Manage all your business listings

Create new listings, managing existing and correct inaccurate information on all of your listings with listing sync. One place to manage your business information across Google My Business and other places your local customers are searching is a powerful tool.

Valuable customer information from Google Insights

Understand how your business is performing on Google My Business. Insights from your business listing give you customer activity information that could be valuable in connecting with them or finding more customers like them.

Build your search engine optimization (SEO)

Search engines value accurate information and they reward accuracy with more visibility. By managing your business information online on a regular basis, you assure that not only can customers find you, but that your online optimization is strong.

Local search optimized mobile listing

Most of your customers are searching from their mobile phones to find local businesses. Create a mobile optimized listing within Listing Builder that connects local customers easily with your contact information, directions, and drives traffic to your website.

4 out of 5

consumers use search engines to find local information. Make sure your information is accurate!

Build your listings. Manage inaccurate information that could hurt your business. Gain Google Insights about your customers.
