

Press Release

DRONE SOLUTIONS – CHAMPIONS INNOVATIVE DISRUPTIVE PRODUCTS *Supporting Efforts to Save Lives and our Planet*

Singapore, September 14, 2020 Drone Solutions today announced that Mr. Sharif Shaharudeen has joined the Company as a Systems Engineer in support of the Company's new product development with an emphasis on Unmanned Search and Rescue applications and the support of existing product lines.

Mr. Shaharudeen will be responsible for supporting the integration of the Lifeseeker in fixed wing and rotary aircraft and the recently released Lifeseeker Mini in unmanned aerial vehicles ("UAV"); the Lifeseeker system turn a mobile phone into an emergency beacon capable of leading rescue teams to its exact location without collaboration from the missing person or service provider; and operates with or without a network signal.

Further in the aerial arena, he is responsible for assisting the military, law enforcement, governmental agencies, industry and security firms in, designing in and using Safe-T and Light-T smart tethered drone solutions for persistent intelligence, surveillance, reconnaissance ("ISR") capabilities as well as high-bandwidth communications.

He will also support the commissioning and deployment of another Drone Solutions product offering, the WasteShark, an industrial autonomous surface vessel ("ASV") designed for round-the-clock data and collection of plastics, bio-waste and other debris from waterways, ports, harbours and other marine & water environments.

Mr. Sharfuddin is an Honours Graduate of the University of Glasgow where he received a BS in Aeronautical Engineering; he has previous work experience with Singapore Airlines and Lufthansa.

About Drone Solutions

Drone Solution Services Pte Ltd is a privately held Singapore company engaged in researching, designing, developing, manufacturing, marketing, selling, licensing and patenting proprietary intellectual property rights related to Unmanned Systems Technology products.

Born from its Founder's vision to make Unmanned Systems available to benefit society from lifesaving and Search and Rescue, to supporting aid programs, from environmental protection to oil spill intervention; his motto has always been, "*no matter what, no one is left behind*"; with this spirit in this new era, Drone Solutions mission is to make unmanned vehicles available to support humanity.

Drone Solutions is in a constant pursuit of excellence through technological innovation and novelty enabling it to provide bespoke and advanced state-of-the-art unmanned aerial systems ("UAS"), unmanned underwater vehicles ("UUV"), unmanned surface vehicles ("USV") unmanned ground vehicles ("UGV") and industrial autonomous surface vessel ("ASV") solutions across a diverse range of segments.
