"Slug" shall mean any discharge of water, sewage, or industrial waste which in concentration of any given constituent or in quantity of flow exceeds for any period of duration longer than fifteen (15) minutes more than five (5) times the average twenty-four (24) hour concentration of flows during normal operation.

18. "Storm Drain" (sometimes termed "storm sewer") shall mean a sewer which carries storm and surface waters and drainage, but excludes sewage and industrial wastes other than unpolluted cooling water.

19. "Superintendent" shall mean the Superintendent of Public Utilities of the City of Charlotte or the Superintendent's authorized deputy, agent, or representative.

2. It shall be unlawful to discharge to any natural outlet within the City, or in any area under the jurisdiction of said City, any sewage or other polluted waters, except where suitable treatment has been provided in accordance with subsequent provisions of this Ordinance.

(Code of Iowa, Sec. 364.12(3)(f))

3. Except as hereinafter provided, it shall be unlawful to construct or maintain any privy, privy vault, septic tank, cesspool, or other facility intended or used for the disposal of sewage.

4. The owner of any house, building, or property used for human occupancy, employment, recreation, or other purposes, situated within the City and abutting on any street, alley, or right-of-way in which there is now located or may in the future be located a public sanitary or combined sewer of the City, is hereby required at such owner's expense to install suitable toilet facilities therein, and to connect such facilities directly with the proper public sewer in accordance with the provisions of this Ordinance, provided that said public sewer is within one hundred fifty (150) feet of the property line. Billing for sanitary sewer service shall begin the date of official notice to connect to the public sewer.

(Code of Iowa, Sec. 364.12(3)(f))

(IAC 567-69.3(3))

6-2-3 PRIVATE SEWAGE DISPOSAL.

1. Where a public sanitary or combined sewer is not available under the provision of Section 6-2-2(4), the building sewer shall be connected to a private sewage disposal system complying with the provisions of this section.

2. Before commencement of construction of a private sewage disposal system the owner shall first obtain a written permit signed by the Superintendent. The application for such permit shall be made on a form furnished by the City, which the applicant shall supplement by any plans, specifications, and other information as are deemed necessary by the Superintendent. A permit and inspection fee of \$25.00 dollars shall be paid to the City at the time the application is filed.

The Superintendent shall be allowed to inspect the work at any stage of construction and, in any event, the applicant for the permit shall notify the Superintendent when the work is ready for final inspection, and before any underground portions are covered. The inspection shall be made within 72 hours of the receipt of notice by the Superintendent.

4. The type, capacities, location, and layout of a private sewage disposal system shall comply with all recommendations of the Department of Natural Resources of the State of Iowa and the

County Health Department. No permit shall be issued for any private sewage disposal system employing subsurface soil absorption facilities where the area of the lot is less than 15,000 square feet. No septic tank or cesspool shall be permitted to discharge to any natural outlet.

5. At such times as a public sewer becomes available to a property served by a private sewage disposal system, as provided in 6-2-2(4), a direct connection shall be made to the public sewer in compliance with this Ordinance, and any septic tanks, cesspools, and similar private sewage disposal facilities shall be abandoned and filled with suitable material.

(Code of Iowa, Sec. 364.12(3)(f))

6. The owner shall operate and maintain the private sewage disposal facilities in a sanitary manner at all times, at no expense to the City.

7. No statement contained in this article shall be construed to interfere with any additional requirements that may be imposed by the County Health Officer.

(Code of Iowa, Sec. 364.12(3)(f))

6-2-4 BUILDING SEWERS AND CONNECTIONS.

1. No unauthorized person shall uncover, make any connections with or opening into, use, alter, or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the Clerk.

2. There shall be two (2) classes of building sewer permits: (a) for residential and commercial service, and (b) for service to establishments producing industrial wastes. In either case, the owner or the owner's agent shall make application on a special form furnished by the City. The permit application shall be supplemented by any plans, specifications, or other information considered pertinent in the judgment of the Superintendent. A permit and inspection fee of \$5.00 dollars for a residential or commercial building sewer permit and \$15.00 dollars for an industrial building sewer permit shall be paid to the City at the time the application is filed.

Before a permit may be issued for excavating for plumbing in any public street, way or alley, the person applying for such permit shall have executed unto the City of Charlotte and deposited with the City Clerk a corporate surety in the sum of five thousand dollars (\$5,000.00) conditioned that the applicant will perform faithfully all work with due care and skill, and in accordance with the laws, rules and regulations established under the authority of any Ordinances of the City of Charlotte pertaining to plumbing. This bond shall state that the person will indemnify and save harmless the City of Charlotte and the owner of the premises against all damages, costs, expenses, outlay and claims of every nature and kind arising out of unskillfulness or negligence on the applicant's part in connection with plumbing or excavating for plumbing as prescribed in this Ordinance. Such bond

shall remain in force and must be executed for a period of two (2) years except that on such expiration it shall remain in force as to all penalties, claims and demands that may have accrued thereunder prior to such expiration.

3. All cost and expense incident to the installation and connection of the building sewer shall be borne by the owner. The owner shall indemnify the City from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer.

4. A separate and independent building sewer shall be provided for every building, except where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, courtyard, or driveway, the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer.

5. Old building sewers may be used in connection with new building sewers only when they are found, upon examination and testing by the Superintendent, to meet all requirements of this Ordinance. The Superintendent may require that the old sewer be excavated for the purpose of facilitating inspection. No old cesspool or septic tank shall be connected to any portion of a building sewer that is also connected to the public sewer. Cesspools and septic tanks shall be located, and drained in a manner approved by the Superintendent and removed or filled with sand, crushed rock or any other solid material approved by the Superintendent, except as exempted by the Superintendent.

6. The building sewer shall be constructed in accordance with applicable portions of the last published (State Plumbing Code of Iowa), applicable specifications of the American Society for Testing and Materials (ASTM) and applicable portions of the Water Pollution Control Federation (WPCF) Manual of Practice No. 9."

a. Each connection to the public sewer shall be made to the fittings designated for that property. If a fitting in the public sewer is not available for the designated property, the connection shall then be made under the direct supervision of the Superintendent. Connections to the public sewer not made to an existing wye or tee shall be made by a hole cutter or careful chisel cutting. The connection shall be rendered water and gas tight, by use of rubber gaskets. The building sewer shall not protrude into the public sewer.

b. All building sewers shall be constructed of the following materials conforming to the indicated standards:

Vitrified Clay Pipe VCP

(1) Pipe and Fittings - ASTM C-700 "Standard Specification for Vitrified Clay Pipe, Extra Strength, Standard Strength and Perforated."

(2) Coupling and Joints - ASTM C-425 "Standard Specification for Compression

Joints for Vitrified Clay Pipe and Fittings".

Extra Heavy Cast Iron Soil Pipe

(1) Pipe and Fittings - ASTM A-74 "Standard Specification for Cast Iron Soil Pipe and Fittings."

(2) Joints - ASTM C-564 "Standard Specification for Rubber Gaskets for Cast Iron Soil Pipe and Fittings."

Polyvinyl Chloride (PVC)

Polyvinyl Chloride (PVC) and joints shall be installed according to the manufacturers' recommendations and shall conform to:

(1) Pipe - A.S.T.M. D-3034, "Type P.S.M. Poly (PVC) and Fittings."

Minimum wall thickness:

4" - 0.125"

6" - 0.180"

8" - 0.240"

10" - 0.300"

(2) Joints - A.S.T.M. D-1869, A.S.T.M. D-1312, "Flexible Elastomeric Seals."

c. No building sewer for residential or commercial buildings shall be less than four inches in diameter. No building sewer for industries or multiple dwellings shall be less than six inches in diameter.

d. Unless otherwise authorized, all building sewers shall have a grade of not less than one - eighth (1/8) inch per foot. A grade of one-fourth (1/4) inch per foot shall be used wherever practical.

e. All excavation shall be open trench work unless authorized by the Superintendent. The foundation in the trench shall be formed to prevent any subsequent settlement of the pipes. If the foundation is good firm earth, the earth shall be pared or molded to give a full support to the lower quadrant of each pipe. Bell holes shall be dug. Where the floor of the trench is of hard or rocky material, the trench shall be excavated to four inches below the pipe and brought back to the proper grade with gravel, coarse sand or similar material so as to provide a firm foundation and uniform support for the building sewer line. Backfilling shall be placed in layers and solidly tamped or packed up to two feet above the pipe. Back-filling shall not be done until final inspection is made by the Superintendent. Building sewers shall be laid straight at uniform grade between connections or fittings.

f. Cleanouts shall be provided for each change in direction or grade if the change exceeds 45 degrees and at least every 100 feet.

7. Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. The depth shall be sufficient to afford protection from frost. All excavations required for the installation of a building sewer shall be open trench work unless otherwise approved by the said Superintendent. Pipe laying and backfill shall be performed in accordance with A.S.T.M. Specification (Designation C12). No backfill shall be placed until the work has been inspected by the Superintendent or the Superintendent's representative. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer.

8. No person shall make connection of roof downspouts, exterior foundation drains, areaway drains, or other sources of surface runoff or groundwater to a building sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer.

9. The connection of the building sewer into the public sewer shall conform to the requirements of the Plumbing Code or other applicable rules and regulations of the City, or the procedures set forth in appropriate specifications of the A.S.T.M. and the W.P.C.F. Manual of Practice No. 9. All such connections shall be made gastight and watertight. Any deviation from the prescribed procedures and materials must be approved by the Superintendent before installation.

10. Each and every part of the building sewer shall be inspected and approved by the Superintendent before being concealed or back-filled. The applicant for the building sewer permit shall notify the Superintendent when the building sewer is ready for inspection and connection to the public sewer. The connection shall be made under the supervision of the Superintendent or the Superintendent's representative.

11. All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways, and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the City.

12. The City shall, in no event, be held responsible for claims made against it by reason of the breaking of any mains or service pipes, or by reason of any other interruption of the service caused by the breaking of machinery or stoppage for necessary repairs; and no person shall be entitled to damages nor have any portion of a payment refunded for any interruption.

13. The premises receiving sanitary sewer service, shall at all reasonable hours, be subject to inspection by duly authorized personnel of the City.

14. The Owner of the property served by a building sewer shall be responsible for the operation, maintenance, repair, blockage, surface replacement, and any damage resulting from

operation, maintenance repair and blockage of said building sewer, from the point of connection with the building drain to the Public Sewer.

6-2-5 USE OF THE PUBLIC SEWERS.

1. No person shall discharge or cause to be discharged any stormwater, surface water, groundwater, roof runoff, subsurface drainage, including interior and exterior foundation drains, uncontaminated cooling water, or unpolluted industrial process waters to any sanitary sewer. Applications may be cancelled and/or sewer service discontinued by the City for any violation of any rule, regulation or condition of service, and especially for any of the following reasons:

a. Misrepresented in the application as to the property or fixtures to be serviced by the sanitary sewer system.

b. Non-payment of bills.

c. Improper or imperfect service pipes and fixtures, or failure to keep same in suitable state of repair.

2. Stormwater and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as combined sewers or storm sewers, or to a natural outlet approved by the Superintendent. Industrial cooling water or unpolluted process waters may be discharged, on approval of the Superintendent, to a storm sewer, combined sewer, or natural outlet.

3. No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

a. Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid, or gas.

b. Any waters or wastes containing toxic or poisonous solids, liquids, or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant, including but not limited to cyanides in excess of two (2) mg/l as CN in the wastes as discharged to the public sewer.

c. Any waters or wastes having a ph lower than 5.5, or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage works.

d. Solid or viscous substances in quantities of such size capable of causing obstruction to the flow of sewers, or other interference with the proper operation of the sewage works such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, paunch manure, hair and fleshings, entrails and paper dishes, cups, milk containers, etc., either whole or ground by garbage grinders.

e. Any water or wastes having (1) a 5-day bio-chemical oxygen demand greater than 300 parts per million by weight, or (2) containing more than 350 parts per million by weight, or suspended solids, or (3) having an average daily flow greater than 2 percent of the average sewage flow of the City, shall be subject to the review of the Superintendent. Where necessary in the opinion of the Superintendent, the owner shall provide at the owner's expense, such preliminary treatment as may be necessary to (1) reduce the biochemical oxygen demand to 300 parts per million by weight, or (2) reduce the suspended solids to 350 parts per million by weight, or (3) control the quantities and rates of discharge of such waters or wastes. Plans, specifications, and any other pertinent information relating to proposed preliminary treatment facilities shall be submitted for the approval of the Superintendent and no construction of such facilities shall be commenced until said approvals are obtained in writing.

4. No person shall discharge or cause to be discharged the following described substances, materials, waters, or wastes if it appears likely in the opinion of the Superintendent that such wastes can harm either the sewers, sewage treatment process, or equipment, have an adverse effect on the receiving stream, or can otherwise endanger life, limb, public property, or constitute a nuisance. In forming an opinion as to the acceptability of these wastes, the Superintendent will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and other pertinent factors. The substances prohibited are:

- a. Any liquid or vapor having a temperature higher than one hundred fifty (150) F (65 C).
- b. Any water or wastes containing fats, wax, grease or oils, whether emulsified or not, in excess of one hundred (100) mg/l or containing substances which may solidify or become viscous at temperatures between thirty-two (32) and one hundred fifty (150 F) (0 and 65 C).
- c. Any garbage that has not been properly shredded. The installation and operation of any garbage grinder equipped with a motor of three-fourths (3/4) horsepower (0.76 hp metric) or greater shall be subject to the review and approval of the Superintendent.
- d. Any waters or wastes containing strong acid iron pickling wastes, or concentrated plating solutions whether neutralized or not.
- e. Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances, or wastes exerting an excessive chlorine requirement, to such degree that any such material received in the composite sewage at the sewage treatment works exceeds the limits established by the Superintendent for such materials.
- f. Any waters or wastes containing phenols or other taste-or-odor-producing substances, - in such concentrations exceeding limits which may be established by the Superintendent as necessary after treatment of the composite sewage, to meet with requirements of the State, Federal, or other

public agencies with jurisdiction for such discharge to the receiving waters.

g. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Superintendent in compliance with applicable State or Federal regulations.

h. Any waters or wastes having a pH in excess of 9.5.

i. Materials which exert or cause:

(1) Unusual concentrations of inert suspended solids (such as, but not limited to, Fullers earth, lime slurries, and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate).

(2) Excessive discoloration (such as, but not limited to, dye wastes and vegetable tanning solutions).

(3) Unusual BOD, chemical oxygen demand, or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment works.

(4) Unusual volume of flow or concentration of waters constituting "slugs" as defined herein.

j. Waters or wastes containing substances which are not amenable to treatment or reduction by the sewage treatment processes employed, or are amenable to treatment only to such degree that the sewage treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

5. If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in 6-2-5(4), and which in the judgment of the Superintendent, may have a deleterious effect upon the sewage works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Superintendent may:

a. Reject the wastes,

b. Require pretreatment to an acceptable condition for discharge to the public sewers.

c. Require control over the quantities and rates of discharge, and/or

d. Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provision of 6-2-5(10) of this article.

If the Superintendent permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the

Superintendent, and subject to the requirements of all applicable codes, Ordinances, and laws.

6. Grease, oil, and sand interceptors shall be provided when, in the opinion of the Superintendent, they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand, or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Superintendent, and shall be located as to be readily and easily accessible for cleaning and inspection.

7. Where preliminary treatment or flow-equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at the owner's expense.

8. When required by the Superintendent, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the Superintendent. The manhole shall be installed by the owner at the owner's expense, and shall be maintained by the owner so as to be safe and accessible at all times.

9. All measurements, tests, and analyses of the characteristics of waters and wastes to which reference is made in this Ordinance shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater," published by the American Public Health Association, and shall be determined at the control manhole provided, or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage works and to determine the existence of hazards to life, limb, and property. (The particular analyses involved will determine whether a twenty-four (24) hour composite of all outfalls of a premise is appropriate or whether a grab sample or samples should be taken. Normally, but not always, BOD and suspended solids analyses are obtained from 24 hour composite of all outfalls where pH's are determined from periodic grab samples).

10. No statement contained in this article shall be construed as preventing any special agreement or arrangement between the City and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the City for treatment, subject to payment, therefor, by the industrial concern.

6-2-6 PROTECTION FROM DAMAGE.

1. No unauthorized person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance, or equipment which is a part of the

sewage works. Any person violating this provision shall be subject to immediate arrest under charge of disorderly conduct.

(Code of Iowa, Sec. 716.1)

6-2-7 POWERS AND AUTHORITY TO INSPECTORS.

1. The Superintendent and other duly authorized employees of the City bearing proper credentials and identification shall be permitted to enter all properties for the purpose of inspection, observation, measurement, sampling, and testing in accordance with the provisions of this Ordinance. The Superintendent or the Superintendent's representatives shall have no authority to inquire into any processes including metallurgical, chemical, oil, refining, ceramic, paper, or other industries beyond that point having a direct bearing on the kind and source of discharge to the sewers or waterways or facilities for waste treatment.

2. While performing the necessary work on private properties referred to in 6-2-7(1), the Superintendent or duly authorized employees of the City shall observe all safety rules applicable to the premises established by the company and the company shall be held harmless for injury or death to the City employees and the City shall indemnify the company against loss or damage to its property by the City employees and against liability claims and demands for personal injury or property damage asserted against the company and growing out of the gauging and sampling operation, except as such may be caused by negligence or failure of the company to maintain safe conditions as required in Section 6-2-5(8).

3. The Superintendent and other duly authorized employees of the City bearing proper credentials and identification shall be permitted to enter all private properties through which the City holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair, and maintenance of any portion of the sewage works lying within said easement. All entry and subsequent work, if any, on said easement, shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved.

6-2-8 PENALTIES.

1. Any person found to be violating any provision of this Ordinance except Section 6-2-6 shall be served by the City with written notice stating the nature of the violation and providing a reasonable time limit for the satisfactory correction thereof. The offender shall, within the period of time stated in such notice, permanently cease all violations.

2 Any person violating any of the provisions of this Ordinance is liable to the City for any expense, loss, or damage occasioned the City by reason of such violations.

6-3-1 **ENFORCEMENT.** The Superintendent of public utilities shall supervise the installation of water service pipes and their connections to the water main and enforce all regulations pertaining to water services in this City in accordance with this chapter. This chapter shall apply to all replacements of existing service pipes as well as to new ones. The City Council shall make such rules, not in conflict with the provisions of this chapter, as needed for the detailed operation of the waterworks. In the event of an emergency the Superintendent may make temporary rules for the protection of the system until due consideration by the City Council may be had.

(Code of Iowa, Sec. 372.13(4))

6-3-2 **ADOPTION OF STATE PLUMBING CODE.** The installation of any water-service pipe and any connection with the municipal water system shall comply with all pertinent and applicable provisions, whether regulatory, procedural or enforcement provisions, of the State Plumbing Code as amended and as published by the Iowa Department of Public Health, which is hereby adopted. An official copy of the State Plumbing Code as adopted and a certified copy of this Ordinance are on file in the office of the City Clerk for public inspection.

6-3-3 **LICENSE REQUIRED.** All installation of water service pipes and connections to the municipal water system shall be made by a plumber licensed by this City. The Superintendent shall have the power to suspend the license of any plumber for violation of any of the provisions of this Ordinance. A suspension, unless revoked, shall continue until the next regular meeting of the City Council. The Superintendent shall notify the plumber immediately by personal written notice of the suspension, the reasons for the suspension, and the time and place of the City Council meeting at which the plumber will be granted a hearing. At this City Council meeting the Superintendent shall make a written report to the City Council stating the Superintendent's reasons for the suspension, and the City Council, after fair hearing, shall revoke the suspension or take any further action that is necessary and proper.

6-3-4 **MANDATORY CONNECTIONS.** All residences and business establishments within the City limits intended or used for human habitation, occupancy or use shall be connected to the public water supply if it is reasonably available and if the building is not furnished with pure and wholesome water from some other source.

6-3-5 PERMIT. Before any person, firm, corporation or other association shall make a connection with the public water system, a written permit must be obtained from the Superintendent. The application for the permit shall be filed with the Superintendent on blanks furnished by the Superintendent. The application shall include a legal description of the property, the name of the property owner, the name and address of the person who will do the work, and the general uses of the water. No different or additional uses shall be allowed except by written permission of the Superintendent. The Superintendent shall issue the permit, bearing the Superintendent's signature and stating the time of issuance, if the proposed work meets all the requirements of this Ordinance and if all fees required under this Ordinance have been paid. Work under any permit must be begun within six (6) months after it is issued. The Superintendent may at any time revoke the permit for any violation of this Ordinance and require that the work be stopped. The owner or plumber may appeal such action in the manner provided in Section 6-3-3 of this Ordinance.

(Code of Iowa, Sec. 372.13(4))

6-3-6 FEE FOR PERMIT/CONNECTION CHARGE. Before any permit is issued the person who makes the application shall pay a fee (Connection Charge) to the (City Clerk) of \$162.50 to cover the cost of issuing the permit and supervising, regulating, inspecting the work and to reimburse the City for costs borne by the City in making water service available to the property served. The fee shall be established by Resolution. (See footnote at end of chapter)

6-3-7 WATER SUPPLY CONTROL. The plumber who makes the connection to the municipal water system shall install a main shut-off valve of the inverted key type on the water-service pipe near the curb with a suitable lock of a pattern approved by the Superintendent. The shut-off valve shall be covered with a heavy metal cover having the letter "W" marked thereon, visible and even with the pavement or ground.

The plumber also shall install a shut-off valve and waste cock on every service pipe inside the building near the entrance of the water-service pipe into the building; this must be located so that the water can be shut off conveniently and the pipes drained. Where one service pipe is installed to supply more than one customer, there shall be separate shut-off valves inside the building for each customer so that service to one customer can be shut off without interfering with service to the others.

6-3-8 MAKING THE CONNECTION. Any connection with the municipal water system must be made under the direct supervision of the Superintendent or the Superintendent's authorized assistant. All taps in the water main must be at least (12) inches apart and on the side and near the top and not in any case within 18 inches of the hub.

(Code of Iowa, Sec. 372.13(4))

6-3-9 EXCAVATIONS. Excavations to do work under this Ordinance shall be dug so as to occasion the least possible inconvenience to the public and to provide for the passage of water along the gutter. All such excavations shall have proper barricades at all times, and warning lights placed from one-half hour before sunset to one-half hour after sunrise. In refilling the excavation the earth

must be laid in layers and each layer tamped thoroughly to prevent settlement, and this work, and any street, sidewalk, pavement or other public property that is affected, must be restored to as good a condition as it was previous to the excavation. The plumber must maintain the affected area in good repair to the satisfaction of the City Council for three months after refilling. All water service pipes must be laid so as to prevent rupture by settlement or freezing. No excavation shall be made within six (6) feet of any laid water or sewer pipe while the ground is frozen, and no water or sewer pipe shall be exposed to frost, except by special written permission of the Superintendent.

6-3-10 INSPECTION AND APPROVAL. All water-service pipes and their connections to the municipal water system must be inspected and approved in writing by the Superintendent before they are covered, and the Superintendent shall keep a record of such approvals. If the Superintendent refuses to approve the work, the plumber or owner must proceed immediately to correct the work so that it will meet with the Superintendent's approval. Every person who uses or intends to use the municipal water system shall permit the Superintendent or the Superintendent's authorized assistants to enter the premises to inspect and make necessary alterations or repairs at all reasonable hours and on proof of authority.

(Code of Iowa, Sec. 372.13(4))

6-3-11 COMPLETION BY THE CITY. Should any excavation be left open or partly refilled for twenty-four (24) hours after the water-service pipe is installed and connected with the municipal water system, or should the work be improperly done, the Superintendent shall have the right to finish or correct the work, and the City Council shall assess the costs to the property owner or the plumber. If the plumber is assessed, the plumber must pay the costs before the plumber can receive another permit, and the plumber's bond required by the Plumbing Ordinance shall be security for the assessment. If the property owner is assessed, such assessment shall be collected with and in the same manner as general property taxes.

(Code of Iowa, Sec. 364.12(3)(h))

6-3-12 METER ACCURACY AND TEST. All water shall be supplied through meters that accurately measure the amount of water supplied to any building. The Superintendent or the Superintendent's assistant shall make a test of the accuracy of any water meter at any time when requested in writing. (Code of Iowa, Sec. 354.2(19))

44. "Utilities" means systems for the distribution or collection of water, gas, electricity, wastewater, and storm water.

IMPROVEMENTS

6-7-6 IMPROVEMENTS REQUIRED. The subdivider shall, at said subdivider's expense, install and construct all improvements required by this Ordinance. All required improvements shall be installed and constructed in accordance with the design standards established for such improvements by the City, and as shown on the approved preliminary plat.

6-7-7 INSPECTION. All improvements shall be inspected to insure compliance with the requirements of this Ordinance. The cost of such inspection shall be borne by the subdivider and shall be the actual cost of the inspection to the City.

6-7-8 MINIMUM IMPROVEMENTS. The improvements set forth below shall be considered the minimum improvements necessary to protect the public health, safety and welfare.

(Code of Iowa, Sec. 364.1)

1. Streets and alleys. All streets and alleys within the platted area which are dedicated for public use shall be brought to the grade approved by the governing body after receiving the report and recommendations of the City Engineer.

2. Roadways. All roadways shall be surfaced with portland cement concrete or with asphaltic concrete over a crushed stone base as the governing body may require.

3. Curb and Gutter. Curb and gutter shall be required on all streets. All curb and gutter shall be constructed to the grade approved by the governing body after receiving the report and recommendations of the City Engineer. Newly constructed curbs and gutters shall comply with the Americans With Disabilities Guidelines (ADAAG).

4. Sidewalks. Sidewalks may be required by the governing body if they are considered necessary for the general welfare and safety of the community. Sidewalks shall be constructed to the grade approved by the governing body after receiving the report and recommendations of the City Engineer.

5. Water lines. Where a public water main is reasonably accessible, the subdivider shall connect with such water main and provide a water connection for each lot with service pipe installed to the property line in accordance with the City Water Department standards, procedures and supervision.

6. Sewers.

a. Where a public sanitary sewer is reasonably accessible, the subdivider shall connect or provide for the connection with such sanitary sewer and shall provide within the subdivision the sanitary sewer system as required to make the sewer accessible to each lot in the subdivision. Sanitary sewers shall be stubbed into each lot. Sewer systems shall be approved by the governing body and the State Department of Health and the construction subject to the supervision of the Superintendent of public utilities.

b. Where sanitary sewers are not available, other facilities, as approved by the governing body and the State Department of Health must be provided for the adequate disposal of sanitary wastes.

c. Adequate provisions shall be made for the disposal of storm waters, subject to the approval of the governing body and to the supervision of the Superintendent of public utilities.

6-7-9 COMPLETION OF IMPROVEMENTS. Before the governing body shall approve the final plat, all of the foregoing improvements shall be constructed and accepted by formal resolution of the governing body. Before passage of said resolution of acceptance, the Superintendent of public works shall report that said improvements meet all City specifications and Ordinances or other City requirements, and the agreements between subdivider and the City.

6-7-10 PERFORMANCE BOND. The completion requirement may be waived in whole or in part if the subdivider will post a performance bond with the governing body guaranteeing that improvements not completed will be constructed within a period of one (1) year from final acceptance of the plat, but final acceptance of the plat will not constitute final acceptance by the City of any improvements to be constructed. Improvements will be accepted only after their construction has been completed, and no public funds will be expended in the subdivision until such improvements have been completed and accepted by the City.

MINIMUM STANDARDS FOR THE DESIGN OF SUBDIVISIONS.

6-7-11 MINIMUM STANDARDS. The following standards shall be considered the minimum standards necessary to protect the public health, safety, and general welfare.

1. Relation to existing streets.

a. The arrangement, character, extent, width, grade and location of all streets shall be considered in their relation to existing and planned streets, to topographic conditions, to public convenience and safety, and in their appropriate relation to the proposed uses of the land to be served by such streets.

b. The arrangement of streets in a subdivision shall either provide for the continuation of appropriate projection of existing principal streets in surrounding areas or conform to a plat for the neighborhood approved by the governing body to meet a particular situation where topographical or other conditions made continuance or conformance to existing streets impracticable.

2. Acreage subdivisions.

a. Where the plat submitted covers only a part of the subdivider's plat, a sketch of the prospective future system of the unsubmitted part shall be furnished and the street system of the part submitted shall be considered in the light of adjustments in connection with the street system of the part not submitted.

b. Where the parcel is subdivided into larger tracts than for building lots such parcels shall be divided so as to allow for the opening of major streets and the ultimate extension of adjacent minor streets.

c. Subdivisions showing unplatted strips or private streets controlling access to public ways will not receive approval.

3. Local streets.

a. Local streets shall be so planned as to discourage through traffic.

b. Cul-de-sac streets are permitted where topography and other conditions justify their use.

Such streets shall not be longer than five hundred (500) feet and shall terminate with a turn-around, having an outside roadway diameter of at least eighty (80) feet and a street property line diameter of at least one hundred (100) feet. The right-of-way width of the straight portion of such streets shall be a minimum of fifty (50) feet. The property line at the intersection of the turn-around and the straight portion of the street shall be rounded at a radius of not less than twenty (20) feet.

4. Frontage streets.

a. Where a subdivision abuts or contains an existing or proposed arterial street, the governing body may require marginal access streets, reverse frontage with screen planting contained in a nonaccess reservation along the rear property line, deep lots with rear service alleys, or such other treatment as may be necessary for adequate protection of residential properties and to afford separation of through and local traffic.

b. Where a subdivision borders on or contains a railroad right-of-way or limited access highway right-of-way, the governing body may require a street approximately parallel to and on each side of such right-of-way, at a distance suitable for the appropriate use of the intervening land, as for park purposes in residential districts. Such distances shall also be determined with due regard for the requirements of approach grades and future grade separations.

5. Half-streets. Half-streets shall be prohibited except where essential to the reasonable development of the subdivision in conformity with the other requirements of these regulations, and where the governing body finds it will be practicable to require the dedication of the other half when the adjoining property is subdivided. Wherever a half-street is adjacent to a tract to be subdivided, the other half of the street shall be platted within such tract.

6. Street Geometrics.

a. Street jogs with centerline offsets of less than one hundred twenty-five (125) feet shall be avoided.

b. A tangent at least one hundred (100) feet long shall be introduced between reverse curves on arterial and collector streets.

c. When connecting street lines deflect from each other at any one point by more than ten (10) degrees, they shall be connected by a curve with a radius adequate to insure a sight distance of not less than two hundred (200) feet for minor and collector streets, and of such greater radii as the governing body shall determine for special cases.

7. Intersections.

a. Insofar as is practical, acute angles between streets at their intersection are to be avoided.

b. Streets shall be laid out so as to intersect as nearly as possible at right angles and no street shall intersect any other street at less than sixty (60) degrees.

c. Property lines at street intersections shall be rounded with a radius of ten (10) feet, or of a greater radius where the governing body may deem it necessary. The governing body may permit comparable cutoffs or chords in place of rounded corners.

8. Street names. Streets that are in alignment with others already existing and named shall bear the name of the existing streets. The proposed names of new streets shall not duplicate or sound similar to existing street names. Street names shall be subject to the approval of the governing body.

9. Street grades.

a. Street grades, wherever feasible, shall not exceed five (5) percent, with due allowance for reasonable vertical curves.

b. No street grade shall be less than one-half (1/2) of one (1) percent.

10. Alleys.

a. Alleys shall be provided in commercial and industrial districts, except that the governing body may waive this requirement where other definite and assured provision is made for service access, such as off-street loading, unloading and parking consistent with and adequate for the uses proposed.

b. The width of an alley shall be twenty (20) feet.

c. Alley intersections and sharp changes in alignment shall be avoided, but where necessary, corners shall be cut off sufficiently to permit safe vehicular movements.

d. Dead-end alleys shall be avoided where possible, but if unavoidable, shall be provided with adequate turn-around facilities at the dead-end, as determined by the governing body.

11. Blocks.

a. No block may be more than one thousand three hundred twenty (1,320) feet or less than five hundred (500) feet in length between the center lines of intersecting streets, except where, in the opinion of the governing body, extraordinary conditions unquestionably justify a departure from these limits.

b. In blocks over seven hundred (700) feet in length, the governing body may require at or near the middle of the block a public way or easement of not less than ten (10) feet in width for use by pedestrians and/or as an easement for public utilities.

12. Lots.

a. The lot size, width, depth, shape and orientation shall be appropriate for the location of the subdivision and for the type of development and use contemplated.

b. Minimum lot dimensions and sizes.

(1) Residential lots where not served by public sewer shall not be less than eighty (80) feet wide nor less than ten thousand (10,000) square feet in area.

(2) Depth and width of properties reserved or laid out for commercial and industrial purposes shall be adequate to provide for the off-street service and parking facilities required by the type of use and development contemplated.

(3) Corner lots for residential use shall have an extra ten (10) feet of width to permit appropriate building setback from and orientation to both streets.

c. The subdividing of the land shall be such as to provide, by means of public street, each lot with satisfactory access to an existing public street.

d. Double frontage and reverse frontage lots shall be avoided except where essential to provide separation of residential development from traffic arteries or to overcome specific disadvantages of topography and orientation. A planting screen easement of at least ten (10) feet and across which there shall be no right of access, shall be provided along the line of lots abutting such a traffic artery or other disadvantageous use.

e. Side lot lines shall be substantially at right angles to straight street lines or radial to curved street lines.

13. Building lines. Building lines shall be shown on all lots within the platted area. The governing body may require building lines in accordance with the needs of each subdivision.

14. Easements.

a. Easement across lots or centered on rear or side lot lines shall be provided for utilities where necessary and shall be at least ten (10) feet wide.

b. Where a subdivision is traversed by a watercourse, drainage way, channel or stream, there shall be provided a storm water easement or drainage right-of-way conforming substantially with the lines of such watercourse, and further width for construction, or both, as will be adequate for the purpose.

15. Plat markers. Markers shall be placed at all block corners, angle points, points of curves in streets, and all such intermediate points as shall be required by the governing body. The markers

shall be of such material, size and length as may be approved by the governing body.

PROCEDURES AND SUBMISSION REQUIREMENTS FOR PLATS

6-7-12 PROCEDURES AND SUBMISSION REQUIREMENTS FOR PLATS. In obtaining final approval of a proposed subdivision by the governing body, the subdivider and owner shall submit a plat in accordance with the requirements hereafter set forth and install improvements or provide a performance bond.

6-7-13 PRE-APPLICATION CONFERENCE. Whenever a subdivision located within the platting jurisdiction of the City is proposed, the owner and subdivider shall schedule a preapplication conference with the City Clerk. The conference should be attended by the City Clerk and such other City or utility representatives as is deemed desirable; and by the owner and said owner's engineer and/or planner, as deemed desirable.

The purpose of such conference shall be to acquaint the City with the proposed subdivision, and to acquaint the subdivider with the requirements, procedures, and any special problems relating to the proposed subdivision.

6-7-14 SKETCH PLAN REQUIRED. For the pre-application conference, the subdivider shall provide a map or sketch showing the location of the subdivision, the general location of any proposed streets and other improvements, and the general layout and arrangement of intended land uses, in relation to the surrounding area.

6-7-15 PRESENTATION TO PLANNING COMMISSION OR CITY COUNCIL. The subdivider may present the sketch plan to the governing body for review, prior to incurring significant costs preparing the preliminary or final plat.

6-7-16 SUBDIVISION CLASSIFIED. Any proposed subdivision or resubdivision shall be classified as minor subdivision or a major subdivision.

1. Minor Subdivision. Means any subdivision that contains not more than four (4) lots fronting on an existing street and that does not require construction of any public improvements, and that does not adversely affect the remainder of the parcel shall be classified as a minor plat.

2. Major Subdivision. Any subdivision that, in the opinion of the governing body, does not for any reason meet the definition of a minor subdivision, shall be classified as a major subdivision.

6-7-17 PLATS REQUIRED. In order to secure approval of a proposed subdivision, the owner and subdivider of any major subdivision shall comply with the requirements for a preliminary plat and the requirements for a final plat. The owner and subdivider of a minor subdivision or an auditor's plat may elect to omit the submission of a preliminary plat.

(Code of Iowa, Sec. 354.6)

6-7-18 REQUIREMENTS OF PRELIMINARY PLAT. The subdivider shall prepare and file with the City Clerk four (4) copies of a preliminary plat of adequate scale and size showing the following:

1. Title, scale, north point and date.
2. Subdivision boundary lines, showing dimensions, bearing angles, and references to section, townships and range lines or corners.
3. Present and proposed streets, alleys and sidewalks, with their right-of-way, in or adjoining the subdivision, including dedicated widths, approximate gradients, types and widths of surfaces, curbs, and planting strips, and location of street lights.
4. Proposed layout of lots, showing numbers, dimensions, radii, chords and the square foot areas of lots that are not rectangular.
5. Building setback or front yard lines.
6. Parcels of land proposed to be dedicated or reserved for schools, parks, playgrounds, or other public, semi-public or community purposes.
7. Present and proposed easements, showing locations, widths, purposes and limitation.
8. Present and proposed utility systems, including sanitary and storm sewers, other drainage facilities, water lines, gas mains, electric utilities, and other facilities, with the size, capacity, invert elevation and location of each.
9. Proposed name of the subdivision which shall not duplicate or resemble existing subdivision names in the county.
10. Names and addresses of the owner, subdivider, builder, and engineer, surveyor or architect who prepared the preliminary plat, and the engineer, surveyor or architect who will prepare the final plat.
11. Existing and proposed zoning of the proposed subdivision and adjoining property.
12. A general summary description of any protective covenants or private restrictions to be incorporated in the final plat.
13. Contours at vertical intervals of not more than two (2) feet if the general slope of the site is less than ten (10) percent and at vertical intervals of not more than five (5) feet if the general slope is ten (10) percent or greater, unless the City Council waives this requirement.

6-7-19 REFERRAL OF PRELIMINARY PLAT. The City Clerk shall forthwith refer two (2) copies of the preliminary plat to the City Engineer and (2) copies to the governing body.

6-7-20 ACTION BY THE CITY ENGINEER. The City Engineer shall carefully examine said preliminary plat as to its compliance with Section 354.8 of the Code of Iowa and the laws and regulations of the City of Charlotte, Iowa, the existing street system, and good engineering practices, and shall, as soon as possible, submit the City engineer's findings in duplicate to the governing body together with one (1) copy of the plat received.

(Code of Iowa, Sec. 354.8)

6-7-21 ACTION BY THE GOVERNING BODY. The governing body shall, upon receiving the report of the City Engineer, as soon as possible, but not more than thirty (30) days thereafter, consider said report, negotiate with the subdivider on changes deemed advisable and the kind and extent of improvements to be made by the subdivider, and pass upon the preliminary plat as originally submitted or modified. If the governing body does not act within thirty (30) days, the preliminary plat shall be deemed to be approved, provided, however, that the subdivider may agree to an extension of the time for a period not to exceed an additional sixty (60) days. It shall then set forth its recommendations in writing, whether of approval, modification or disapproval.

1. In the event that substantial changes or modifications are made by the governing body or disapproval of the plat, it shall give its reasons therefor and it may request and cause the revised preliminary plat to be resubmitted in the same manner as the original plat.

2. If approved, the governing body shall express its approval as "Conditional Approval" and state the conditions of such approval, if any.

3. The action of the governing body shall be noted on two (2) copies of the preliminary plat, referenced and attached to any conditions determined. One (1) copy shall be returned to the subdivider and the other copy retained by the governing body.

4. The "Conditional Approval" by the governing body shall not constitute final acceptance of the addition or subdivision by the City but an authorization to proceed with preparation of the final plat.

6-7-22 FINAL PLAT. The final plat shall conform substantially to the preliminary plat as approved, and, if desired by the subdivider, it may constitute only that portion of the approved preliminary plat which the subdivider proposes to record and develop at the time, provided, however, that such portion conforms to all requirements of these regulations.

6-7-23 REFERRAL FINAL PLAT. The subdivider shall, within twelve (12) months of the "Conditional Approval" of the preliminary plat by the governing body prepare and file four (4) copies of the final plat and other required documents with the City Clerk as hereafter set forth, and upon the subdivider's failure to do so within the time specified, the "Conditional Approval" of the preliminary plat shall be null and void unless an extension of times is applied for and granted by the governing body. Upon receipt of the final plat and other required documents, the City Clerk shall transmit two (2) copies of the final plat to the governing body for its recommendations and approval.

Except for a final plat for a minor subdivision or an auditor's plat as set forth herein, no final plat shall be considered by the governing body until and unless a preliminary plat for the area included in the proposed final plat has been approved and has not expired and become void as set forth above.

At its discretion the governing body may refer the final plat to the City Engineer pursuant to the procedure established in 6-7-18.

6-7-24 REQUIREMENTS OF THE FINAL PLAT. The final plat shall conform to the requirements of chapter 355, Code of Iowa, and shall be clearly and legibly drawn to a scale of not more than one hundred (100) feet to one (1) inch with permanent ink on a reproducible tracing material. It shall show:

(Code of Iowa, Sec. 354.8 and 355.8)

1. The title under which the subdivision is to be recorded.
2. The linear dimensions in feet and decimals of a foot of the subdivision boundary, lot lines, streets and alleys. These should be exact and complete to include all distances, radii, arc, chords, points of tangency and central angles.
3. Street names and clear designations of public alleys. Streets that are continuations of present streets should bear the same name. If new names are needed, they should be distinctive. Street names may be required to conform to the City Plan.

6-7-25 FINAL PLAT ATTACHMENTS. The final plat shall have the following attached to it:

1. A correct description of the subdivision land.
2. A certificate by the owner and the owner's spouse, if any, that the subdivision is with the free consent, and is in accordance with the desire of the owner and spouse. This certificate must be signed and acknowledged by the owner and spouse before some officer authorized to take the acknowledgements of deeds.

(Code of Iowa, Sec. 354.11(1))

3. A complete abstract of title and an Attorney's opinion showing that the fee title to the subdivision land is in the owner's name and that the land is free from encumbrances other than those secured by an encumbrance bond.

(Code of Iowa, Sec. 354.11(2))

4. A certificate from the County Treasurer that the subdivision land is free from taxes.

5. A certificate from the Clerk of District Court that the subdivision land is free from all judgments, attachments, mechanics or other liens of record in the Clerk's office.

6. A certificate from the County Recorder that the title in fee is in the owner's name and that it is free from encumbrances other than those secured by an encumbrance bond.

(Code of Iowa, Sec. 354.11(2))

7. A certificate of dedication of streets and other public property.

(Code of Iowa, Sec. 354.11(1))

8. A statement of restrictions of all types that run with the land and become covenants in the deeds of lots.

9. Resolution and certificate for approval by the governing body and for signatures of the Mayor and Clerk.

(Code of Iowa, Sec. 354.11(4))

10. Profiles, typical cross sections, and specifications of street improvements and utility systems, to show the location, size and grade. These should be shown on a fifty (50) foot horizontal scale and a five (5) foot vertical scale with west or south at the left.

11. A certificate by the City Clerk or similar official that all required improvements and installations have been completed, or that a performance bond guaranteeing completion has been approved by the City Attorney and filed with the City Clerk, or that the governing body has agreed that the City will provide the necessary improvements and installations and assess the costs against the subdivider or future property owners in the subdivision.

12. The encumbrance bond, if any, as specified in Sections 354.11 and 354.12, Code of Iowa.

(Code of Iowa, Sec. 354.11(2) and 354.12)

6-7-26 ACTION BY THE GOVERNING BODY. Upon receipt of the plat, but not more than sixty (60) days following submission of the final plat to the Clerk as stated in 6-7-23 the governing body shall either approve or disapprove the final plat.

(Code of Iowa, Sec. 354.8)

1. In the event that said plat is disapproved by the Governing Body, such disapproval shall be expressed in writing and shall point out wherein said proposed plat is objectionable.

2. In the event that said plat is found to be acceptable and in accordance with this Ordinance, the governing body shall accept the same.

3. The passage of a resolution by the governing body accepting the plat shall constitute final approval of the platting of the area shown on the final plat, but the subdivider or owner shall cause such plat to be recorded in the office of the County Recorder of Clinton, County, Iowa, and shall file satisfactory evidence of such recording before the City shall recognize the plat as being in full force and effect.

OTHER PROVISIONS

6-7-27 VARIANCES. Where in the case of a particular proposed subdivision, it can be shown that strict compliance with the requirement of this Ordinance would result in extraordinary hardship to the subdivider, because of unusual topography or other conditions, the governing body may vary, modify or waive the requirements so that substantial justice may be done and the public interest secure. Provided, however, that such variance, modification or waiver will not have the effect of nullifying the intent and purpose of this Ordinance. Such variances and waivers may be granted only by the affirmative vote of three-fourths (3/4) of the members of the Governing Body.

6-7-28 CHAIN SUBDIVIDING. No more than two building permits for each separate tract existing at the effective date of this Ordinance shall be issued unless the tract has been platted in accordance with this Ordinance; except that this provision shall not limit the number of building permits that may be issued for accessory buildings as defined by the (choose one)-(zoning or restricted residence district) Ordinance or additions or improvements to a main or accessory building already legally located upon said tract.

(Optional provision based on section 6-7-3 and 6-7-4).

6-7-29 EXTRATERRITORIAL REVIEW AGREEMENT.

The City of Charlotte shall apply the same standards and conditions for review and approval of a subdivision in the extraterritorial review area as established in Section 6-7-3 of the City of Charlotte Municipal Code.

6-8-2 **DEFINITIONS.** As used in this chapter, the following terms have these meanings:

1. **Defective Sidewalk.** Any public sidewalk exhibiting one or more of the following characteristics:

- a. vertical separations equal to three-fourths (3/4) inch or more.
- b. horizontal separations equal to three-fourths (3/4) inch or more.
- c. holes or depressions equal to three-fourths (3/4) inch or more and at least four (4) inches in diameter.
- d. spalling over fifty (50) percent of the surface of a single square of the sidewalk with one or more depressions equal to one-half (1/2) inch or more.
- e. spalling over less than fifty (50) percent of a single square of the sidewalk with one or more depressions equal to three-fourths (3/4) inch or more.
- f. a single square of sidewalk cracked in such a manner that no part thereof has a piece greater than one square foot.

g. a sidewalk with any part thereof missing to the full depth.

h. a change from design or construction grade equal to or greater than three-fourths (3/4) inch per foot.

2. Sidewalk Improvements. The construction, reconstruction, repair, replacement, or removal of a public sidewalk or the excavating, filling, or depositing of material in the public right-of-way in connection therewith.

3. Owner. The person owning the fee title or the contract purchaser for purposes of notification required herein. For all other purposes, "owner" shall include the lessee, or person in possession.

6-8-3 CLEANING SNOW, ICE, AND ACCUMULATIONS. It shall be the duty of the owner to keep sidewalks abutting the owner's property clear of the natural accumulations of snow or ice. If the owner fails to do so within twenty four (24) hours after deposit of accumulation, the Mayor may have the natural accumulations of snow or ice removed without notice to the property owner. The Mayor shall give the Council an itemized and verified statement of the removal costs and a legal description of the property at the next regular Council meeting. The costs shall be reviewed by the Council, and if found correct, shall be assessed against the property as taxes. The City Clerk shall be directed to certify the costs to the County Treasurer for collection as provided in Section 364.12 of the Code of Iowa.

(Code of Iowa, Sec. 364.12(2b) and (2e))

6-8-4 MAINTENANCE RESPONSIBILITY. The abutting property owner or owners shall be responsible for the repair, replacement or reconstruction of all broken or defective sidewalks to a safe condition and to maintain in a safe condition all sidewalks in the abutting street right-of-way.

(Code of Iowa, Sec. 364.12(2c))

6-8-5 LIABILITY OF ABUTTING OWNER. As provided in Section 364.14, Code of Iowa, in the event the owner of property abutting any public sidewalk fails or refuses to perform any act required of them by this Ordinance and in the event an action is brought against the City for personal injuries alleged to have been caused by a defect in or the condition of said sidewalk, the City may notify in writing the said abutting owner that it claims the injury was caused by their negligence and/or their failure to repair the defect or eliminate the condition complained of. The notice shall state the pendency of the action, the name of the plaintiff, the name and location of the court where the action is pending, a brief statement of the alleged facts from which the cause arose, that the City believes that the person notified is liable to it for any judgment rendered against the City, and asking the person to appear and defend. A judgment obtained in the suit is conclusive in any action by the City against any person so notified, as to the existence of the defect or condition or other cause of the injury or damage, as to the liability of the City to the plaintiff in the first named action, and as to the amount of the damage or injury. The City may maintain an action against the person notified to recover the amount of the judgment together with all the expenses incurred by the City in the suit.

(Code of Iowa, Sec. 364.14)

6-8-6 ORDERING SIDEWALK IMPROVEMENTS. The City Council may order the construction, reconstruction, repair, or replacement of permanent sidewalks upon any street or court. Notice of this order shall be sent to the owner by certified mail. The notice shall include the fact that the owner may request a hearing by the Council within fifteen (15) days or receipt of the notice.

6-8-7 REPAIRING DEFECTIVE SIDEWALKS. It shall be the duty of the abutting property owner at any time, or upon receipt of thirty (30) days' notice from the City, to repair, replace, or reconstruct all broken or defective sidewalks in the abutting street right-of-way. If, after the expiration of the thirty (30) days as provided in the notice, the required work has not been done or is not in the process of completion, the Mayor shall order the work to proceed to repair, replace, or reconstruct the sidewalk. Upon completion of the work, the Mayor shall submit to the Council an itemized and verified statement of expenditures for material and labor, and the legal description of the property abutting the sidewalk on which work has been performed. These costs shall be assessed to the property as taxes. The City Clerk shall be directed to certify the costs to the County Treasurer for collection as provided in Section 364.12 of the Code of Iowa.

(Code of Iowa, Sec. 364.12(e))

6-8-8 NOTICE OF INABILITY TO REPAIR OR BARRICADE. It shall be the duty of the owner of the property abutting the sidewalk, or of the contractor or agent of the owner, to notify the City immediately in the event the owner is unable to make necessary sidewalk improvements or to install or erect warnings and barricades as required by this chapter.

6-8-9 STANDARD SIDEWALK SPECIFICATIONS. Sidewalks constructed, repaired, or replaced under the provisions of this chapter shall be of the following construction and meet the following standards:

1. Portland cement concrete shall be the only material used in the construction and repair of sidewalks unless otherwise authorized by the City Council.
2. Sidewalks shall be on one-course construction.
3. Concrete may be placed directly on compact and well-drained soil. Where soil is not well drained, a four (4) inch sub-base of compact, clean, coarse gravel, sand, or cinders shall be laid. The adequacy of the soil drainage is to be determined by the Superintendent of Public Works.
4. The sidewalk bed shall be graded to the established grade.
5. Residential sidewalks shall be at least four (4) feet wide, or match existing sidewalks, and four (4) inches thick, and each section shall be no more than four (4) feet in length. In the central business district, sidewalks shall extend from the property line to the curb unless the Council shall establish a different distance due to the circumstances. Each curb cut or ramp shall be at least thirty (30) inches wide, shall be sloped at not greater than one inch of rise per twelve (12) inches lineal distance, except that a slope no greater than one inch of rise per eight (8) inches lineal distance may be used where necessary, shall have a nonskid surface, and shall otherwise be so constructed as to allow reasonable access to the crosswalk for physically disabled persons using the sidewalk.

(Code of Iowa, Sec. 216C.9)

11. All sidewalk improvements on public property, whether performed by the owner of the abutting property or by the City, shall be performed under the supervision and inspection of the City Superintendent of Public Works, and in accordance with the standard sidewalk specifications set forth in this chapter.

6-8-10 PERMITS FOR CONSTRUCTION OR REMOVAL. No person shall make any sidewalk improvements unless such person shall obtain a permit from the City Clerk. The permit shall state when the work is to be commenced and when the work is to be completed. The time of completion for the sidewalk improvements may be extended by the City Council. All permits for sidewalk improvements not ordered by resolution of the City Council shall be issued in compliance with this chapter. The City Council may withhold the issuance of any permit for any sidewalk improvements for a sufficient period to determine the necessity for the proposed improvements or when weather conditions will adversely affect the sidewalk improvements.

6-8-11 FAILURE TO OBTAIN PERMIT; REMEDIES. Whenever any sidewalk improvements

are made that do not conform to the provisions of this chapter and with the specifications, or when any sidewalk improvements are made without a permit, the Mayor shall serve notice to obtain a permit upon the property owner and upon the contractor doing the work. If the sidewalk is in the course of construction, the notice shall order the work to stop until a permit is obtained and the work is corrected to comply with the specifications. If the sidewalk work has been completed, the owner shall obtain a permit immediately and perform any needed corrections within five (5) days from receipt of the permit. If the owner fails to comply with this notice, the Mayor shall have the work completed and the costs assessed to the property owner as provided in this chapter.

6-8-12 INSPECTION AND APPROVAL. Upon final completion, the Superintendent of Public Works shall inspect the work and may order corrections if the work does not meet specifications. When the work does meet all requirements of this chapter, the specifications, and the permit, the Superintendent of Public Works shall indicate this on both copies of the permit.

6-8-13 BARRICADES AND WARNING LIGHTS. Proper warning lights and barricades shall be placed to protect persons from materials, equipment, and dangerous conditions. Placement and maintenance of adequate warnings is the responsibility of the constructor, the owner, and the lessee of the property.

6-8-14 INTERFERENCE WITH SIDEWALK IMPROVEMENTS. No person shall knowingly or willfully drive any vehicle upon any portion of any sidewalk or approach thereto while it is in the process of being improved, or upon any portion of any completed sidewalk or approach thereto, or shall remove or destroy any part or all of any sidewalk or approach thereto, or shall remove, destroy, mar, or deface any sidewalk at any time or destroy, mar, remove, or deface any notice or warning device provided by this chapter.

6-8-15 SPECIAL ASSESSMENTS FOR CONSTRUCTION AND REPAIR. The City Council may assess the cost of initial construction, improvements, and/or repair of sidewalks in the City according to the special assessment procedures established in Chapter 384, division IV, Code of Iowa.

(Code of Iowa, Sec. 384.38)

6-8-16 NOTICE OF ASSESSMENT FOR REPAIR OR CLEANING COSTS. When the Mayor submits a bill for sidewalk improvements or for removal of accumulations as provided in this chapter, the City Clerk shall send a notice of such facts to the owner of the abutting property. The notice may be given either by personal service or by certified mail to the last known address of the owner. The notice shall contain a statement of the work performed, the cost of the work that is being assessed, a description of the property affected, and the fact that the person may pay the amount assessed within thirty (30) days without interest or penalty. The notice also shall indicate that the person may object to such assessment and given the place and time at which Council will hear such objections. The time set for hearing shall be at least fifteen (15) days after the service or mailing of the notice.

(Code of Iowa, Sec. 384.50)

6-8-17 HEARING AND ASSESSMENT. At the time and place designed in the Notice, the Council shall consider all objections to the assessment, correct all errors or omissions, and adopt a corrected list as the amounts to be assessed against the property.

(Code of Iowa, Sec. 384.51)

6-8-18 BILLING AND CERTIFYING TO COUNTY. Thirty (30) days after the Council's decision, the City Clerk shall certify any unpaid amounts to the County Treasurer. The unpaid assessments shall constitute a lien against the property and shall be collected by the County Treasurer in the same manner as other taxes. Any assessment that exceeds \$100 may be paid in installments as set by Council, not exceeding ten, in the same manner and at the same interest rates as for special assessments under Chapter 384, division IV, Code of Iowa. No interest shall be charged for assessments, or parts thereof, paid within thirty (30) days of the time the Council determined the final amounts.

6-12-1 STATUTORY AUTHORITY, FINDINGS OF FACT AND PURPOSE.

1. The Legislature of the State of Iowa has in Chapter 364, Code of Iowa, as amended, delegated the power to cities to exercise any power and perform any function it deems appropriate to protect and preserve the rights, privileges and property of the city or of its residents, and to preserve and improve the peace, safety, health, welfare, comfort and convenience of its residents.

2. Findings of Fact.

a. The flood hazard areas of Charlotte, Iowa are subject to periodic inundation which can result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base all of which adversely affect the public health, safety and general welfare of the community.

b. These flood losses, hazards, and related adverse effects are caused by: (i) The occupancy of flood hazard areas by uses vulnerable to flood damages which create hazardous conditions as a result of being inadequately elevated or otherwise protected from flooding and (ii) the cumulative effect of obstructions on the flood plain causing increases in flood heights and velocities.

3. Statement of Purpose. It is the purpose of this Ordinance to protect and preserve the rights, privileges and property of Charlotte, Iowa and its residents and to preserve and improve the peace, safety, health, welfare, and comfort and convenience of its residents by minimizing those flood losses described in Section 6-11(2)(a) of this Ordinance with provisions designed to:

a. Restrict or prohibit uses which are dangerous to health, safety or property in times of flood or which cause excessive increases in flood heights or velocities.

b. Require that uses vulnerable to floods, including public facilities which serve such uses, be protected against flood damage at the time of initial construction or substantial improvement.

c. Protect individuals from buying lands which may not be suited for intended purposes

because of flood hazard.

d. Assure that eligibility is maintained for property owners in the community to purchase flood insurance through the National Flood Insurance Program.

6-12-2 GENERAL PROVISIONS.

1. Lands to Which Ordinance Apply. The provisions of this ordinance shall apply to all areas having special flood hazards within the jurisdiction of the City of Charlotte. For the purpose of this ordinance, the special flood hazard areas are those areas designated as Zone A on the Flood Insurance Rate Map for Clinton County, City of Charlotte, Panel 190087CO300D dated July 18, 2011 which is hereby adopted and made a part of this ordinance.

(Ord. 2011-06, passed March 1, 2011)

2. Rules for Interpretation of Flood Hazard Boundaries. The boundaries of the Special Flood Hazard areas shall be determined by scaling distances on the official Flood Insurance Rate Map. When an interpretation is needed as to the exact location of a boundary, the City Clerk shall make the necessary interpretation. The City Council shall hear and decide appeals when it is alleged that there is an error in any requirement, decision, or determination made by the City Clerk in the enforcement or administration of this Ordinance.

(Ord. 2011-06, passed March 1, 2011)

3. Compliance. No structure or land shall hereafter be used and no structure shall be located, extended, converted or structurally altered without full compliance with the terms of this Ordinance and other applicable regulations which apply to uses within the jurisdiction of this Ordinance.

4. Abrogation and Greater Restrictions. It is not intended by this Ordinance to repeal, abrogate or impair any existing easements, covenants, or deed restrictions. However, where this Ordinance imposes greater restrictions, the provision of this Ordinance shall prevail. All other ordinances inconsistent with this Ordinance are hereby repealed to the extent of the inconsistency only.

5. Interpretation. In their interpretation and application, the provisions of this Ordinance shall be held to be minimum requirements and shall be liberally construed in favor of the governing body and shall not be deemed a limitation or repeal of any other powers granted by State statutes.

6. Warning and Disclaimer of Liability. The standards required by this Ordinance are considered reasonable for regulatory purposes. This Ordinance does not imply that areas outside the designated areas of significant flood hazard will be free from flooding or flood damages. This Ordinance shall not create liability on the part of Charlotte, Iowa or any officer or employee thereof for any flood damages that from reliance on this Ordinance or any administrative decision lawfully made thereunder.

7. Severability. If any section, clause, provision or portion of this Ordinance is adjudged

unconstitutional or invalid by a court of competent jurisdiction, the remainder of this Ordinance shall not be affected thereby.

6-12-3 FLOOD PLAIN MANAGEMENT STANDARDS. All uses must be consistent with the need to minimize flood damage and Meet the following applicable performance standards. Where 100-year flood data has not been provided on the Flood Insurance Rate Map, the Iowa Department of Natural Resources shall be contacted to determine (i) whether the land involved is either wholly or partly within the flood way or flood way fringe and (ii) the 100-year flood level. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determination

(Ord. 2011-06, passed March 1, 2011)

1. All development within the areas of significant flood hazard shall:
 - a. Be consistent with the need to minimize flood damage.
 - b. Use construction methods and practices that will minimize flood damage.
 - c. Use construction materials and utility equipment that are resistant to flood damage.
 - d. Obtain all other necessary permits from federal, state and local governmental agencies including approval when required from the Iowa Department of Natural Resources.
2. Residential buildings. All new or substantially improved residential structures shall have the lowest floor, including basement, elevated a minimum of one (1) foot above the 100-year flood level. Construction shall be upon compacted fill which shall, at all points, be no lower than 1.0 ft. above the 100-year flood level and extend at such elevation at least 18 feet beyond the limits of any structure erected thereon. Alternate methods of elevating (such as piers) may be allowed subject to favorable consideration by the City Council, where existing topography, street grades, or other factors preclude elevating by fill. In such cases, the methods used must be adequate to support the structure as well as withstand the various forces and hazards associated with flooding. All new residential structures shall be provided with a means of access which will be passable by wheeled vehicles during the 100-year flood.
3. Non-residential buildings - All new or substantially improved non-residential buildings shall have the lowest floor (including basement) elevated a minimum of one (1) foot above the 100-year flood level, or together with attendant utility and sanitary systems, be floodproofed to such a level. When floodproofing is utilized, a professional engineer registered in the State of Iowa shall certify that the floodproofing, methods used are adequate to withstand the flood depths, pressures, velocities, impact and uplift forces and other factors associated with 100-year flood level; and the structure, below the 100-year flood level is watertight with walls substantially impermeable to the passage of water. A record of the certification indicating the specific elevation (in relation to North American Vertical Datum) to which any structure are floodproofed shall be maintained by the administrator.

(Ord. 2011-06, passed March 1, 2011)

4. All new and substantially improved structures:

a. Fully enclosed areas below the "lowest floor" (not including basements) that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or meet or exceed the following minimum criteria:

(1) A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided.

(2) The bottom of all openings shall be no higher than one foot above grade.

(3) Openings may be equipped with screens, louvers, valves, or other coverings or devices provided they permit the automatic entry and exit of floodwaters.

Such areas shall be used solely for parking of vehicles, building access and low damage potential storage.

b. New and substantially improved structures must be designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy.

c. New and substantially improved structures must be constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.

5. Factory-built homes:

a. All factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be elevated on a permanent foundation such that the lowest floor of the structure is a minimum of one (1) foot above the 100-year flood level.

b. All factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be anchored to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors.

6. Utility and Sanitary Systems:

a. On-site waste disposal and water supply systems shall be located or designed to avoid impairment to the system or contamination from the system during flooding.

b. All new and replacement sanitary sewage systems shall be designed to minimize and eliminate infiltration of flood waters into the system as well as the discharge of effluent into flood

waters. Wastewater treatment facilities (other than on-site systems) shall be provided with a level of flood protection equal to or greater than one (1) foot above the 100-year flood elevation.

c. New or replacement water supply systems shall be designed to minimize or eliminate infiltration of floodwaters into the system. Water supply treatment facilities (other than on-site systems) shall be provided with a level of protection equal to or greater than one (1) foot above the 100-year flood elevation.

d. Utilities such as gas or electrical systems shall be located and constructed to minimize or eliminate flood damage to the system and the risk associated with such flood damaged or impaired systems.

7. Storage of materials and equipment that are flammable, explosive or injurious to human, animal or plant life is prohibited unless elevated a minimum of one (1) foot above the 100-year flood level. Other material and equipment must either be similarly elevated or (i) not be subject to major flood damage and be anchored to prevent movement due to flood waters or (ii) be readily removable from the area within the time available after flood warning.

8. Flood control structural works such as levees, flood walls, etc. shall provide, at a minimum, protection from a 100-year flood with a minimum of 3 ft. of design freeboard and shall provide for adequate interior drainage. In addition, structural flood control works shall be approved by the Department of Natural Resources.

9. Watercourse alterations or relocations must be designed to maintain the flood within the altered or relocated portion.

10. Subdivisions (including factory-built home parks and subdivisions) shall be consistent with the need to minimize flood damages and shall have adequate drainage provided to reduce exposure to flood damage. Development associated with subdivision proposals (including the installation of public utilities) shall meet the applicable performance standards of this Ordinance. Subdivision proposals intended for residential use shall provide all lots with a means of access which will be passable by wheeled vehicles during the 100-year flood. Proposals for subdivisions greater than five (5) acres or fifty (50) lots (whichever is less) shall include 100-year flood elevation data for those areas located within the area of significant flood hazard.

- (1) The structure shall not be used for human habitation.
- (2) The structure shall be designed to have low flood damage potential.

(3) The structure shall be constructed and placed on the building site so as to offer minimum resistance to the flow of floodwaters.

(4) The structure shall be firmly anchored to prevent flotation which may result in damage to other structures.

(5) The structure's service facilities such as electrical and heating equipment shall be elevated or floodproofed to at least one foot above the 100-year flood level.

b. Exemption from the 100-year flood elevation requirements for such a structure may result in increased premium rates for flood insurance coverage of the structure and its contents.

12. Recreational Vehicles

a. Recreational vehicles are exempt from the requirements of 6-11-3(1)(e) of this Ordinance regarding anchoring and elevation of factory-built homes when the following criteria are satisfied.

(1) The recreational vehicle shall be located on the site for less than 180 consecutive days, and,

(2) The recreational vehicle must be fully licensed and ready for highway use. A recreational vehicle is ready for highway use if it is on its wheels or jacking system and is attached to the site only by quick disconnect type utilities and security devices and has no permanently attached additions.

b. Recreational vehicles that are located on the site for more than 180 consecutive days and are not ready for highway use must satisfy requirements of Section 6-11-3(5)(a) of this Ordinance regarding anchoring and elevation of factory-built homes.

13. Pipeline river and stream crossings shall be buried in the streambed and banks, or otherwise sufficiently protected to prevent rupture due to channel degradation and meandering.

(7) Such other information as the Administrator deems reasonably necessary (e.g., drawings or a site plan) for the purpose of this Ordinance.

c. Action on Permit Application - The Administrator shall, within a reasonable time, make a determination as to whether the proposed flood plain development meets the applicable standards of this Ordinance and shall approve or disapprove the application. For disapprovals, the applicant shall be informed, in writing, of the specific reasons therefor. The Administrator shall not issue permits for variances except as directed by the City Council.

d. Construction and Use to be as Provided in Application and Plans - Flood Plain Development Permits based on the basis of approved plans and applications authorize only the use, arrangement, and construction set forth in such approved plans and applications and no other use, arrangement or construction. Any use, arrangement, or construction at variance with that authorized shall be deemed a violation of this Ordinance. The applicant shall be required to submit certification by a professional engineer or land surveyor, as appropriate, registered in the State of Iowa, that the finished fill, building floor elevations, floodproofing, or other flood protection measures were accomplished in compliance with the provisions of this Ordinance, prior to the use or occupancy of any structure.

3. Variance.

a. The City Council may authorize upon request in specific cases such variances from the terms of this Ordinance that will not be contrary to the public interest where, owing to special conditions, a literal enforcement of the provisions of this Ordinance will result in unnecessary hardship. Variances granted must meet the following applicable standards.

(1) Variances shall only be granted upon:

i. a showing of good and sufficient cause,

ii. a determination that failure to grant the variance would result in exceptional hardship to the applicant, and

iii. a determination that the granting of the variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public or conflict with existing local codes or ordinances.

(2) Variances shall not be issued within any designated floodway if any increase in flood levels during the 100-year flood would result. Consideration of the effects of any development on flood levels shall be based upon the assumption that an equal degree of development would be allowed for similarly situated lands.

(3) Variances shall only be granted upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.

(4) In cases where the variance involves a lower level of flood protection for buildings than what is ordinarily required by this Ordinance, the applicant shall be notified in writing over the signature of the Administrator that: (i) the issuance of a variance will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage and (ii) such construction increases risks to life and property.

(5) Variances shall only be granted upon the approval of the Department of Natural Resources.

b. Factors Upon Which the Decision of the Council Shall be Based - In passing upon applications for Variances, the Council shall consider all relevant factors specified in other sections of this Ordinance and:

(1) The danger to life and property due to increased flood heights or velocities caused by encroachments.

(2) The danger that materials may be swept on to other land or downstream to the injury of others.

(3) The proposed water supply and sanitation systems and the ability of these systems to prevent disease, contamination and unsanitary conditions.

(4) The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner.

(5) The importance of the services provided by the proposed facility to the City.

(6) The requirements of the facility for a flood plain location.

(7) The availability of alternative locations not subject to flooding for the proposed use.

(8) The compatibility of the proposed use with existing development and development

anticipated in the foreseeable future.

(9) The relationship of the proposed use to the comprehensive plan and flood plain management program for the area.

(10) The safety of access to the property in times of flood for ordinary and emergency vehicles.

(11) The expected heights, velocity, duration, rate of rise and sediment transport of the floodwater expected at the site.

(12) The cost of providing governmental services during and after flood conditions, including maintenance and repair of public utilities (sewer, gas, electrical and water systems), facilities, streets and bridges.

(13) Such other factors which are relevant to the purpose of this Ordinance.

c. Conditions Attached to Variances - Upon consideration of the factors listed above, the Council may attach such conditions to the granting of variances as it deems necessary to further the purpose of this Ordinance. Such conditions may include, but not necessarily be limited to:

(1) Modification of waste disposal and water supply facilities.

(2) Limitation of periods of use and operation.

(3) Imposition of operational controls, sureties, and deed restrictions.

(4) Requirements for construction of channel modifications, dikes, levees, and other protective measures, provided such are approved by the Department of Natural Resources and are deemed the only practical alternative to achieving the purpose of this Ordinance.

(5) Floodproofing measures.

6-12-5 NONCONFORMING USES.

1. A structure or the use of a structure or premises which was lawful before the passage or amendment of this Ordinance, but which is not in conformity with the provisions of this Ordinance, may be continued subject to the following conditions:

a. If such use is discontinued for six (6) consecutive months, any future use of the building premises shall conform to this Ordinance.

b. Uses or adjuncts thereof that are or become nuisances shall not be entitled to continue as nonconforming uses.

2. If any nonconforming use or structure is destroyed by any means, including flood, it shall not be reconstructed if the cost is more than fifty (50) percent of the market value of the structure before the damage occurred, unless it is reconstructed in conformity with the provisions of this Ordinance. This limitation does not include the cost of any alteration to comply with existing state or local health, sanitary, building or safety codes or regulations or the cost of any alteration of a structure listed on the National Register of Historic Places, provided that the alteration shall not preclude its continued designation.

6-12-6 AMENDMENTS. The regulations and standards set forth in this Ordinance from time to time be amended, supplemented, changed, or repealed. No amendment, supplement, change, or modification shall be undertaken without prior approval of the Department of Natural Resources.

6-12-7 DEFINITIONS. Unless specifically defined below, words or phrases used in this Ordinance shall be interpreted so as to give them the meaning they have in common usage and to give this Ordinance its most reasonable application.

5. Existing Factory-Built Home Park Or Subdivision. A factory-built home park or subdivision: means a factory-built home park or subdivision for which the construction of facilities for servicing the lots on which the factory-built homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed before the effective date of the flood plain management regulations adopted by the community.

6. Expansion of Existing Factory-Built Park Or Subdivision. The preparation of additional sites by the construction of facilities for servicing the lots on which the factory-built homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads).

7. Factory-Built Home. Any structure, designed for residential use:, which is wholly or in

substantial part, made, fabricated, formed or assembled in manufacturing facilities for installation or assembly and installation, on a building site. For the purpose of this Ordinance factory-built homes include mobile homes, manufactured homes and modular homes and also includes "recreational vehicles" which are placed on a site for greater than 180 consecutive days and not fully licensed for and ready for highway use.

14. Floodproofing. Any combination of structural and nonstructural additions, changes, or adjustments to structures, including utility and sanitary facilities, which will reduce or eliminate flood damage to such structures.

15. Floodway. The channel of a river or stream and those portions of the flood plains adjoining the channel, which are reasonably required to carry and discharge flood waters or flood flows so that confinement of flood flows to the floodway area will not cumulatively increase the water surface elevation of the base flood by more than one (1) foot.

16. Floodway Fringe. Those portions of the flood plain, other than the floodway, which can be filled, levied, or otherwise obstructed without causing substantially higher flood levels or flow velocities.

17. Historic Structure. Any structure that is:

- a. Listed individually in the National Register of Historic Places, maintained by the

Department of Interior, or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing of the National Register;

b. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;

b. The enclosed area is unfinished (not carpeted, drywalled, etc.) and used solely for low damage potential uses such as building access, parking or storage, and

c. Machinery and service facilities (e.g., hot water heater, furnace, electrical service) contained in the enclosed area are located at least one (1) foot above the 100-year flood level, and

d. The enclosed area is not a "basement" as defined in this section.

In cases where the lowest enclosed area satisfies criteria a, b, c, and d above, the lowest floor is the floor of the next highest enclosed area that does not satisfy the criteria above.

19. New Construction. (new buildings, factory-built home parks). Those structures or development for which the start of construction commenced on or after the effective date of the Flood Insurance Rate Map.

20. New Factory-Built Home Park Or Subdivision. A factory-built home park or subdivision for which the construction of facilities for servicing the lots on which the factory-built homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed on or after the effective date of the effective date of flood plain management regulations adopted by the community.

21. One Hundred (100) Year Flood. A flood, the magnitude of which has a one (1) percent chance of being equaled or exceeded in any given year or which, on the average, will be equaled or

exceeded a least once every one hundred (100) years.

24. Start Of Construction. Includes substantial improvement, and means the date the development permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement, or other improvement, was within 180 days of the permit date. The actual start means either the first placement or permanent construction of a structure on a site, such as pouring of a slab or footings, the installation of pile, the construction of columns, or any work beyond the stage of excavation; or the placement of a factory-built home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings such as garages or sheds not occupied as dwelling units or not part of the main structure. For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of the building, whether or not that alteration affects the external dimensions of the building.

25. Structure. Anything constructed or erected on the ground or attached to the ground, including, but not limited to, buildings, factories, sheds, cabins, factor-built homes, storage tanks, and other similar uses.

before the damage occurred. The term does not, however, include any project for improvement of a structure to comply with existing state or local health, sanitary, or safety code specifications which are solely necessary to assure safe conditions for the existing use. The term also does not include any alteration of an "historic structure", provided the alteration will not preclude the structure's designation as an "historic structure".

CHAPTER 13 SNOW REMOVAL FOR STREETS, PRIVATE PROPERTY AND SIDEWALKS

6-13-1	Operations Commence	6-13-5	Removal from Private Property
6-13-2	Duty of Property Owner	6-13-6	Exceptions to Removal Operations
6-13-3	Failure of Owner to Remove	6-13-7	Collection of Assessed Fees
6-13-4	Removal by City, Assessing Costs		

6-13-1 OPERATIONS COMMENCE. Snow removal operations will commence upon the accumulations of two (2) inches or more of snow, or upon any accumulation of ice.

6-13-2 DUTY OF PROPERTY OWNER. It is the responsibility of the abutting property owner to promptly remove snow, ice and accumulations from sidewalks.

6-13-3 FAILURE OF OWNER TO REMOVE. Any owner who shall for a period of forty-eight (48) hours after the cessation of the storm or cause of accumulation, permit snow, ice or accumulations to remain upon the adjoining and abutting sidewalks, is guilty of a misdemeanor.

6-13-4 REMOVAL BY CITY, ASSESSING COSTS. Should snow, ice or accumulations be permitted to remain upon any sidewalk for a period of forty-eight (48) hours after the cessation of the storm or the cause of accumulation the City shall cause a Notice to be hung on the front door of the premises which Notice shall give the person in possession of the premises twenty-four (24) hours to remove the accumulation on the sidewalk. If the sidewalks have not been cleared within twenty-four (24) hours of the posting of the Notice, then the City shall clear the sidewalk and shall salt or sand.

If the person in possession of the premises fails to remove the accumulation within twenty-four (24) hours of the posting of the Notice, and the City is required to remove the accumulations, then an administration fee of fifty dollars (\$50.00) and a material fee to be set by the City Council, shall be assessed against the property owner. The fees assessed shall be collected in accordance with the procedure set forth in section (g).

If the City is required to remove an accumulation at a residence after a second or any subsequent Notice posted on the front door of the premises, then the administrative fee assessed against the premises shall be one hundred dollars (\$100.00) in addition to the material fee. The fees shall be collected in accordance with the procedure set forth in section (g).

No person shall throw, push or place or cause to be thrown, pushed, or placed any ice or snow from private property, sidewalks, or driveways onto the traveled way of streets so as to obstruct gutters, or impede the passage of vehicles upon the street or to create a hazardous condition thereon.

6-13-6 EXCEPTIONS TO REMOVAL OPERATIONS. Unique weather conditions may make it necessary to begin snow removal operations before the accumulations of two (2) inches of snow. For example excessive wind speeds causing blowing and drifting, ice storms, freezing rain and sleet etc. Equipment failures and availability of personnel may interfere with removal operations. When such conditions exist, the removal operations will begin as soon as reasonably possible.

6-13-7 COLLECTION OF ASSESSED FEES. The City Clerk shall mail a statement of the total administrative fee(s) and material fee(s) incurred under section (d) and (e) above to the abutting property owner. If the amount of the administrative fee(s) and material fee(s) shown in the statement has not been paid within 30 days from the date the statement is mailed, the City Clerk shall certify the amount of the unpaid administrative fee(s) and material fee(s) to the County Assessor and they shall then be collected with, and in the same manner as, general property taxes.
