

Shaquana (Shaq) Teasley is the founder and CEO of Agate Solutions, LLC which provides consulting, training and mentoring in the area of International Trade and Global Logistics.

The mission of Agate Solutions LLC is to relieve clients of the complexities of International Trade Compliance by offering subject matter expert consulting services and training solutions. Agate Solutions is a minority owned and operated business that is passionate about supporting an industry of diverse Trade professionals.

Shaquana has over 15 years of experience in the International Trade industry. Agate Solutions courses empower individuals, teams, organizations by growing their skills to better define their success while also providing consulting services to develop Trade Compliance programs. Agate Solutions offers courses to prepare individuals for a career in Import, Export, International Trade, Compliance, Logistics and Supply Chain. Agate Solutions also offers a mentoring roundtable to further support career development.

The upcoming Spring 2021 course comprises of a six-week intensive on international trade and logistics topics. The course is 90 minutes one day per week, beginning February 2021. This course will benefit importers, purchasing, logistics, traffic, customer service, customs brokers, freight forwarders and anyone involved or with the responsibility for international documentation, compliance rules and regulations. This course is excellent for beginners and serves as a refresher for experienced professionals. Instructor will modify the course based on attendees.

Through interactive e-learning, participants can expect to obtain a detailed understanding of the international trade and logistics industry. Students will obtain in depth knowledge of trade terminology, import / export operations, procedures, documents, impact of government regulations, domestic freight, global logistics and the basics of supply chain. Agate Solutions will make learning simplistic by sharing real world examples, better known as the “Shaq” breakdown.
