

# Profit Starts with ACCESS.

ACTIVATED CARBON  
TECHNOLOGIES

## Why Choose Us

Activated carbon is a highly refined, highly activated carbon that holds and exchanges nutrients in the soil, improves availability, supports microbial life, and strengthens overall soil health for more efficient fertilizer use. Founded in 2017, Activated Carbon Technologies delivers customized liquid carbon fertility products that boost soil biology, unlock tied-up nutrients, and help growers get more performance and profit from what's already in their ground.

### ACCESS YOUR SOIL'S POTENTIAL

- Unlock nutrients standard soil tests miss
- Activate natural soil biology + chemistry
- Turn tied-up fertility into plant-ready fertility

### APPLY IT YOUR WAY

- Works through planter, sprayer, plane, or knife rig
- Fits any liquid system
- Apply 30 days before or up to 30 days after planting

### CUT COSTS, NOT YIELDS

- Replace expensive dry P & K
- Save up to \$100+ per acre
- Maintain or increase yield potential

### BUILT TO PERFORM YEAR AFTER YEAR

- Build healthier soil every year
- Improve structure, chemistry + biology with one product
- More access. More efficiency. More profit.
