

## **EXHIBIT A – SCOPE OF WORK REPORT**

**Project:** Warrior Hall Interior Renovation – St. Martin's Episcopal School

**Location:** 3110 Ashford Dunwoody Road, Atlanta, Georgia 30319

**Issue:** Schematic Design (Not Released for Construction) – 02.03.2026

**Scope Limited To:** Division 03, Division 09, Division 12 Only

**Documents Reviewed:** 02032026\_SMES\_Warrior\_Hall\_Renovation\_-\_Schematic\_Design\_Set.pdf;  
SMES\_Phasing\_Plans\_1\_-3\_2026.01.26.pdf

**Created By:** Compass Global | Powered by SQUARES AI Platform

### **DIVISION 03 – CONCRETE (FLOORING-RELATED ONLY)**

#### **03 01 30 – Concrete Slab Preparation / Repair (As Required to Receive New Flooring)**

##### **Sheet-Tied References:**

A-121 (Level 1 Demolition Plan) identifies removal of existing vinyl composition tile (VCT) and directs cleaning of concrete slab and preparation for new LVT flooring.

A-122 (Level U1 Demolition Plan) identifies similar VCT removal and slab preparation for new flooring.

##### **Concrete / Substrate Scope (Flooring Interface):**

- Remove existing VCT where indicated and mechanically remove residual adhesive as required to achieve a clean substrate suitable for new flooring.
- Provide floor preparation including patching, smoothing, and leveling to meet finish flooring manufacturer flatness and substrate requirements (specific tolerances not otherwise specified in documents).
- Perform moisture testing prior to installation of all floor finishes (testing standards not specified in documents; verify ASTM method during bidding).
- Where moisture testing indicates conditions exceed finish manufacturer limitations, provide compatible moisture mitigation system (system not specified in documents; verify during bidding).
- Coordinate slab preparation at perimeter conditions, penetrations, and terminations under and adjacent to casework and door thresholds.

## DIVISION 09 – FINISHES

### 09 06 00 – Finish Schedule / Finish Legend (Reference A-701)

- CPT-1: Shaw Contract, Atlas 5A267, Empathy 67100; 8' x 10' (Classrooms).
- CPT-2: Mohawk, exploreD BT609, 973 Bearpaw (Alumni Room).
- CPT-3: Mohawk, exploreD BT609, 975 Raven (Media Center).
- LVT-1: Shaw Contract, Union 4349V, Concrete Spindle 49140 (Classrooms).
- LVT-2: Shaw Contract, Inlet 0926V, Spindle 26140 (Hallways).
- LVT-3: Shaw Contract, Commingle 4350V, Concrete 50105 (Lab / X-Ray / Breakroom).
- LVT-4: Shaw Contract, Solo 5.0mm, 4536V, Spindle 49140.
- RB-1: Flexco rubber base, 4", color 030 Meridian Bone (Throughout U.N.O.).
- EP-1: Stonhard Stonshield HRI Broadcast, medium texture; color TBD by Architect; restroom flooring with integral 4" base.

### 09 65 00 – Resilient Flooring (LVT-1 / LVT-2 / LVT-3 / LVT-4)

- Provide and install LVT as tagged on Finish Plans A-711, A-712, A-713 and defined on Finish Schedule A-701.
- Floor Prep: clean substrate; remove adhesive residue; patch and level as required to meet LVT manufacturer substrate requirements.
- Moisture Testing required prior to installation; provide mitigation if required by results.
- Provide manufacturer-required adhesive system (specific adhesive not identified in documents).
- Provide approved transition strips at all changes in flooring material.
- Coordinate terminations at door thresholds, frames, penetrations, permanent cabinets, and equipment.

### 09 68 00 – Carpeting (Broadloom – CPT-1 / CPT-2 / CPT-3)

- Provide and install carpet flooring as tagged on Finish Plans and defined on Finish Schedule A-701.
- Substrate preparation required prior to installation.
- Moisture testing required prior to installation.
- Provide manufacturer-required adhesive system.
- Provide approved transition strips at all changes in flooring material.

### 09 65 13 – Resilient Base (RB-1)

- Provide 4" rubber base RB-1: Flexco, color 030 Meridian Bone, throughout U.N.O.
- Provide manufacturer-required adhesive.
- Inside and outside corner conditions not specified; verify during bidding.
- Terminate neatly at frames, casework, and transitions.

### 09 96 00 – Resinous Flooring (EP-1)

- Provide EP-1 Stonhard Stonshield HRI Broadcast system at restroom floors with integral 4" base.
- Shot-blast or mechanically abrade substrate as required by manufacturer.
- Moisture testing required prior to installation.
- Treat cracks and control joints per manufacturer requirements.
- Installer certification and manufacturer installation compliance required.

## DIVISION 12 – SPECIALTIES (FLOORING-RELATED ONLY)

- Coordinate flooring and base terminations at relocated classroom millwork per demolition notes.
- Provide floor finish cut and fit at permanent cabinets and equipment.
- Entrance mat and walk-off systems not specified in reviewed documents; verify during bidding.
