When glaze meets 1200℃ high temperature, the magic Random chemical reaction brings unique pattern for each chip. Therefore, no one owns the same pool as others, because the mosaics are unique selections of nature.

当釉质遇上1200摄氏度的高温，奇迹发生了。高温化学反应在高温下是每颗马赛克都呈现出独一无二的图案，没有人的泳池和别人一模一样，因为每一颗马赛克都是大自然独特的杰作。

A wide-angle photograph of a resort infinity pool. The pool's edge is in the foreground, with a white tiled deck and a metal handrail. The pool water is a deep blue, reflecting the sky and the surrounding palm trees. In the background, the ocean stretches to the horizon under a clear blue sky. Several palm trees are visible, some with fronds that appear to be in bloom or have a reddish tint. A small wooden structure is visible on the left side of the pool.
