Our Vision and Business Plan

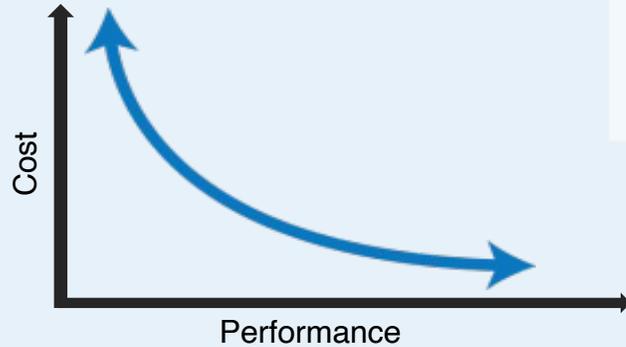

Hyperconverged/software-defined technology is one of those big waves that happens every few decades in the IT industry

When these waves occur, several of the incumbent IT companies disappear and several new firms emerge as the incumbents for the next few decades

Pivot3 will be one of those firms which emerge and grow to be a dominant player for the next few decades – our deep storage knowledge and technology capabilities will power our success

Why Hyper-Convergence?

x86 Cost Curve

>300Mil x86

Who Relies on Pivot3?

4 of the **top 10** world's Most Admired companies
31 of the Biggest Public Companies in the world
3 of the **top 10** Best Global Brands
3 of the **top 5** world's biggest Energy companies

5 of the **Largest** US Federal Agencies
3 of the **top 5** global Telecoms companies
4 of the **top 5** global Aerospace & Defense companies

14 of the Most Valued Brands in the world
The **2** Largest Tech companies in the world
The **3** Largest Global Electronics & Office Equipment companies
2 of the **5** Branches of the US Armed Forces

2 of the **top 3** global Logistics companies
2 of the **top 5** Gaming companies in the world
6 of the world's biggest Pharmaceutical companies

Advantech is one of the worlds leading PC machine manufactures and has an extensive distribution channel through out ASIA, EMEA and USA. Advantech is seeking to expand into the data center space, both in the US and Asia markets.

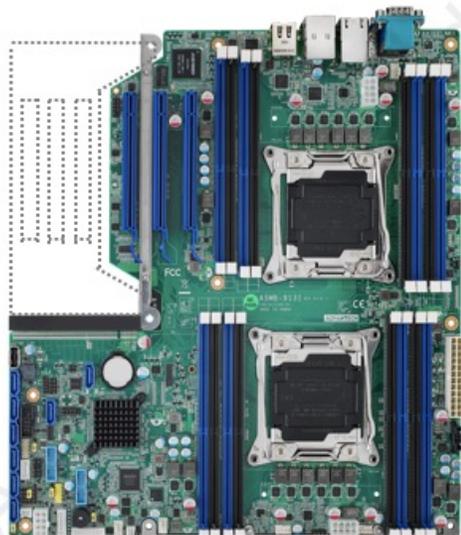

Pivot 3 is seeking a OEM relationship with Advantech in order to increase more X86/storage solutions for Vstac software and leverage a mature distribution channel in ASIA, Africa and USA.

For Pivot 3 , Advantech has an all flash, hybrid and data platforms at a lower price point. Pivot 3 can leverage these appliances in US market. For Asia, Advantech will be able to OEM our software to create solutions for their Retail, IOT, and healthcare architectures.

For Advantech, this partnership will help merge the companies X86, storage, and video server groups into a new hyper-convergence product team.

Huntington- Business Intelligence – Hyper-convergence Infrastructure

Huntington Hybrid NODE - QTY 3 - Deployed Today
640 GB RAM - 2 (8) Core Dual CPU - 48 TB Per Node (120 TB usable)

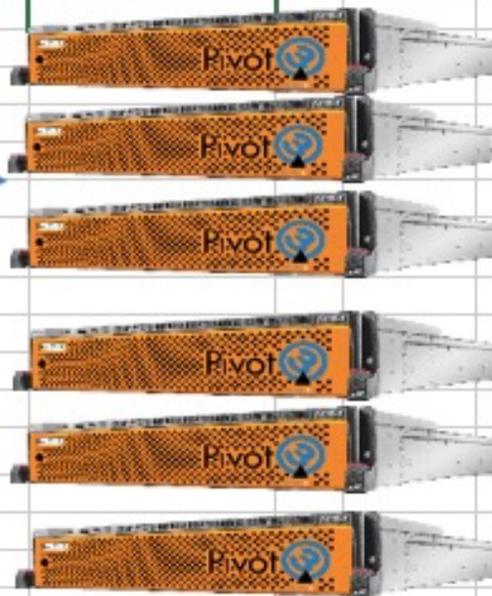

Staging - Development Testing for Business Intelligence

VMOTION DataFlow

Huntington All FLASH - QTY 6 - POC Stage
640 GB RAM - 2 (14) Core Dual CPU - 12.8 TB Per Node (67 TB usable storage)

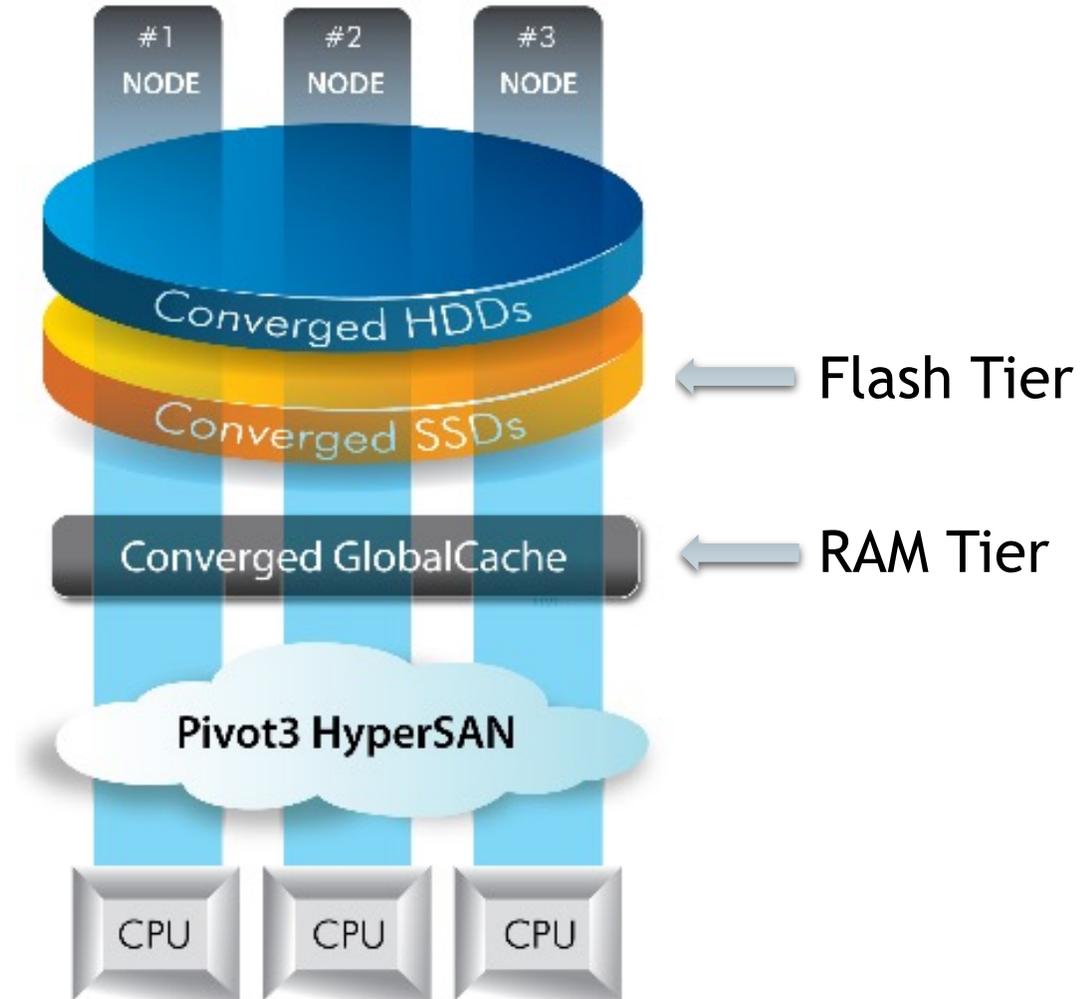

Production Business Intelligence Platform

Globally Hyperconverged Infrastructure

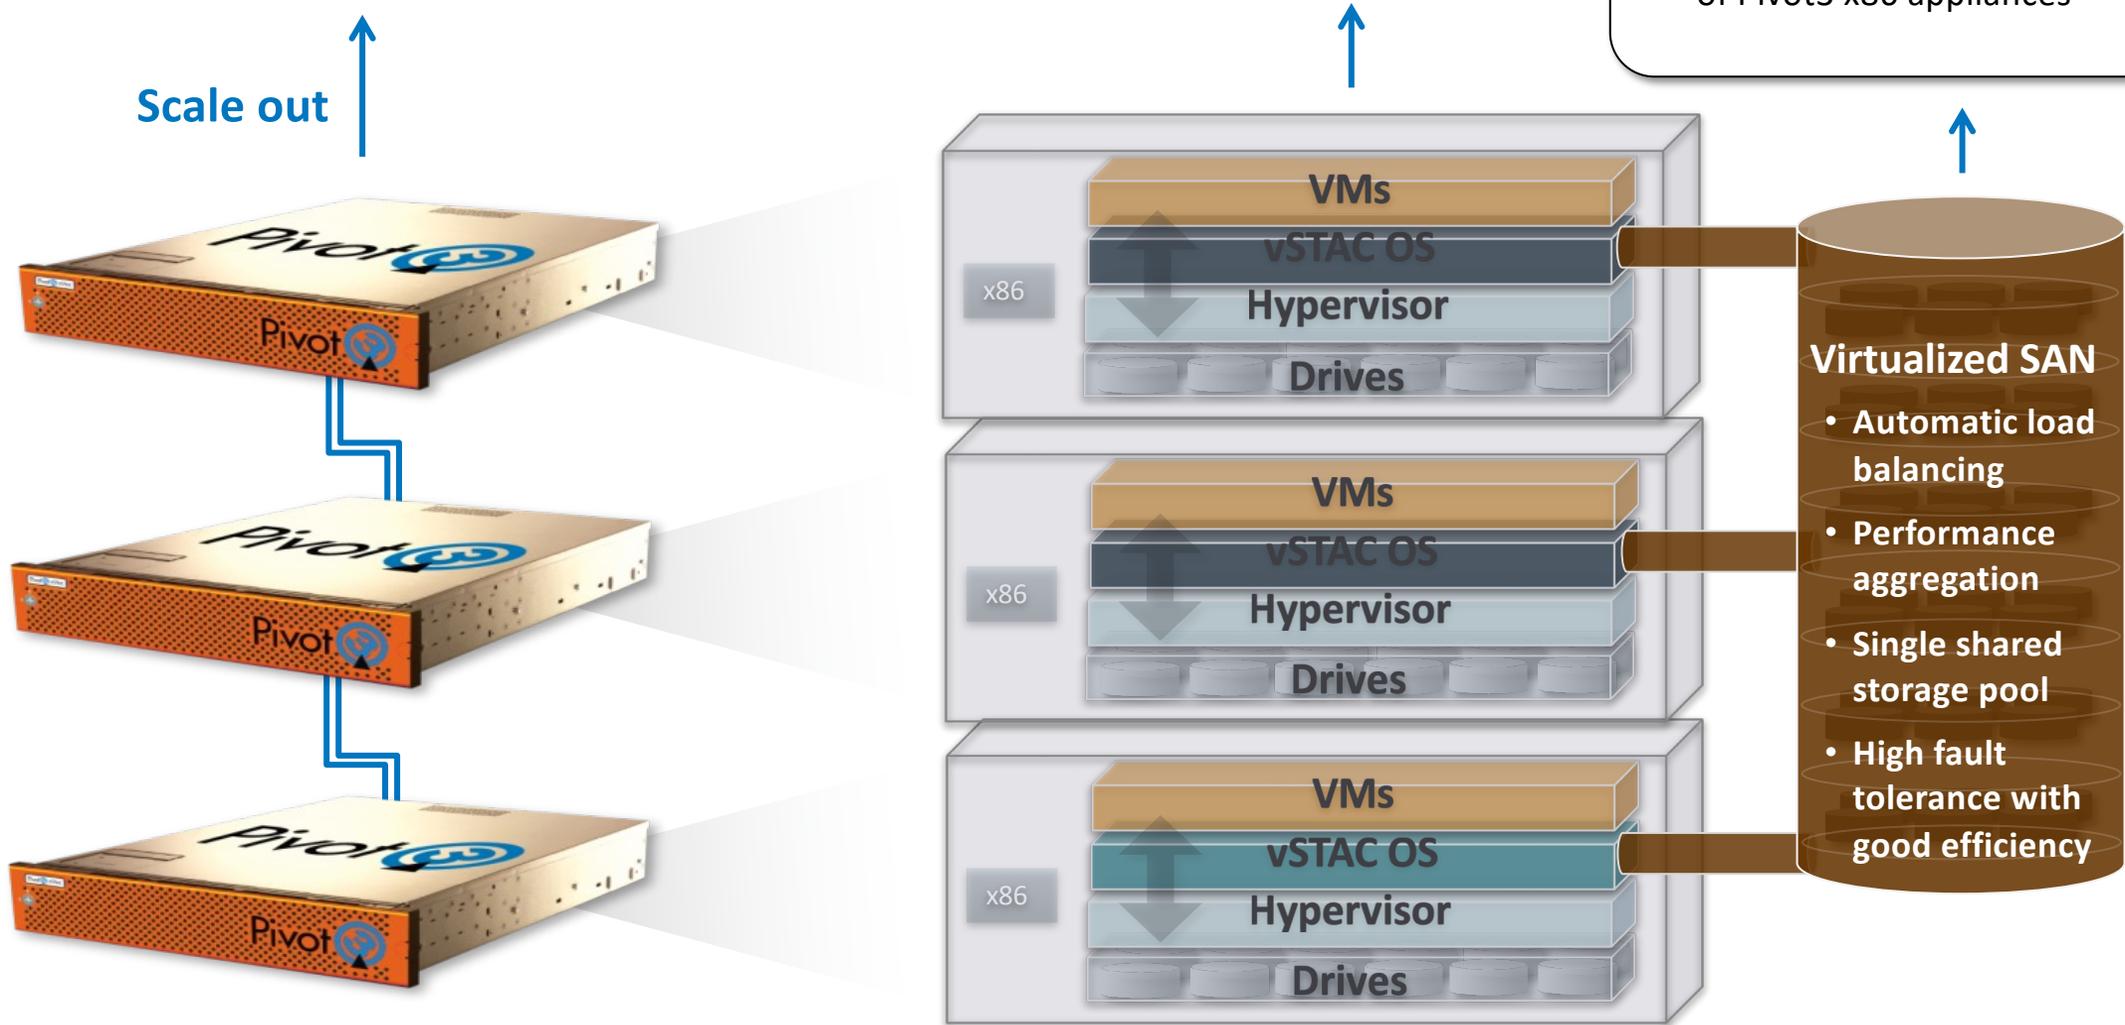

Pivot3 implements patented *Scalar Erasure Coding* to:

- Unify hardware resources: RAM cache, SSD and HDD across nodes
- Wide Stripes data across all unified hardware
- Data written once and only moved when new nodes are added
- Aggregate IOPs and Bandwidth as nodes are added

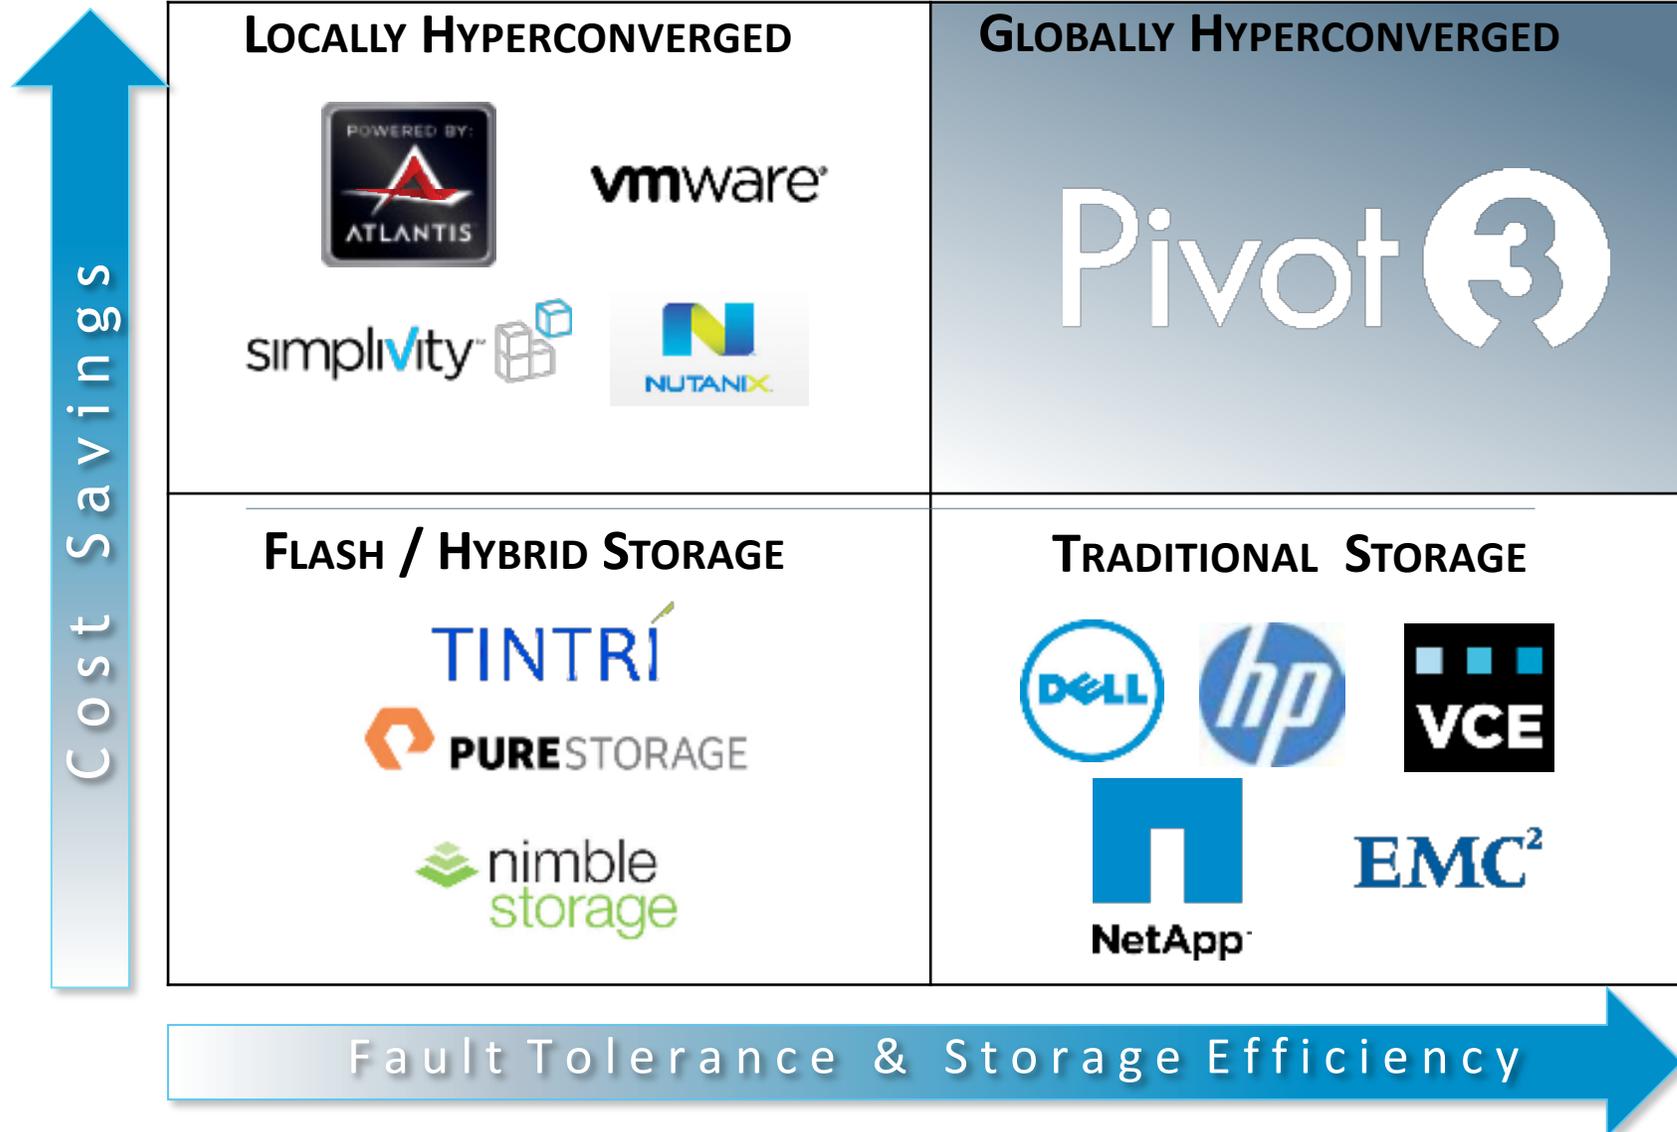

Pivot3 vSTAC Dynamic Scale Out

vSTAC OS seamlessly creates a virtual SAN with distributed RAID protection across a local network of Pivot3 x86 appliances

Pivot3 Differentiation

Pivot3 Surveillance Series

The only HCI platform built to solve the unique challenges of video surveillance

Server + Storage Consolidation

Video Recording

Mobile Access

Workstation Consolidation

Purpose-Built Performance

Prevents video loss and preserves image quality

Extreme Resiliency

99.9999% availability, no single points of failure

Reduced Costs

Eliminate proprietary hardware and complexity

Effective Mobility

Full-function clients on any device

Scalability

Grow storage and compute linearly and w/out disruption

Surveillance Expertise

Storage Efficiency Matters

Virtual Global Sparing

Virtual Global Sparing

Benefits:

- Storage Efficiency: No dedicated drives for sparing
- Performance: Parallel rebuilds from all drives in the system
- Easy Management: Never worry about global hotspare management

Traditional Sparing

Predictive Drive Sparing

Pro-active Drive Replacement

- Drives often times do not fail completely. Performance degrades over time, slowing down the entire system.
- Pivot3 technology allows for predictive drive sparing...

Step 1

Detect the response time degradation of a specific physical drive

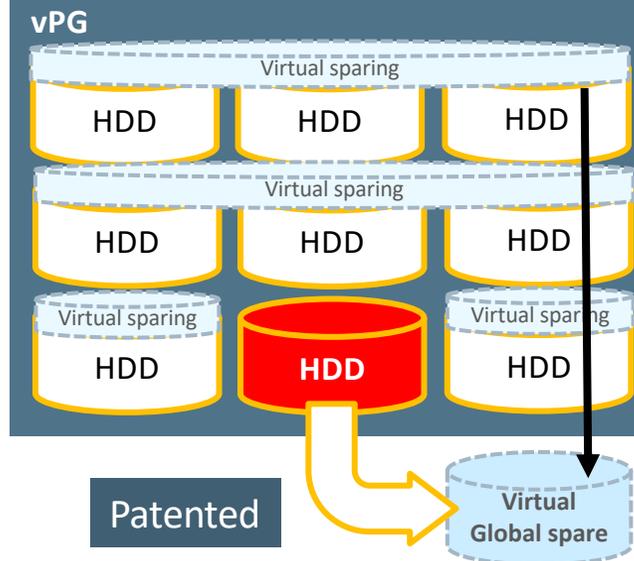

Node #1

Drive Response time		
Drive 1	Drive 2	Drive n
→	↘	→

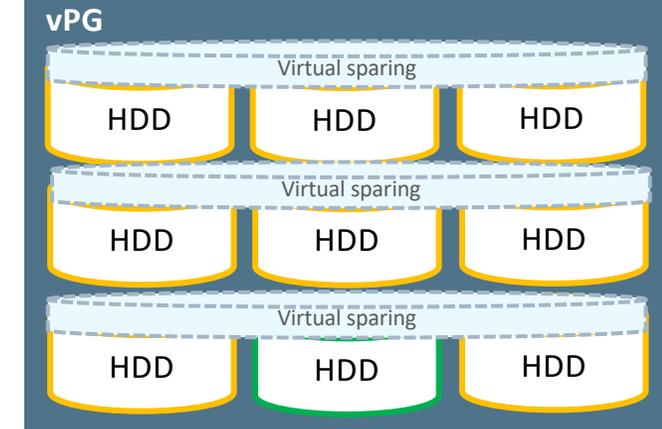

Step 2

Rebuild the failing drive within the Global Spare. Pro-actively fail the drive and remove it.

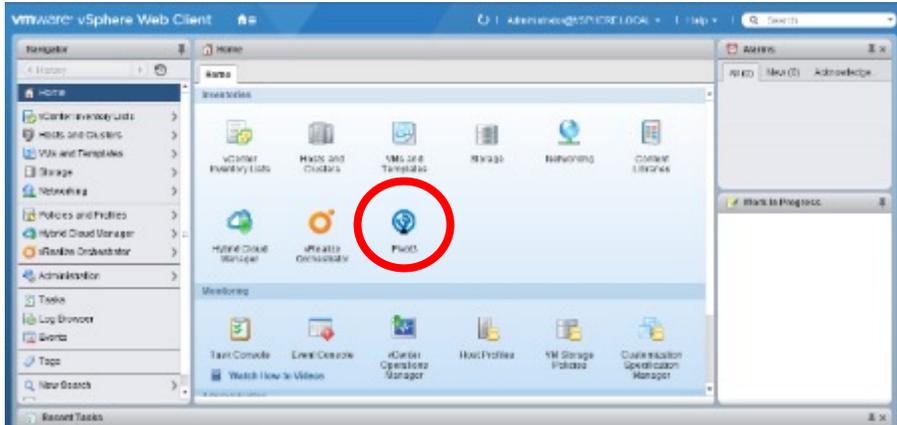

Step 3

Replace the physical drive without interruption of regular operations.

Proactive Diagnostics Setup

Configure Pivot3 Proactive Diagnostics

Enable Proactive Diagnostics | Contact Information | Status Reporting | Monitored Discovery Paths

The Pivot3 Proactive Diagnostics (PPD) service is currently disabled. When the PPD service is enabled, the status of your vSTAC domain will be uploaded to Pivot3 support automatically once every 24 hours. Pivot3 will notify the registered contact when there are conditions that may lead to potential data loss or reduced performance. The PPD service must be enabled on a computer that will have continuous access to both the vSTAC Domain and the Internet.

A valid proactive Diagnostic ID is required to receive notifications from Pivot3. A free PPD ID will be provided to enable notifications on all vSTAC Nodes that have Pivot3 Premium Support (or better). Complete the Contact Information tab and check the Enable box on this tab to receive a PPD ID. An email with the PPD ID will be sent to the specified contact once eligibility has been verified. Pivot3 Support will not send out notifications until the PPD ID has been registered.

Always-On Mobil Workstations

Nottinghamshire
Health Informatics Service
Delivering Excellence in ICT

Partner
Success

Challenges

Slow logging in and out of applications multiple times a day

Complex maze of disparate local and national clinical information systems

IT operations is strained and budgets are decreasing

Regulatory and patient data privacy issues are growing

Restrictions created by PCs often located in the wrong places

Solution

Pivot3 Hybrid Nodes (30+) with Teradici cards

Initial deployment of 1000 Horizon View desktops in two teaching hospitals in 4 months

Added additional 1000 desktops 3 months later

3000 more planned 2015

Benefits

Clinical:

- ✓ Fast logon, secure and seamless access
- ✓ Full session persistency and genuine 'follow me' mobile healthcare workspace
- ✓ Anywhere anytime secure role based access for clinicians, administrators and managers
- ✓ Secure access to NHS applications from anywhere, at any time and on any device
- ✓ Increased productivity and patient facing time

Financial:

- ✓ Reduced Total Cost of Ownership (TTO) and extended desktop hardware lifecycles
- ✓ Demonstrable ROI, and year on year cost savings

Operational:

- ✓ Increased availability
- ✓ Mobility without compromising performance
- ✓ Centralized IT management and control
- ✓ Simplified desktop management

High-End Remote & Secure Graphics Workstations

Large Defense Contractor

Advanced remote workstations
& storage for E/EM engineering

Pivot 3

vmware

Challenges

Solution

Benefits

Data security

High cost of graphics workstations

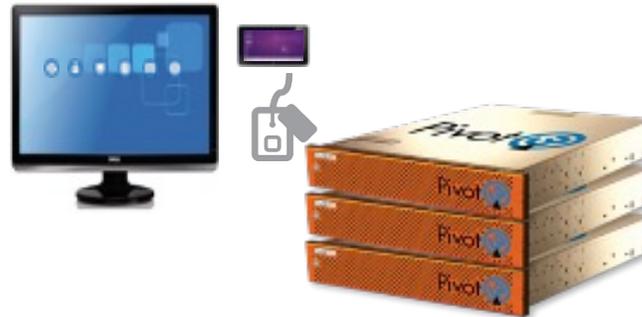

High cost of travel for remote workers with security restrictions

Need support for a wide Range of user types and up to 10000 users

Needed scale out infrastructure for offering desktops as a Cloud service

Pivot3 global HCI Nodes with K2 Grid cards
& PCoIP
Total of 9 Hybrid vPGs

iSCSI Virtual SAN for all users and VDI
platform for 70+ CAD users

600 Clear Cube CAD users
3000 Reviewer Workstations
6000 Office workers
XenDesktop 7.6 with vSphere 6.0

Financial:

- ✓ Multi-Million annualized savings due to travel and hardware reduction
- ✓ Lower cost per virtualized workstation than cost of a conventional CAD workstation
- ✓ Able to store massive designs and engineering renderings cost effectively with Pivot3's high storage efficiency

Operational:

- ✓ All CAD users access the virtual HyperSAN for high performance from aggregated IOPS
- ✓ Sensitive data is protected by Scalar Erasure Coding-based fault tolerance (systems can withstand simultaneous failure of one Node + 2 HDDs);
- ✓ Enables heavy graphic remote workstation work, with high data security of stateless clients;
- ✓ Broad range of PCs can serve as clients and become a workstation

Disaster Recovery powered by Global HCI

Twin Rivers

Enterprise Disaster Recovery (DR)
storage, 1PB array

Challenges

Protection of sensitive and regulated data

High cost of backup storage

High requirements for sustained IOPS

Solution

Pivot3 Global HCI Nodes for Backup,
Disaster Recovery;

Used as standalone Software Defined
Storage for Enterprise.

Benefits

Financial:

- ✓ 30-40% reduction in cost for TB storage via high storage efficiency
- ✓ Combined BU + DR: No need for separate recovery servers lowered DR costs

Operational:

- ✓ Sensitive data is protected by Scalar Erasure Coding-based fault tolerance (one Node + 2 HDDs)
- ✓ Replaced traditional storage solution from legacy SAN vendor – no need for like for like hardware
- ✓ Simplified DR site by eliminating Servers, storage, networking and management at DR
- ✓ Simplified recoveries by using Pivot3's HCI system to backup and restore to

Mobile Healthcare Workspace

Challenges

Improve business and financial results

Reduce boot-up time

Security of patient information

Increase productivity of health care providers on the move

Reduce cost of storing massive medical imagery datasets

Solution

Pivot3 Virtualized Mobile Medical Workspace based on HCI Nodes that scale and secure medical data records and access

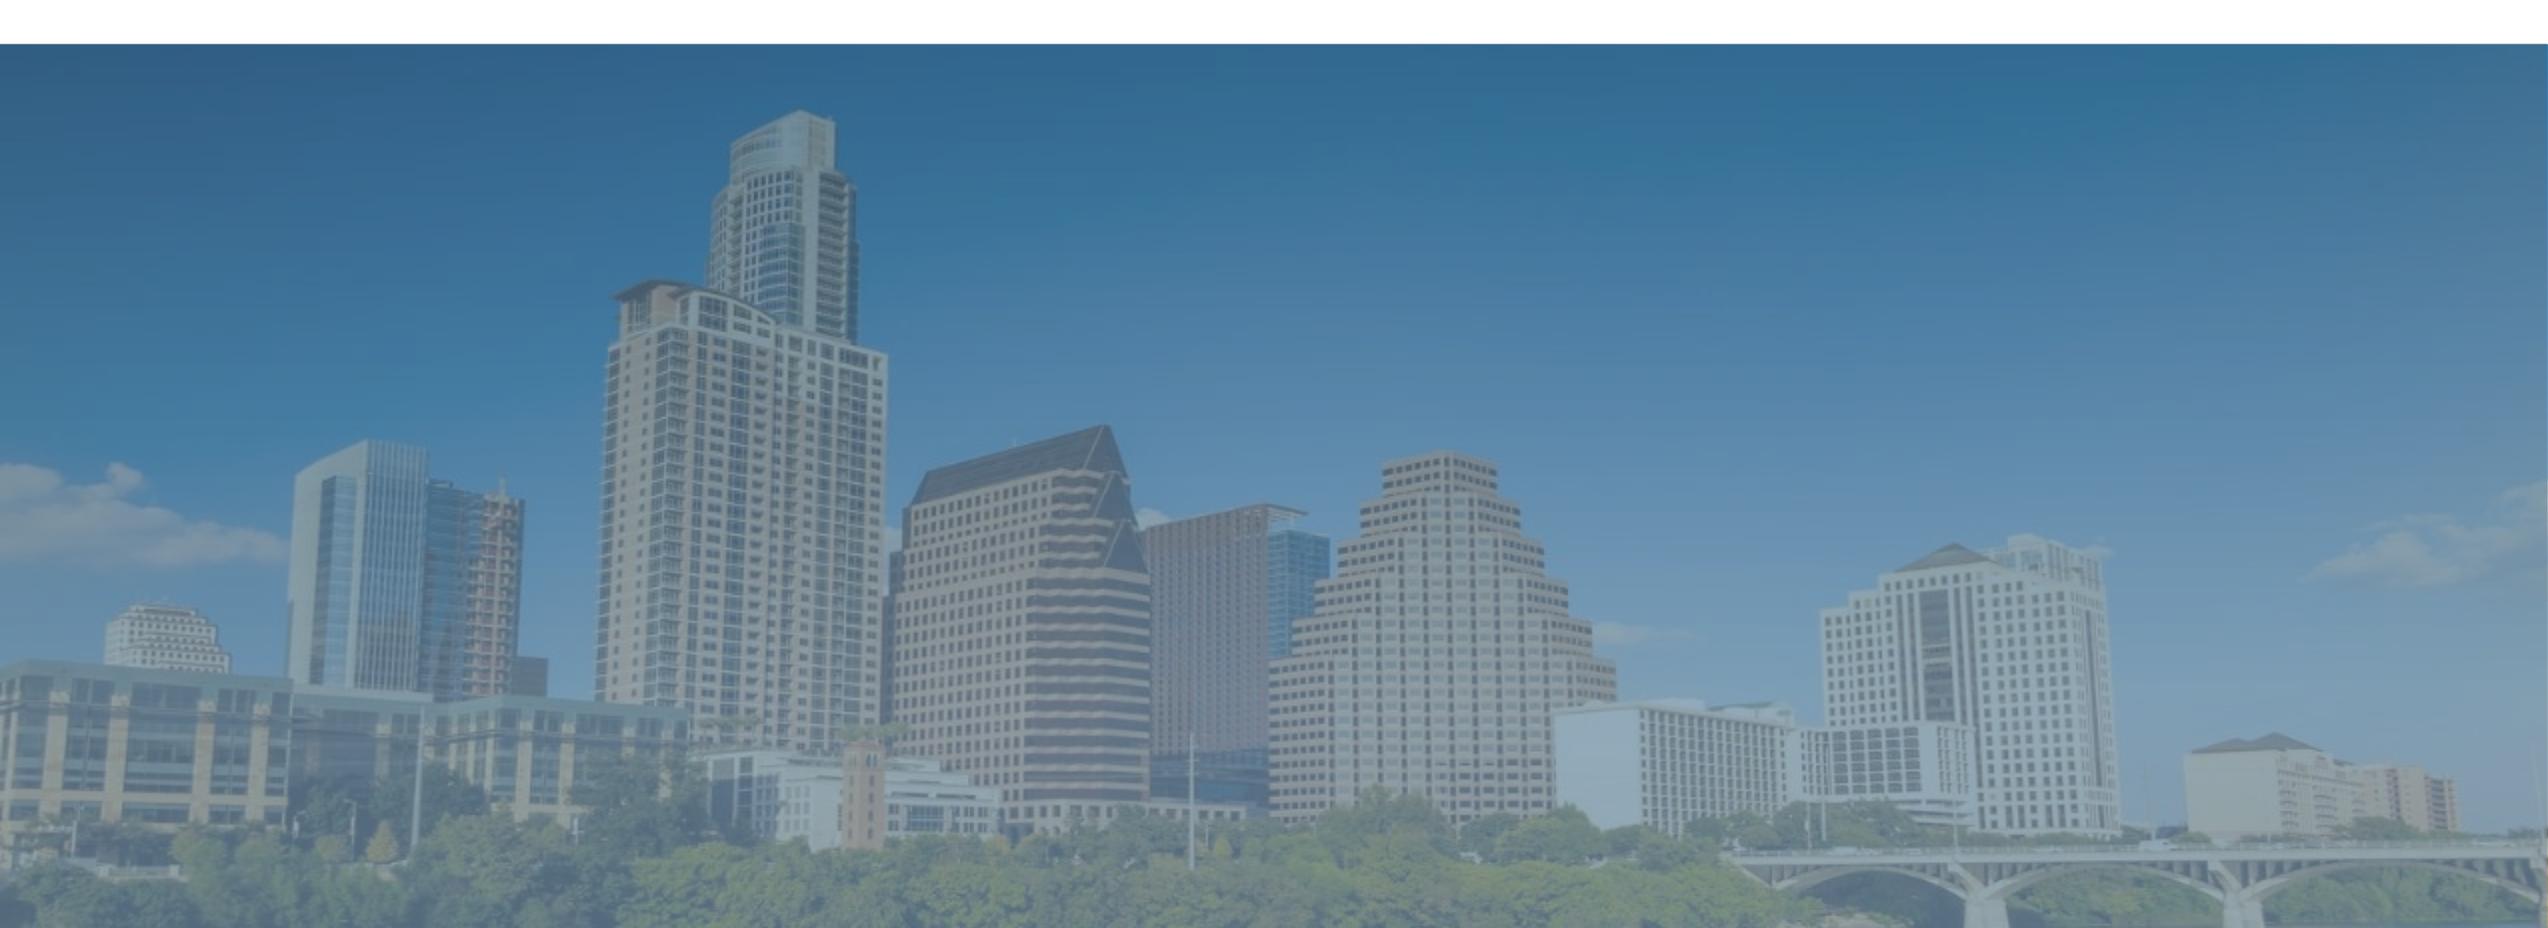

Benefits

Financial:

- ✓ Pay-as-you-grow Node model enables easy scaling of the number of mobile stations supported.
- ✓ 30-40% reduction in cost /TB of storage and decrease of 25% per connected user
- ✓ TCO reduction by 15% per server by increasing user density per server

Operational:

- ✓ 80% reduction in logon time, increasing staff productivity (5 minutes to 6 seconds)
- ✓ Mobility: Securely extend systems access to clinicians and doctors to collaborate from home or other facilities while data never leaves the hospital infrastructure;
- ✓ Scalar Erasure coding-based fault tolerance ensure protection of medical data. Can withstand simultaneous failure of one Node + 2 HDDs
