

AI Interactive Website Instructions

This interactive website is powered by Gemini's Frontier AI model. It is fairly easy to use, but below you'll find some brief instructions. Don't be afraid to poke around. You won't break anything.

The site is divided into three columns:

- On the left, you'll find the sources that are used in the site.
- In the middle, you'll find the chat window.
- On the right, you'll find what is called the studio, where you'll see some reports, including a video overview, that I've created with the AI too.

At the bottom of the chat window is a dialogue box that allows you to interrogate your sources by asking questions. You also find that some questions are suggested. If you want to use one of them, simply click on it. The responses will appear above in the chat window.

In the studio on the right are some "reports" that I've prepared that you might find helpful.

Beware that the AI can (and sometimes does) make mistakes in analyzing the sources. Further, its responses are limited to what it finds in the uploaded sources.

Enjoy!
