MARKET UPDATE JANUARY 2026

Global and Canadian markets showed resilience in January amid persistent inflation concerns, geopolitical uncertainty, and central bank caution. Equity markets moved higher, with Canada's S&P/TSX Composite Index reaching a new record. Trade developments also shaped sentiment, with ongoing discussions between Canada and China aimed at expanding energy and agricultural trade, though potential U.S. tariff threats added uncertainty. Overall, markets ended January on a positive note, but heightened geopolitical risks and inflation pressures suggest the investment landscape remains complex.
