

MEN'S LABS

**KNOW YOUR NUMBERS.
EMPOWER YOUR HEALTH.**

TEST. UNDERSTAND. TAKE CONTROL.

HORMONE PANEL

Evaluate testosterone, estrogen, DHEA, and cortisol to support energy, strength, and overall vitality.

TESTOSTERONE & FREE TESTOSTERONE

Optimize muscle mass, libido, mood, and performance.

COMPLETE BLOOD COUNT

Assess red and white blood cells, hemoglobin, and hematocrit to detect imbalances and support overall health.

IRON & FERRITIN

Ensure healthy iron levels and storage for energy production and endurance.

PROSTATE HEALTH

Monitor PSA and related markers to support prostate health and early detection.

VITAMIN D

Support bone strength, immune function, mood, and hormone health.

ENERGY & PERFORMANCE

Assess key nutrients and hormones that impact stamina, recovery, and physical performance.

STRESS & CORTISOL

Evaluate cortisol levels to understand stress impact and adrenal function.

VITAMIN B12 & FOLATE

Support energy production, brain function, and red blood cell health.

INFLAMMATION MARKERS

Identify underlying inflammation that can affect mobility, heart health, and more.

METABOLIC HEALTH

Check glucose, insulin, lipids, and other markers to support metabolism.

YOUR HEALTH. YOUR DATA.
YOUR POWER.
