

“I had my routine annual mammogram and received a call a few days later asking for me to return for another exam. After additional tests were completed, I made an appointment with an Oncologist.

I was referred to breast surgeon Dr. John Guarino and was relieved to find such a qualified surgeon locally. I chose Fawcett Memorial Hospital for my surgery and was discharged one day later, having received exceptional care.

I am pleased with my cosmetic results and that I didn't have to travel outside of our community to receive such a high level of care.”

John F. Guarino MD
