**Subject:** [EXTERNAL] Update Stay-at-home order - Michigan

Good morning,

I wanted to provide an update following recent communication. At this time, we have very limited production scheduled based only on the critical infrastructure requirements set forth by our customers between now and April 14th. Metal Flow is also limiting access to our facility to further support the "Stay home, stay safe" Executive Order put in place by Governor Whitmer. Amanda Riddle or myself will reach out if/ when we require services from your company. We continue to monitor closely and will advise as these requirements may change. Our support staff is still fully assessible and working remotely. Please feel free to reach out with any specific questions or concerns.

Thank you,

**Angela Westfield**

Director of Procurement and Strategic Sourcing
