

## Spex•Lite® 6926 EPS

### Material Properties

- **Particle Composition**  
Recycled Expanded  
Polystyrene
- **Bulk Density (loose)**  
~0.7 – 2.6 pcf  
Avg: ~1.4 pcf
- **Specific Gravity**  
~0.07
- **Size**  
Dust to 5 mm  
Avg: ~2.6 mm
- **Made in America**

Spex•Lite® 6926 EPS is a recycled proprietary lightweight modified expanded polystyrene blend. It mixes with Portland cement / pozzolanic binders and other systems to provide air voids and reduce system densities. It is a mix of rounded and angular particles and incorporates well into formulated systems.
