

FROM CONVERSATION TO EVIDENCE

One scored artifact per lesson

A portfolio that grows from kindergarten to graduation

HOW IT WORKS

Every lesson follows the same three steps

- 1 Create the artifact.** Students complete a lesson that ends with something they made, scored with a checklist and saved to their portfolio.
- 2 Have career conversations.** Each artifact comes with questions that get students talking about who they are and where they're headed.
- 3 Reflect on growth over time.** Artifacts are dated and revisited, so students and teachers can see how interests and plans change.

Every lesson also includes grade-level expectations, accommodations, and a family connection.

Examples of how evidence grows with each grade

K-2

Who are you?. Students draw and label their RIASEC superpowers.

3-5

How are you growing?. Students make a card or timeline about someone they admire and the strengths they share.

6-8

What are your options?. Students build their first career plan in My Career Story.

9-12

Where are you headed?. Students revise their career plan with new action steps and track how it changes from grade 8 to graduation.

The career plan thread: built in grade 8, revised in grades 10 and 11.

FOUR STRANDS Lessons and artifacts address all four strands of career readiness.

Career Awareness and Exploration

Employability Skills

Growth and Advancement

Personal Interests and Career Planning
