completing environmental and geotechnical drilling projects, collecting soil samples, and installing and maintaining monitoring wells in accordance with Ontario Regulation 903. You will work with geologists, engineers, consultants and landowners, complete well records and drill reports, maintain drilling equipment, and ensure all work is completed safely, efficiently and professionally.

Key Responsibilities

1. Drive and operate truck/track-mounted auger drilling rigs and other equipment to drill boreholes and sample soil for environmental and geotechnical assessments on residential, commercial, industrial, agricultural properties, and install monitoring well screens, casings and other well fixtures in accordance with Ontario Regulation 903.
2. Experience with CME75, D50 track and truck, Geoprobe 7822 and 420M, beaver, pionjar, rock coring, mud rotary, air rotary.
3. Provide other drilling services, such as repair or decommissioning of existing well structure, preparation of drilling mud, core hole drilling, clean-up and disposal of excess drilled materials. Write up well records and drill reports.
4. Enforce health and safety regulations.
5. Document on well records the encountered soil types and well's locations.
6. Clean, develop and maintain monitoring wells in preparation for sampling or testing.
7. Install piping systems and equipment and assist in performing pumping tests to assess well performance.
8. Perform routine mechanical maintenance work on drilling rigs and equipment.
9. Supervise and work with an assistant well driller, while conducting the job.
10. Interact with and follow directions from geologists, engineers, consultants, landholders and others involved in drilling projects.

Requirements

1. Geotechnical and Environmental Drilling: 3 years (required)
2. Valid AR or AZ-class license with clean abstract (required)
3. Strong mechanical aptitude and problem-solving skills
4. Good communication and computer skills
5. Ability to lift 50 lbs and work extended hours
6. Willingness to travel across Northern Ontario

What We Offer

1. Competitive Wages
2. Group benefits (health, dental, etc.)
3. RRSP matching & bonus program
4. Paid training and certifications

Apply
