

B2B - API Integration Only

If you do not wish to render our web pages, you can still integrate our state-of-the-art algorithm in your application and connect it to your own UI. We have built a robust API wall for all our partners.

1. **[Free API 1]** Create User API
2. **[Free API 3]** Enable/Disable Emotional Matching API
3. **[Free API 2]** Emotional Compatibility Questionnaire API
4. **[Free API 5]** Enable/Disable Sexual Matching API
5. **[Free API 4]** Sexual Compatibility Questionnaire API
6. **[Paid API 1] Sangati Compatibility API** (Response includes Compatibility Score and two User's Dark Graph Data and Light Graph Data)
7. **[Paid API 2] (Optional) User Data API** (Response includes User's Personal Dark Graph Data and Personal Light Graph Data)

OR

If you wish to keep design development to the absolute minimum, you can integrate the User's Sangati account into your website by using their Sangati Registered Phone number. The users will only be shown their final compatibility chances and nothing else. This is not recommended as the entire essence of the application is lost.

1. **[Free API 1]** Connect Phone API
2. **[Paid API 1] Sangati Score Only API**
