WHO WE ARE?

The Foundation of Trust: Experience and Expertise

ST Marble, founded in 2013, operates with a team of experts who each have over 25 years of experience in the natural stone industry. Since our establishment, we have become a trusted solution partner in the sector through our commitment to high quality standards, customer satisfaction, and long-term, sustainable business relationships.

*With the
care of our
female
specialists,
every stone
becomes a
symbol of
quality.*

In our quality control processes, the meticulous attention to detail and disciplined approach of our female stone specialists play a key role in supporting our operational excellence. Their observational skills and technical precision ensure that each product exceeds our established quality standards.

Every stage of our production process — including cutting, selection, packaging, and shipment — is carried out through systematic inspections. Each product is individually checked to ensure that only stones meeting the highest quality criteria are delivered to our clients. For us, quality is not merely a goal; it is an integral part of our corporate culture.

*Delivering
More
Than
Stone..
We
Deliver
Value.*

TRAVERTINE

THE ELEGANCE SHAPED BY NATURE OVER TIME

Located in Turkey's Aegean region, Denizli has earned global recognition for its exceptional travertine reserves. Denizli Travertine is not only a prized material in Turkey but also a preferred choice for architectural and design projects worldwide.

With its refined texture, soft and sophisticated tones, natural porosity, and distinctive veining, this unique natural stone offers a timeless aesthetic for both interior and exterior applications. Its enduring structure harmonizes beautifully with both modern and classical architecture.

Denizli Travertine's characteristic color palette — light beige, creamy hues, and subtle gray undertones — brings warmth and understated elegance to any space. Thanks to its durability, workability, and eco-friendly nature, it is widely used in flooring, wall cladding, façades, bathrooms, and poolside areas. Our company presents Denizli Travertine to the global market in its most natural form, through a meticulous selection process, strict visual quality controls, and the oversight of our expert team.

Each slab is carefully prepared to reflect the stone's innate beauty and aesthetic potential to the fullest.

With Denizli Travertine, you don't just add stone to your project — you add the timeless signature of nature itself.

LIGHT TRAVERTINE

Light Travertine is the perfect choice for those seeking a bright and airy atmosphere. With its subtle beige and cream tones, it brings warmth and sophistication to both contemporary and classic spaces. Ideal for flooring, wall cladding, and bathroom applications, Light Travertine offers versatility and natural charm in every detail.

MEDIUM TRAVERTINE

Medium Travertine balances warmth and depth with its rich beige tones and natural veining. It provides a neutral yet striking foundation, making it suitable for both indoor and outdoor designs. Its moderate color intensity makes it a preferred option for spaces that require a harmonious blend of style and durability.

NOCHE TRAVERTINE

With its deep, earthy brown tones and bold character, Noche Travertine delivers a sense of grounded elegance. It adds richness and contrast to interiors and exteriors, creating a warm, inviting ambiance. Perfect for rustic, Mediterranean, or modern designs, Noche brings nature's bold expression into architectural form.

WALNUT TRAVERTINE

Walnut Travertine offers a luxurious and refined aesthetic with its warm walnut-brown shades and layered textures. It exudes natural sophistication and is ideal for high-end residential and commercial spaces. From feature walls to elegant floors, Walnut Travertine adds depth, distinction, and timeless appeal to every project.
