

BEGINNER GROUP MUSIC LESSONS FOR CHILDREN

Mini Musicians ~ Explore, Create, Play, Learn, Grow

At Musical Minds Conservatory, we teach young students in our Mini Musicians and Music for Little Mozart's Classes. Starting music lessons at a young age is extremely beneficial in many ways!

Preschool Music Lessons For Patterns

Learning music is greatly based on seeing and learning patterns. By studying music, children learn to recognize patterns visually and aurally, helping with understanding math and other school subjects. Music and mathematics are very closely related.

Preschool Music Lessons For Pathways

Studies have shown that learning a musical instrument can actually create new pathways between the left and right side of the brain that wouldn't exist otherwise. Music helps create synapses in the brain for quicker learning through a child's entire lifetime.

Preschool Music Lessons For Movement

Music lessons help students develop better hand-eye coordination and finger dexterity. Beginning young makes a big difference in students' rhythm skills throughout their life.

Preschool Music Lessons For Persistence

Studying music can foster **persistence**. Have you heard of Carol Dweck's studies on [growth mindset](#)?

We observe first-hand how students who initially had a fixed mindset approach to learning (they thought they were not talented/good enough and would give up easily) gradually develop the belief and understanding that practice pays off. This "stick-to-it-ive-ness" is a huge boost in every area of their life!

Preschool Music Lessons For FUN!

Learning music is FUN. Playing music is FUN. And starting at a young age is the best way to ensure your child will have a love and understanding of music for life.

When they learn at Musical Minds, they'll be having **fun every step of the way**. We teach students through **creativity and play** with game based learning and ensemble activities. This is a **no-pressure, no-practice curriculum** where we explore music through pattern based improvisation, songs and movement, and games. Students develop reading skills, learn about rhythm notation, and folk songs.

*** No instrument required at home for your child to begin!**

Structure Of Classes

- Weekly 45-minute classes.
- Small groups (maximum 8 students) ensure each student will receive individual feedback and instruction at each class.
- Low monthly tuition of \$90/ month (or only \$385/ semester with discount)
