Rafael Vela

has successfully completed the online, non-credit Specialization

Leverage Data Science for a More Agile Supply Chain

This specialization used hands-on activities to show how data science techniques can turn raw data into decision-makers for a more agile supply chain. Students practiced foundational techniques such as demand forecasting, inventory management with demand variability, and using the newsvendor model, in addition to more advanced techniques such as how to optimize for capacity and resources as well as mitigate risks with the Monte Carlo simulation.

Paul Jan, Supply Chain Thought-Leader and Educator
