

# Introducing our **NEW** approach in controlling bed bugs

## [ Bed bug **2E-SCAN** Monitoring programme ]

(A programme that is **E**asy to be executed and involve **E**arly detection of bed bug infestation that can prevent the bed bug from biting your guests and profits)

### Bed bug monitoring station

(An attractive and ideal living space for bed bug with attractant, that will be installed at targeted areas in the room)

# HOW DOES OUR BED BUG 2E-SCAN PROGRAMME WORKS?

## PARTNERSHIP

We will work hand in hand with you so that we can implement an effective programme that can be tailored to your needs and solve your problem.

## TRAINING AND EDUCATION

Quarterly staff training and support will be conducted, so that all parties can easily learn and monitor for bed bugs which only takes a few seconds.

## QUALITY CONTROL

Monthly QC inspection and maintenance will be held to make sure the programme run smoothly. Yearly reporting with analysis will also be given as a Quality Assurance report.

## OUR RESPONSE AND TREATMENT

If your staff found signs of bed bugs, our technical team will swiftly confirm the infestation and execute a treatment program at promotional price (exclusively for customer that engaged in this programme only)

# ADVANTAGES OF OUR NEW BED BUG CONTROL PROGRAMME

## **Early detection**

Your will be able to detect a bed bug before guest complaint or even before infestation arise that will cause days of room closure

## **Prevent from spreading**

Elimination of smaller infestation in early stage can help in reducing risk of contaminating other rooms

## **More proactive**

A quick response in can prevent from longer room closure time and damaging expensive bed and furniture which can lead to profit loss
