

BOTS2026

BOSTON ORTHOPEDIC TECHNOLOGY SUMMIT

BOSTON Orthopedic Technology Summit

Collaborate. Compete. Catalyze

Dear colleague,

Orthopedic surgery and MSK healthcare is being reinvented. The question is who gets to shape it and where will you be when it happens.

We are finally bringing surgeons, startups, researchers, investors, and industry leaders into the same room. To learn, network, pitch and build something together.

BOTS: Boston Orthopedic Technology Summit centers on where the field is actually heading. Artificial intelligence in musculoskeletal care, next-generation surgical technology, and the business of building companies that move medicine forward. Startups pitch to strategic investors. Cross-disciplinary teams prototype real solutions in hours with our Hackathon.

This is the convergence orthopedics has needed. Surgeons, founders, PhD's, venture capital, and MedTech strategists working on the same problems together.

Join us, along with Theodore Blaine, Hafiz Kassam, and some of the most innovative minds in the field, on **May 15-16, 2026**, at the [Cambridge Innovation Center](#) (CIC) in **Kendall Square, MA**.

Registration is open:

REGISTER HERE

Agenda at a Glance

May 15 (Friday): MSK Care Reimagined

4:30 PM – 6:30 PM

COMPETE Pitch Contest

4:30 PM – 8:15 PM

Cambridge Orthopedic & Musculoskeletal Pitch Event for Technology Entrepreneurs

May 16 (Saturday): Innovating MSK Care

7:30 AM – 4:00 PM

BOTS HACK

4:00 PM – 6:30 PM

Engineering the Future of Orthopedics

Beyond the Discussion: COMPETE & Win!

We don't just talk about the future—we build it. We are officially opening applications for our two signature high-stakes events:

- **May 15, 2026 (Friday): "COMPETE Pitch Contest"** with Cambridge Orthopedic and Musculoskeletal Pitch Event for Technology Entrepreneurs Pitch Competition. Call for the founders and emerging startups, **Pitch your orthopedic innovation** to a panel of top-tier investors and industry leaders.
- **May 16, 2026 (Saturday): BOTSHACK:** Ever wish you could just sit down with an engineer or a industry expert and actually fix a problem you see every day? Here's your chance. We're partnering with [MIT Hacking Medicine](#) for a high-energy sprint to turn 'what if' into a real-world solution. **Let's roll up our sleeves and build the future of MSK care together!**
