

To help students **map opportunities** for college and career readiness, educators choose the lessons that best fit their students' needs.

- Each stand-alone lesson includes a slide deck and a student-facing, Google doc.
- Teachers can deliver the lesson online or in person.
- The 45-minute lessons can be extended, shortened, or modified as needed.

See the Big Picture

Students utilize planning tools and explore career opportunities

Map Career Options

- Explore jobs you are already familiar with
- Discuss career fields with the people around you
- Identify similarities and differences between various careers and fields

Discover Career Possibilities

- Investigate different career possibilities
- Research answers to questions about a variety of careers
- Identify how you feel about different career options

Analyze Career Websites

- Identify what you want from a career website
- Explore ways career websites can help you learn about careers
- Identify which career websites are best for you

Research Community Businesses

- Identify which businesses you find valuable
- Discuss favorite businesses with the people around you
- Identify businesses you might want to work for

Explore Pathways and Career Education

Students explore Pathways, Career Education and work sectors

Define CTE and ROP

- Identify nearby CTE and ROP programs that interest you
- Use information from the CTE 101 handbook to answer career questions
- Design a CTE course for your high school

Plan a Career Pathway

- Identify high school programs and experiences they offer
- Connect your high school schedule to college options
- Identify a career connected to the school options you chose.

Realize Options Beyond High School

- Identify interests and habits in your experience that may lead to options
- Review different options people have taken following high school
- Create a decision tree to guide your thinking

Explore Growing Work Sectors

- Identify areas of work you are interested in exploring
- Research growing industries, jobs, and expanding work sectors
- Create a scenario for your place in one of these growing areas of work

Be Flexible in Your Thinking

Students learn about work experience opportunities accessible in high school, college, and beyond

Increase Your Resilience

- Define what it means to be resilient
- Identify different ways people demonstrate resiliency
- Make a plan on how to respond to adversity with resilience

Make Alternative Plans

- Understand the importance of making alternative plans
- Identify goals and alternative means of getting there
- Create a goal and develop multiple ways to achieve it

Write your Executive Summary

- Identify key elements of a business plan, and the purpose of an executive summary
- Recognize what makes a business plan strong
- Write an executive summary for your business idea

Speak with Passion

- Learn how to speak with passion about what interests you
- Study and analyze elevator pitches from other people
- Write and deliver your own elevator pitch
