2 ml e

BIMATOPROST OPHTHALMIC SOLUTION

DESCRIPTION:

Lashfactor is a solution filled in a specially designed 2ml Microbristle Dip-in Applicator System. The Microbristle technology used in Lashfactor allows for a precise, consistent and user-interdependent application of the solution onto the eyelashes.

ABOUT THE PRODUCT :

- A perfect alternative to false eye lashes.
- Easy to apply with the help of microbristle provided.
- Reinforces durability, shine & sheen providing a healthier appearance to Eyelashes.

USAGE:

Lashfactor improves fullness, length and color of the eyelashes, and gives an Enhanced Eyelash Prominence. Therefore Lashfactor can give longer, fuller and darker eyelashes in just 4 weeks of continuous regular application with a maximum effect seen before 16 weeks.

DOSAGE AND MODE OF ADMINISTRATION:

Adults: Apply the solution once every night to both the upper and lower eyelashes using the Microbristle Applicator system. For best results, apply to the eyelashes of both eyes in equal proportions.

Children: Not recommended.

COMPOSITION: Bimatoprost 0.03%w/v, Benzalkonium Chloride Solution BP 0.02%w/v (As Preservative), Aqueous Buffered Vehicle q.s.

INSTRUCTIONS FOR USE:

- Before application ensure that the face is clean , all makeup is removed and contact lenses are removed.
- By holding the tube vertically upright & twisting the cap open, gently pull out the attached applicator, ensuring that the solution has soaked the Microbristle applicator tip.
- Under ambient light conditions, position yourself comfortably in front of a mirror. Lean your dominant elbow on a firm surface. With a steady hand, place the soaked Microbristle applicator tip at the root of your eyelashes. Gently apply the applicator tip along the roots of the upper & lower eyelashes.
- Firmly replace the cap after use.
- Blot any excess solution beyond the application area with a clean absorbent cloth.
- Repeat the process on the eyelashes of the other eye.

CAUTIONS & WARNINGS:

- Hypersensitivity: Lashfactor should be avoided in people with

known hypersensitivity to Bimatoprost or to any other ingredients present in the composition.

- Do not use in Pregnancy or Breastfeeding.
- If a small amount of the Lashfactor solution gets in to the eye during application, it is not expected to cause any harm. However in case of an unusually large amount of solution getting into the eye, the advice of a Doctor should be sought.
- If you have any pre-existing eye conditions, seek your physician's advice before using this product.
- Contact lenses should be removed prior to application of Lashfactor and may be reinserted 15 minutes following administration.
- Using Lashfactor more than once a day will not give any better results.
- If you stop using Lashfactor your eyelashes are expected to return to their previous appearance over a period of several weeks to months.
- Use Lashfactor within one month after opening the container.
- If you experience any new eye problems after using this product, stop using it and immediately seek the advice of your Doctor.

SIDE EFFECTS:

- The most common side effect of Lashfactor would be a mild itching sensation in the eyes and/or eye redness.
- Lashfactor may cause darkening of the skin of the eyelids, which may be reversible.
- It is possible for hair growth to occur in other area of your skin, that the Lashfactor solution frequently comes in contact with.

STORAGE:

Always replace the cap when product is not in use. Store at temperatures not exceeding 25°C and avoid direct exposure to sunlight.

This product meets all the requirements of the COSMETIC REGULATION (EC) No 1223/2009.

KEEP OUT OF REACH OF CHILDREN.

FOR EXTERNAL USE ONLY

NOT FOR INJECTION
