# Vision For A Better Future

The Custodian of the Two Holy Mosques  
**King Salman bin Abdulaziz Al Saud**

My primary goal is to be an exemplary and leading nation in all aspects, and I will work with you in achieving this endeavour.

His Royal Highness  
**Mohammed bin Salman bin Abdulaziz Al Saud**  
Crown Prince, Prime Minister,  
and Chairman of the Council of Economic and Development Affairs

It is my pleasure to present Saudi Arabia's Vision for the future. It is an ambitious yet achievable blueprint, which expresses our long-term goals and expectations and reflects our country's strengths and capabilities. All success stories start with a vision, and successful visions are based on strong pillars.

## Message from the Chairman

Since its inception almost over 50 years ago, Life Shield has been a prestigious leader amongst Defence and Military companies in the Kingdom of Saudi Arabia. This is accredited to its distinctive work force that possesses great experience and immense competence. Additionally, the creation of well-formulated strategies that are executed with precision and expertise. With these inherent qualities, the company is staged for steady growth and prosperity.

The annual report records several achievements and future-plans that are going to support the company in overcoming the various challenges it faces. The company has always adopted a policy of transparency, integrity and strict adherence to the rules of governance and all related laws and regulations.

In conclusion, I would like to extend my thanks to my leadership team, managers, employees of the company and to express my appreciation to the Board of Directors for their guidance that has contributed to our accomplishments as an entity. I would also like to thank all the team for their ongoing support towards achieving further growth in the future.

# Life Shield Team

Hisham Mansour Jamaan Al Jamaan  
Chairman, Life Shield  
Holding Group of Companies

## ABOUT US

LIFE SHIELD is a Saudi company established in 1968. The company has had a long experience in the military and security field, it participated in the first and second Gulf Wars providing military equipment and manufacturing. LIFE SHIELD has obtained strategic global partners in the military and security field. Life Shield has already signed TOT with several partners and will start manufacturing in the Kingdom.

The Company is specialized in military manufacturing besides variety of other domains, including the provision of products and solutions for military and security systems, communication systems, information technology, atomic energy systems, and military training.

## OUR MISSION

To provide high quality products, solutions and services through innovation and ongoing work to improve, develop and sustain our solutions and products to match and keep pace with state-of-the-art technologies and services in order to meet the needs of our Kingdom and the world.

## OUR VISION

To be a leading Saudi company in innovation, manufacturing and development to provide defense and security solutions all over the world.

# Our Services

LIFE SHIELD prides itself by the provision of a wide range of integrated services that offer our clients a successful and ideal experience and make us partners in success as we pay attention to the finest details of the work to cater to all needs in several areas; such as:

- Military systems and solutions.
- Arms and ammunition.
- Security systems and solutions.
- Communications and IT systems and solutions.
- Provision of consulting services and solutions.
- Support, training, and development.
- Manufacturing.

LIFE SHIELD has provided various services, products and solutions for several sectors such as, The Royal Guard Command, Armed Forces, Joint Forces, Ministry of Defense, Ministry of Interior, Ministry of National Guard, Special Security Forces, below are a some of the systems we are currently providing;

- Arms and Ammunitions
- Bombs, Rockets and Warheads
- Personnel equipment
- Detection and Surveillance Systems
- Skydiving Equipment & Accessories
- Communication Systems
- Alternative Energy Systems
- Atomic (Nuclear) Energy Systems
- Training and Simulation Systems
- Manufacturing
  - Aircraft systems manufacturing (F-15, F-15S, Tornado).
  - Manufacture of bomb and rocket bodies.
  - Manufacture of munition bodies.
  - Manufacture of vehicle bodies.
  - Manufacture of machine gun tripods.
  - Manufacture of personnel carriers.
  - Manufacture of portable workshops.
  - Vehicle armoring.

## LS/M5® CARBINE

## LS-CM556-10H-M5A

Introducing the new Colt M5 Carbine series of assault rifles – weapons for the modern warfighter and special forces operator when reliability, lethality, and adaptability are critical.

The completely redesigned lower receiver and upper receiver feature full ambidextrous controls and an enhanced upper receiver rail design ensures extreme rigidity. With maximum performance and ergonomics at the forefront of the design consideration, the Colt M5 Carbine utilizes a proven carbine length gas system with Colt's new purpose-designed true free float rail which attaches to the upper receiver, not to the barrel. This system maximizes rail space and shooter comfort while reducing weight and bulk. Colt's M5 also uses a proprietary conical barrel nut, ensuring increased accuracy and lethality. The Colt M5 Carbine is truly the next generation in a long legacy of Colt high performance assault weapons.

## Technical Data

## LS/M5® SUB-COMPACT WEAPON (SCW) LS-CM556-10H-M5A-SCW

The Colt M5 SCW utilizes a Maxim telescoping buttstock for an extremely compact design, perfect for close quarters battle where both concealment and quick deployment are must-have design elements.

The M5 SCW features the same redesigned lower receiver and upper receiver as the rest of the M5 family with full integrated ambidextrous controls and an enhanced upper receiver rail design which ensures extreme rigidity. Where previous small caliber personal defense weapons were inadequate in caliber or configuration for engaging varying target sets, the Colt SCW in 5.56 x 45 NATO provides the stopping power soldiers need on the battlefield while maintaining a more compact design. Incorporating a unique Colt bolt carrier group and buffer system, the SCW has been engineered to provide the same dependable reliability as the Colt M4 in an enhanced design.

## LS/M5® SUB-MACHINE GUN (SMG)

### CM9-9H-M5A

The Colt M5 SMG provides a solution for close enemy confrontations which demand a lightweight, compact, highly concealable, select fire weapon.

This 9mm SMG is a direct blowback system which fires from a closed bolt and is equipped with a 6 position adjustable buttstock making it well suited for military and law enforcement communities. The straight-line construction, coupled with the low recoil of the 9 x 19mm ammunition, provides highly accurate fire with less muzzle climb, especially in fully automatic fire. Operation and training for the Colt M5 SMG is similar to Colt's other offerings in the M5 family of products, substantially simplifying user training.

#### Technical Data

- 9 X 19MM NATO

LS/CMK

## LS-CMK-11H-M4A

Introducing the Colt CMK rifle chambered in 7.62 x 39mm.

For the operator that requires a weapon that can use legacy Warsaw Pact ammunition but demands the reliability and accuracy of a Colt, the CMK combines the combat proven operating system of the Colt M4 Carbine with the globally available 7.62 x 39mm round. By firing this widespread caliber through the Stoner in-line design, the CMK is able to reduce felt recoil and keep the recoil from affecting the accuracy, thus enhancing the effective range beyond what is normally expected of an AK-47 rifle. Ideal for those customers that either need to upgrade their weapons fleet without spending millions of dollars replacing ammunition stores, or for those customers that anticipate missions requiring the operator to “live off the land” with enemy ammunition, the CMK is the ideal solution.

- 7.62 X 39MM

### Technical Data

Length	Stock Retracted: 27.49" (61.9 cm) Stock Extended: 30.74" (70.15 cm)

LS/SASS

## LS-CM762-18S-SASS

Colt's Semi-Automatic Sniper System (SASS) is offered in 7.62 x 51mm and based on the M7 Battle rifle. This model provides sniper rifle-like precision in a semi-automatic DMR style package. The fully ambidextrous lower receiver operates with the same familiar controls as the M5 Carbine and legacy M4. Originally developed as a multi caliber system to enable marksmen to enter areas undetected as part of a small team using similar ammunition before changing upper receivers to complete their mission, the SASS is able to utilize any 5.56 x 45mm, 7.62 x 39mm, and .300 BLK on the stock lower using Colt's proprietary conversion kit.

Muzzle Velocity	Up to 3150 FPS (960 MPS) with 20" barrel and M855 ammunition
Rate of Fire	Approximately 700 – 900 RPM

## LS/M4 CARBINE LS-R0977

The Colt M4 is the only carbine available to the world today that is manufactured to meet or exceed the stringent performance specifications required for acceptance and use by the U.S. Armed Forces.

Proven in military combat operations all over the world, the Colt M4 Carbine is in a class by itself as a first-rate combat weapon system. Designed specifically for lightweight mobility, speed of target acquisition and effective firepower capability, the battle-proven M4 Carbine delivers the reliability, accuracy, and potent performance needed to take on the most extreme situations. The M4 can be comfortably carried, yet instantly available to provide the level of firepower, dependability and accuracy of a 5.56mm rifle. In production for the U.S. Armed Forces since 1994, the Colt M4 is the weapon of choice for the 21st century warfighter and law enforcement officer.

### Technical Data

- [5.56 X 45MM](#)

Length	Stock Retracted: 30.53" (77.55 cm) Stock Extended: 33.78" (85.80 cm)
Weight (weapon only)	6.5 lbs (2.95 kg)
Barrel	14.5" (36.83 cm)
Rail system	M4 two-piece drop-in
Buttstock	4-position, adjustable for length of pull
Rifling	1 in 7 inches, Right-hand twist, 6 grooves
Sights	Carrying handle with adjustable integral sights
Operation	Air-cooled, gas-operated, firing from a closed bolt
Fire Control	Safe – Semi - Automatic
Alternate Fire Control Options	Safe – Semi – Burst Safe – Semi
Magazine	30-round US Government magazine
Muzzle Velocity	Up to 2887 FPS (880 MPS) with 14.5" barrel and M855 ammunition
Rate of Fire	Approximately 700 – 950 RPM

Rate of Fire	Approximately 700 – 950 RPM

LS/M4 COMMANDO®  
LS-R0933

Rapid response, maneuverability, and enhanced firepower play a major part in joint and coalition operations in modern warfare.

Colt's M4 Commando® was designed to exploit firepower capability in confined spaces where lightweight mobility, speed and violence of action rule. The Commando® can be comfortably carried with its 11.5" barrel, yet be instantly available to provide the type of firepower required to overmatch combatants. Because it provides the full 5.56mm power and accuracy in a very compact sub-machine gun size weapon, the Commando® is often chosen over smaller, less powerful sub-machine guns. Regardless of the application, the Colt M4 Commando® provides superior qualities enabling operators to accomplish an increasingly wide range of combat missions.

Magazine	30-round US Government magazine
Muzzle Velocity	Up to 2610 FPS (796 MPS) with 11.5" barrel and M855 ammunition
Rate of Fire	Approximately 700 – 950 RPM

## LS/INFANTRY AUTOMATIC RIFLE (IAR)

### LS-IAR6940

Intended to replace belt-fed light machine guns as a squad support weapon, the Colt IAR is designed to be able to deliver high volumes of fire in a lightweight package.

With a unique heat sink design that significantly exceeds cook-off standards, the IAR is able to maintain lower temperatures longer during extended periods of fire. A full length top rail for mounting optics, as well as a magazine-fed design for commonality of feeding devices to share ammunition, gives the user increased capability over conventional light machine gun designs, while removing the complication of belt fed feeding systems and long reloading times.

#### Technical Data

- 5.56 X 45MM

Length	Stock Retracted: 33.4" (84.83 cm) Stock Extended: 36.72" (93.26 cm)
Weight (weapon only)	9.47 lbs (4.3 kg)
Barrel	16.1" (408.94 cm)
Rail system	Monolithic Rail 3, 6, 9 with integrated Heat Sink
Buttstock	4-position, adjustable for length of pull
Rifling	1 in 7 inches, Right-hand twist, 6 grooves
Sights	Folding front, removable BUIS rear
Operation	Air-cooled, gas-operated, firing from a closed bolt
Fire Control	Safe – Semi - Automatic
Magazine	30 round detachable magazine standard, other sizes optional
Muzzle Velocity	Up to 3132 FPS (954.63 MPS) ammo dependent
Rate of Fire	700 – 1000 RPM

## 9MM SUB-MACHINE GUN (SMG)

### LS-R991-9A

Close quarter confrontations demand a lightweight, compact, highly concealable, select fire weapon like the Colt 9mm SMG.

The SMG is a direct blowback system, which fires from a closed bolt and is equipped with a collapsible buttstock, making it well-suited for the military and law enforcement communities. This straight-line construction, coupled with the low recoil of 9 x 19mm ammunition, provides highly accurate fire with less muzzle climb, especially in fully automatic fire. Less recoil also facilitates ease of training and improves accuracy. Operation and training for the Colt 9mm SMG is similar to the Colt M16 and M4 family of weapons, substantially simplifying user training.

- 9 X 19MM NATO

#### Technical Data

Length	Stock Retracted: 24.63" (62.56 cm) Stock Extended: 27.88" (70.82 cm)
Weight (weapon only)	6.17 lbs (2.80 kg)
Barrel	9" (22.86 cm), free float barrel
Rail system	1-piece M-LOK Free Floating Rail System 7.75" (19.3 cm) long
Buttstock	4-position, adjustable for length of pull
Rifling	1 in 10 inches, Right-hand twist, 6 grooves
Sights	Carrying handle with adjustable Integral sights
Operation	Air-cooled, direct blowback, firing from a closed bolt
Fire Control	Safe – Semi - Automatic
Alternate Fire Control Options	Safe – Semi – Burst Safe – Semi
Magazine	32-round stick magazine
Muzzle Velocity	Up to 1210 FPS (368 MPS) with 9" barrel

## M203 GRENADE LAUNCHER

### LS-R0801 | LS-R0810 | LS-R0811

Colt's military experience is on full display with the M203 Grenade Launcher.

This single shot, breech loaded 40mm weapon is specifically designed to attach to the M4 Carbine, M16A2 and M16A4 Service Rifles. By creating a versatile combination weapon system, the M203 gives you the capability of firing both 5.56 x 45MM NATO rifle ammunition as well as the complete range of 40mm high-explosive and special purpose munitions. Though attached to the M4/M16 Family of weapon systems, the M203 Grenade Launcher can be operated as a completely independent weapon using its complete self-cocking fire mechanism, barrel latch, trigger and positive safety lever included in the receiver. An essential tool for every modern army, the M203 provides Colt M4 Carbines and Colt M16 Rifles with breaching, defilade and area engagement capabilities.
