NOTES

FINAL APPROVAL

APPROVED BY:

Dave Arnold, Scientific Director

DATE APPROVED: 5/27/2025

"ND" indicates analyte not detected in the sample tested at levels at or above the limit of quantitation. Unless otherwise noted, all samples are collected by North Coast employees in accordance with SOP-620 on the date the samples were received. Total THC is sum of delta-9-THC, delta-8-THC+0.877*THCA. Total CBD is sum of CBD+0.877*CBDA. Permethrins measured as cumulative residue of cis- and trans-permethrin isomers. Pyrethrins measured as cumulative residue of pyrethrin 1, cinerin 1, and jasmolin 1. Pathogenic Aspergillus includes *flavus*, *fumigatus*, *niger*, and *terreus*. "PASS"/"FAIL" determinations based on "Sampling and Testing Technical Guidance for Marijuana Products" published by Mich. Cannabis Regulatory Agency.
¹Beta-pinene co-elutes w/ sabinene; delta-3-carene co-elutes with phellandrene; if either co-eluting analyte is present in sample, results added to beta-pinene and delta-3-carene, respectively.
²Non-quantitative/for information only (FIO). Moisture Content, Conversion Oil, MCT oil not w/in ISO 17025 scope of accreditation & have not been evaluated by CRA; results are for FIO.
