It Takes A Community To Raise A Child is a facility of learning, which addresses the students' individual needs so that they may develop physically, spiritually, intellectually, socially, and morally. We believe in educating the whole child; every child is a unique gift, and each may develop through the awareness and support of parents, teachers, administrators, and significant others. Students are guided to set a higher level of self-esteem by being encouraged to achieve their personal best as part of their growth process. In striving to reach their goals, students come to appreciate the gifts of other students as well as to realize and respect differences in abilities and talents.
