horizon.uk.com

HORIZON AT A GLANCE

One Horizon capability, built around the client.

Horizon is a specialist security, training and capability provider supporting private, corporate and governmental clients in the UK and internationally.

2012 / FOUNDED

Established experience with a practical, accountable operating culture.

UK + GLOBAL

Coordinated support across the United Kingdom and international destinations.

BESPOKE DELIVERY

Protective security, medical, training and specialist manpower shaped around the requirement.

ONE ACCOUNTABLE CAPABILITY

Services that scale with the requirement.

Each capability can stand alone or be combined into a wider, risk-led solution. Horizon coordinates the people, planning and support around one clear client requirement.

PROTECT

Close protection
Residential and estate security
Security guarding and site protection
Media and production security
Aviation and maritime support

ADVISE & PREPARE

Risk and security consultancy
Travel risk and readiness
Protective intelligence and privacy
Crisis and contingency planning
Security and medical training

MOBILISE & SUSTAIN

Medical provision
Protective drivers and chauffeurs
Specialist staffing
International coordination
Project and operational support

One brief. One accountable lead. Clear reporting, controlled information and support that fits the client rather than becoming the client's operation.

A CREDIBLE ALTERNATIVE

Already have arrangements? Add resilience, not disruption.

An incumbent relationship does not prevent independent assurance, additional capacity or specialist support. Horizon can begin with one controlled requirement and work alongside what is already in place.

01 Independent review

Benchmark a plan, provider, site, itinerary or operating model.

02 Second source

Pre-approved capacity when normal arrangements are constrained.

03 Surge cover

Additional people or capability for a high-profile or short-notice requirement.

04 Specialist task

Bring Horizon in for protective, medical, intelligence or sensitive work.

05 Regional support

Fill a destination or operational gap without changing the wider model.

06 Controlled transition

Move through an accountable handover where service needs to improve.

Start with one requirement. Keep the rest in place.

CLOSE PROTECTION, APPEARANCES AND MEDIA

Protection that fits the person, not the stereotype.

Good close protection is built on judgement, preparation and the ability to manage exposure without changing the client’s personality, routine or confidence.

PUBLIC

Premieres, launches, press lines, public engagements and high-exposure movement.

PROFESSIONAL

Studios, offices, meetings, hospitality, events and business travel.

PRIVATE

Family time, personal engagements, residences and low-visibility movement.

RESIDENTIAL AND ESTATE SECURITY

Reassuring, not restrictive.

Residential protection should strengthen confidence at home without making the home feel like a workplace or a fortress. Controls are built around how the principal, family and household actually live.

PROPERTY

Access, perimeter, technology, visitors and service providers.

ROUTINE

Family movement, household staff, deliveries and privacy.

RESPONSE

Clear escalation, communication and contingency arrangements.

PROTECTIVE DRIVERS AND CHAUFFEURS

The journey should feel effortless.

Professional, discreet transport combines client care with route awareness, vehicle discipline and protective planning - from one transfer to an enduring movement programme.

ROUTE

Alternatives, timings, risk points and arrival-position assessment.

VEHICLE

Checks, positioning, communications and coordinated pick-up procedures.

TEAM

Integration with CPOs, PAs, hosts, venues and local support.

TRAVEL RISK MANAGEMENT

Duty of care continues through every handover.

A traveller can move from airport to vehicle, hotel, office, site and public engagement in one journey. Exposure changes at every stage; accountable support must continue throughout.

DESTINATION

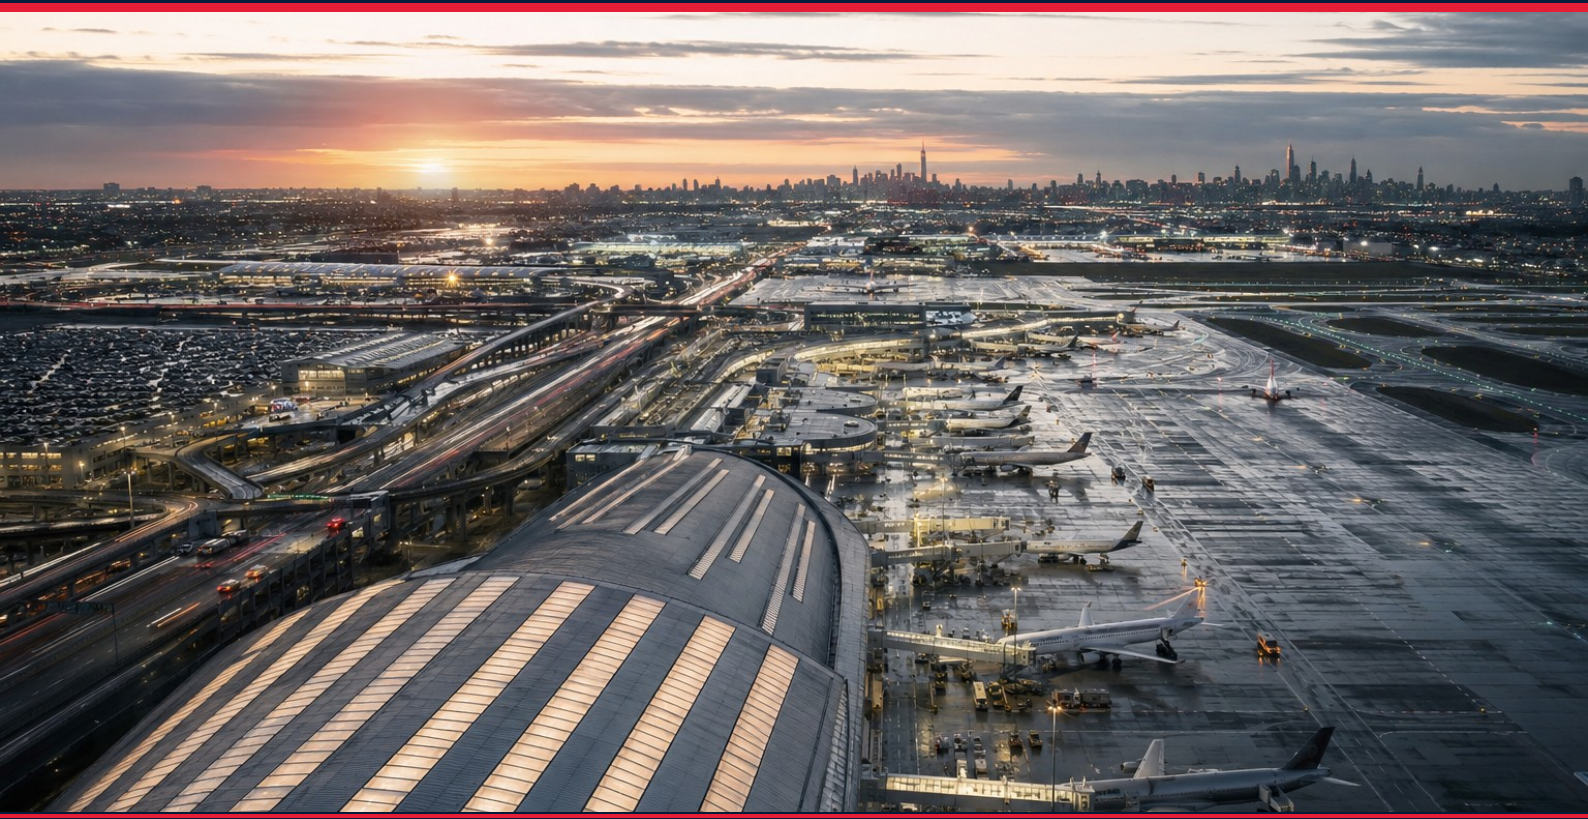

Security, health, infrastructure and the operating environment.

TRAVELLER

Role, profile, experience, health and specific exposure.

ITINERARY

Flights, routes, hotels, venues, alternatives and escalation.

LOCAL SUPPORT AND JOURNEY MANAGEMENT

Local delivery. One consistent standard.

Horizon coordinates suitable local drivers, security, medical and specialist support against one agreed brief, then monitors delivery as the itinerary and operating environment change.

PLAN

Routes, accommodation, contacts, alternatives and decision points.

COORDINATE

Local partners, vehicles, hotels, hosts and communications.

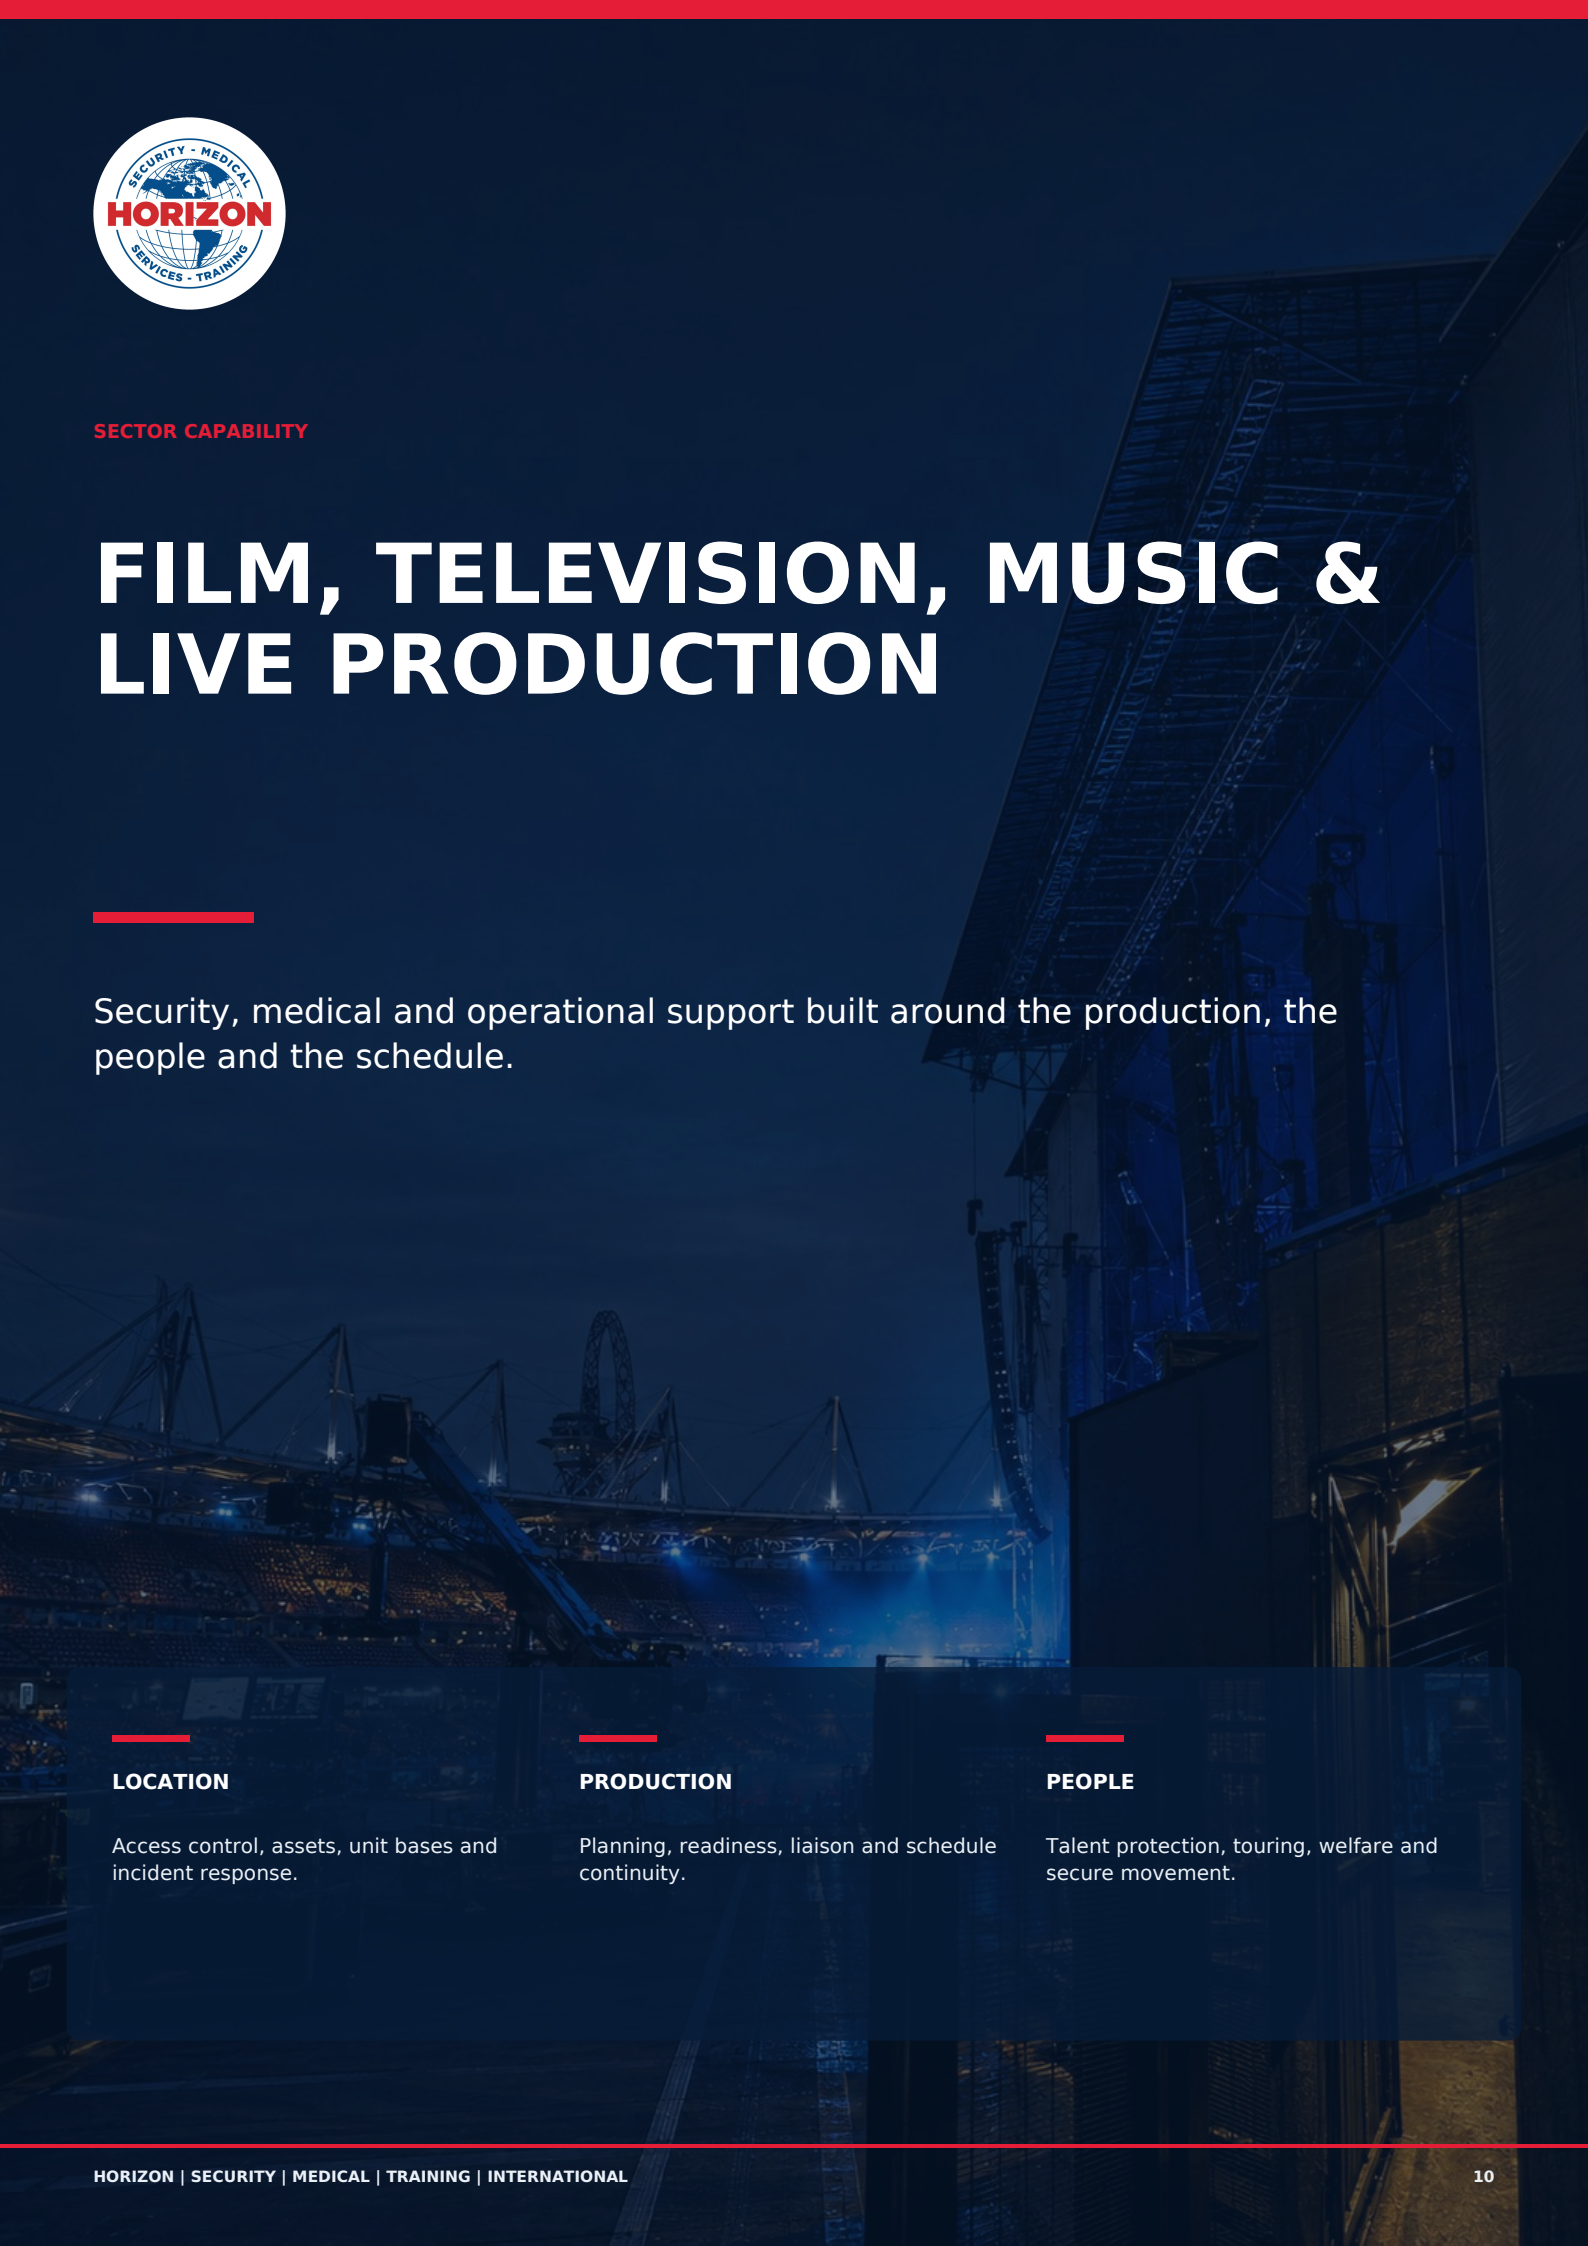

MONITOR

Welfare, disruption, intelligence and escalation as plans evolve.

SECTOR CAPABILITY

FILM, TELEVISION, MUSIC & LIVE PRODUCTION

Security, medical and operational support built around the production, the people and the schedule.

LOCATION

Access control, assets, unit bases and incident response.

PRODUCTION

Planning, readiness, liaison and schedule continuity.

PEOPLE

Talent protection, touring, welfare and secure movement.

TALENT, TOURING AND PUBLIC APPEARANCES

Continuity across every venue, city and handover.

Horizon supports artists, talent, executives and production personnel around filming, rehearsals, premieres, publicity, travel and live events. Security becomes part of the schedule, not another complication.

BEFORE

Profile, itinerary, venue, hotel, transport and contingency review.

DURING

Close protection, access liaison, crowd awareness and secure movement.

BETWEEN

Consistent briefings, handovers and rapid response to change.

SECTOR CAPABILITY

LUXURY HOSPITALITY, AVIATION & CONCIERGE

Discreet security, medical and journey support designed around the guest, the principal and the service experience.

PRINCIPAL

Individuals, families, guests and accompanying personnel.

EXPERIENCE

Residences, hotels, aviation, transfers, events and leisure.

PROVIDER

Privacy, discretion, continuity and accountable service.

PRIVATE AVIATION, MARITIME AND LIFESTYLE

Protection that moves with the itinerary.

Horizon coordinates discreet support across lounges, aircraft, airside movement, marinas, tenders, vessels, destinations and onward transport - always aligned with operator procedures and the principal's schedule.

AVIATION

Airside access, crew liaison, vehicles, routes and protective support.

MARITIME

Owners, guests, crew, marinas, shore movement and port interfaces.

CONCIERGE

One operating picture across PAs, private offices, hotels and providers.

SECTOR CAPABILITY

ENERGY, INFRASTRUCTURE & MAJOR PROJECTS

Security, medical and operational support built around the project, the people and the risk.

PROJECT

Mobilisation, construction, commissioning and operations.

PEOPLE

Workforce, executives, visitors and local stakeholders.

CONTINUITY

Access, assets, incident response and licence to operate.

SITE AND PROJECT SECURITY

Secure the project without slowing the operation.

Effective project security combines proportionate controls, clear authority and practical awareness of how people, contractors, materials, vehicles and information move through the site.

ACCESS

Personnel, visitors, contractors, vehicles, deliveries and exceptions.

ASSETS

Plant, equipment, materials, information and critical systems.

CONTINUITY

Incident response, escalation, handover and recovery.

OPERATIONAL RESILIENCE

Distance changes the response. Preparation closes the gap.

Remote sites and offshore operations depend on disciplined planning, reliable coordination, medical contingencies and clear triggers for escalation or evacuation.

PREPARE

Threat, environment, access, welfare and response planning.

SUPPORT

Journey, medical, security and specialist capability.

ESCALATE

Clear thresholds, communications, recovery and evacuation options.

PROTECTIVE INTELLIGENCE AND INFORMATION CONTROL

See the change early. Keep sensitive information controlled.

The strongest protection often happens before an issue reaches the person, journey, production or operation. Horizon combines practical threat awareness with disciplined information handling and proportionate escalation.

AWARENESS

Threat, vulnerability, disruption and stakeholder monitoring.

CONTROL

Need-to-know handling of identities, schedules, locations and decisions.

ACTION

Clear reporting, triggers, advice and proportionate mitigation.

TRAINING, MEDICAL, PEOPLE AND GOVERNMENT

Capability that performs when it matters.

Specialist capability can be delivered independently or integrated into a wider security requirement, with one brief and clear accountability.

SECURITY & MEDICAL TRAINING

Close protection, hostile-environment, medical, trauma and scenario-based programmes shaped around operational reality.

MEDICAL PROVISION

Paramedics, medics and qualified first responders for events, travel, remote and higher-risk environments.

VETTED SPECIALIST PEOPLE

Security, risk, medical, maritime and operational professionals - from one specialist to a complete team.

DEFENCE & GOVERNMENT

Advisory, integration, training and sustainment support for complex governmental and defence requirements.

ONE DISCIPLINED PROCESS

One accountable lead from requirement to review.

The same risk-led process applies from a single movement or assessment to an enduring international programme.

01 ASSESS
People, environment, threat and objectives.

02 DESIGN
Proportionate solution, governance and resources.

03 MOBILISE
Select, brief, prepare and deploy.

04 OPERATE
Deliver, report, communicate and escalate.

05 REVIEW
Close out, capture lessons and improve.

UK + GLOBAL
REACH

BESPOKE
DELIVERY

CONFIDENTIAL
BY DEFAULT

Clear scope. Named contacts. Coordinated delivery. Accountable close-out.

CONFIDENTIAL ENQUIRIES

Start with one requirement.

Whether the requirement is immediate, planned or exploratory, a confidential conversation is enough to consider one task, specialist requirement or enduring programme.
