Workplace Clean Up Procedures

Sanitizing & Filtration Equipment

On-Site Infection Control

KOCH Employees and Contractors have been re-trained on enhanced infection control practices to ensure that our Clients are protected from contaminated surfaces and contact points. Employees and Contractors have been re-trained on the appropriate use of chemicals and supplies that maintain a clean & healthy work environment.

Limiting Contact

Limiting unnecessary contact such as 'hand shakes', 'high-fives', 'hugging' etc. does not mean that KOCH cares any less for the Clients we serve. We will advocate for all 'contact-free' options to ensure our Clients remain safe and healthy. Proper hand-washing practices will continue to be strictly enforced and large group discussions will be conducted with care.

Personal Protective Equipment (PPE)

KOCH Management Group will ensure that our Employees and Contractors are equally provided with PPE as required in the workplace. Regular wearing of masks, gloves, gowns, caps, glasses and other protective gear will be encouraged to protect our Employees and our Clients.

Workplace Clean Up Procedures

KOCH will strictly enforce that your work site be left clean and tidy on a daily basis. Employees and Contractors will be responsible for how they discard materials, food waste, beverage containers, PPE and other refuse. Being mindful of this practice will reduce the chances of contaminating work sites and further ensure a safe and healthy work environment.

Sanitary & Filtration Equipment

KOCH Employees and Contractors are re-trained on the use of equipment that helps to sanitize work areas and filter air. We will implement these practices where they are best applied and follow the appropriate guidelines. The use of sanitation foggers and HEPA filters in sensitive work environments will be paramount to ensure a safe and healthy work site.

WRPP - The Future of Conducting Business

We at KOCH Management Group feel that the WRPP and a new standard of work site practices will benefit everyone in terms of overall health and safety. This new reality brings awkward transitional circumstances and learning curves but in no way changes the quality of our work, the customer service we deliver and the satisfaction we guarantee.

KOCH Management Group

KOCH Management Group are the Contractors That Care. Now is the time to partner with us as we champion the standard of health and safety in the workplace. Construction, Maintenance, Efficiency Solutions and Facility Services is what we do. Quality Workmanship, Competitive Pricing, Health and Safety and Customer Service is who we are.
