

City of Valdez Pavement Plan

Phase IV – VI Fieldwork | Project No. 22-310-1115

September 2023

Project Description

Existing pavement conditions on roads within the City of Valdez have deteriorated. Due to the deteriorated pavement condition, the City is initiating this Pavement Rehabilitation project to improve roadways, extend the service life, and reduce future maintenance costs.

Key Project Design Features

- ✓ Resurfacing
- ✓ Curb and Gutter Replacement
- ✓ Drainage Improvements
- ✓ Utility Replacement/Relocation
- ✓ Pedestrian Facilities

Current Progress

The project team is nearing completion of design for Phase IV and is continuing design work for Phases V and VI. Construction for Phase IV has been deferred to the 2024 construction season.
