FIRE PROTECTION SOLUTIONS FOR THE OIL & GAS INDUSTRY

TOTAL INDUSTRIAL SOLUTIONS

FIRE PROTECTION SOLUTIONS FOR THE OIL & GAS INDUSTRY

DESIGN

In the design process of fire-protection systems our goals are to save lives, save properties, and preserve the business continuity.

INSTALLATION

When it comes to installing life safety systems, our goal is to conscientiously do our work without disrupting yours.

INSPECTION TESTING & MAINTENANCE

Our goal is to identify potential problems with your systems and provide an appropriate, affordable solution.

ABOUT US

Total Industrial Solutions at Total Fire Protection is an Oil & Gas industry-focused company specializing in industrial fire protection and construction. Our expert technicians understand your day-to-day operations and the importance of a safe and efficient work environment.

We work directly with you to understand your needs and then to devise a thorough, “total solution” for your fire protection and construction needs.

TRUSTED PARTNER

With nearly 30 years of experience, you can trust our team of professionals to successfully complete your project with integrity, knowledge and expertise. We work directly with you to ensure we meet all fire protection needs for your fuel loading/offloading terminals, bulk storage tank facilities, power and chemical plants, refineries, and offshore platforms.

CONTACT US

Our strategically located branches allow for us to service your industrial fire protection needs across the nation. Contact us today for a free onsite consultation for your service, maintenance, inspections, system design, and installation needs.
