

**Elevator Pitch:** *RIGKINGS* \_ is an oil and gas responsive mobile gaming application that bridges the gap from entertainment to educational development which allows users to learn by playing a fun interactive game in a safe environment and get accredited certifications to enter the industry!

The Goal is simple. You drill to a set total depth racing against the clock to win well bonuses and more. Upgrade your equipment to improve your overall time of completion and mark your place on the global leader board to have the bragging rights of who is the true Rig King.

Initially you will start off by drilling on a single rig then a double rig and finally a triple rig. Each rig and each hole have their own unique set of complications and challenges. It's up to you to learn how to avoid costly mistakes that will end up making you or breaking you in the industry of pulling the dragons from the ground.

After you complete the free game trial, you will be given an option to purchase the full game for 3.99 which will allow you to start your Oil baron career and build your Oilfield into a Rockefeller empire. There will be mini games in-between to unlock hidden treasures and artifacts that will increase your place in the game.

Once the Online Platform is completed, you will be able to build your crew and play with your friends online performing different positions.

Lastly, you will also be given an option If you wish to play and learn to be accredited to get your certificates to become a rig technician.

You will first start off with a single rig and drill to a depth of 1250 meters. This will take you approximately 10 to 15 min. 20 second connections with a throbbing gauge that will need to be stopped at the right spot to ensure proper connection and giving you the challenge of a plus or minus seconds to your overall clock. If you miss it totally you will lose your string downhole causing you to lose money and time.

The second well is a double rig and will drill to a depth of 2500 meters. This will take around 21 -29 min average. You will get an option to upgrade your bit before you drill. You will more than likely must do a bit trip. Once successfully completed you will get a well bonus of 500k

The third well will be a triple rig and will be able to drill to a depth of 3750 meters. Again, an option of a bit upgrade and possible wiper trips and bit trips. This Well will take around 31 – 55 min.

At TD you will get an option prompted asking if you want to risk it all and go for the Gusher or not. If so the user will buy 250 more stems to drill for the gusher... 60 percent will get a Gusher while the other hit a duster prompting 4<sup>th</sup> hole to be drilled in north Dakota giving you the abilities to complete that game with smaller well bonus to purchase well licences from the purchased gamed player

Once all 3 or 4 wells are complete you will be giving the option to buy the game for 3.99 and then it will prompt an option if you are wanting to continue playing for fun or their will be an option to allow the user to play the game and set the skill level they are in to have a more in depth interactive game experience where they will receive credits for completion of various tasks and objective scenarios to pursue or advance their career in the industry.

This gives them an opportunity to potentially get accredited certificates to help them get into the industry by way playing a game in a safe environment. Thus, reducing the cost of onsite training and reducing the high risk of new worker injuries being that they are more engaged in their own environment. This information will can be used to connect recruiters and workers that are trying to fill in an industry looking for trained and competent workers in this boom-and-bust cycle we all know too much of.

Through innovative technologies, you can experience what it is we do and how we do it. Also, what changes are taking place that are improving environmental responsibilities all while keeping up sustainable development.

The Oil and Gas sector has often been scrutinized largely from people that do not understand fully the importance of this industry and how essential it is to our everyday life. By shining a light on the positive changes and setting a precedence for cutting emissions and how we implement change in our environmental and regulatory practices, We will be the benchmark model for many years to come!
