

Phragmites Update

Hello Stanley,

Please share the attached notice and risk benefit form with Woodfield residents ASAP in anticipation for treatments. The legal notice was also published in the 8/23/21 legal notice section of Macomb Daily, meeting legal notice requirements. Day-of physical notices will also be posted on the site to inform residents to not enter treated areas until the spray has dried.

Treatments will likely take place on September 2 in areas highlighted in red on the attached map but could be performed through September 10, weather permitting. Once an exact date is finalized, I will be sure to inform you.

Best, McKenzi
