

Tech Rider For Standup Comedy Show

In live shows, a rider is a set of requests that a performer will set as criteria for a successful performance.

For a successful comedy show, please make sure the following arrangements are made. They are simple measures to guarantee a good show.

TECH

- A good quality corded mic (Preferred) with mic stand (Optional) & one back up mic at the console. The speakers should be placed properly across the room so that sound is audible.
- Spotlight / lighting on face of performer. Audience/house light should be OFF/DIMMED during the show

VENUE/LOCATION

- Venue/location for performance must be indoors and audience must be seated. Seating may be in cluster or theatre style as close as 2 feet from stage area if possible.
- Designated stage area must be setup.
- **No Service** of Bar or kitchen to seated guests during the entire duration of the show, as this distracts the audience and the artists alike. Please make sufficient announcements about the same before the show starts.
- Please inform your guests of the comedy show in advance, surprise comedy shows don't go well at all.

PAYMENT

- 100% payment must be made before the artist is on stage.
- Payment must be made either in cheque/NEFT/IMPS transfer.

OTHERS

- Do not record any bits of the standup segment.
- For out of Bengaluru shows - Air tickets (Flight post 10AM if possible), pickup/drop, lodging to be provided by the client/agency
