

## Dish Machine De-Liming Instructions

1. Drain Dish Machine Tanks
2. Clean Dish Machine—Remove and clean scrap trays, then return into machine.
3. Remove Dish Detergent and Rinse Aid from dispensing Bowls.
4. Refill Dish Machine Tanks with clean water.
5. Add De-limer—Pour .5 to 3 oz. of delimer per gallon of water capacity for the dishmachine into the appropriate tank(s). A one gallon bottle of delimer contains 128 oz. If this is an initial treatment or there is a severe lime problem, increase the amount of delimer being used.
6. Run Dish Machine with delimer for several cycles or at least 5 minutes
7. Drain Dish Machine Tanks
8. Refill Tanks with clean water and run at least 2 cycles
9. Drain Dish Machine Tanks
10. Replace Dish Detergent and Rinse Aid to their **correct** dispensing bowls. Detergent goes into red bowl, rinse into blue bowl.
