# EXPLORE MORE

**March 9, 16, and 23**

**Sessions are from 9-11:30 at Covington Latin School  
Cost for the Spring Session is \$135 and includes ALL materials**

## Who We Are.....

ExploreMore! has been serving the tri-state area for over 20 years. Our program was created to meet the needs of students who love to learn and wish to go beyond what is taught in the classroom. ExploreMore! courses are for students from grades K-12. We offer courses that are of high interest to our students in the areas of science, mathematics, writing, visual arts, performing arts, and technology that offer a learning culture where like-minded students come together to share their passion.

## What Makes ExploreMore! Different.....

We are student focused and bring classes that are based on input from our families to best meet their needs. Our environment values creativity, diversity, and experimentation and fosters this through hands-on, outside of the box teaching methods. Our teachers are passionate about their subject matter and work tirelessly to promote critical thinking and independent investigation. What truly sets us apart is our focus on the whole child. Our families are invited to lectures by world-renowned experts in gifted education. We want to be your resource for supporting, enriching, and engaging your bright child.

**“We are treasure chests with more jewels inside than we can imagine.”  
—Ifeanyi Enoch Onuoha**

# ExploreMore! Classes at a Glance

## Grades K-3

### **Music Around the World**

Take a musical journey around the world in just five days! Explore the music culture of different countries and how they compare to your own. Feel the Irish beat as you learn to folkdance, play African drums, and listen to traditional Japanese instruments. You will learn about the history of music in different countries and how it has shaped their culture. Students will learn the basics about music and its relationship to cultural identity.

### **Culinary Concoctions**

Put your creativity and scientific expertise to the test through our new cooking class. Chemical concoctions collide to create culinary masterpieces. With the help of our master chef, new understandings of the science of cooking will enlighten cooks of any skill level. Yum!

### **Dino-Mite**

Stegosaurus, Brontosaurus, and T-Rex, oh my! Put on your paleontologist hat and travel through time to see what it was like when the dinosaurs roamed the earth! We will explore the world as it was in the Prehistoric era and look for clues as to why these great reptiles became extinct. We will also be digging for fossils and comparing dinos to their modern descendants.

### **Intro to Robotics**

Who doesn't love robots? This class will introduce students to the exciting world of coding using Ozobots and Optibots. Students will be solving fun problems and challenges using robots. ***Students must bring their own device (tablet, Kindle, Ipad, etc. ) with Ozoblocky installed.***

### **I Like to Move It, Move It**

Students in this class will take a three day comprehensive look at the four major styles of American dance: tap, ballet, hip hop and jazz. Students will learn the basics of each type and learn to count with music. This class will be a great opportunity to dip your feet into the water without the commitment to a dance company.

## Grades 4-6

### **Pinch Pots with Picasso**

Get those hands dirty and learn to create like an artist! Each artist will have the opportunity to enhance their creativity and think outside the mold as they create their own pottery using a variety of techniques. This class is sure to inspire creativity in and out of the studio.

### **Words, Words, Words**

Take a journey back in time and discover the secrets to the Bard's success. This class gives students the tools to write stylistically while using comedy and drama to make their stories interesting. Different genres will be examined and devoured through the eyes of William Shakespeare.

### **Chocolate Economics**

Do you love chocolate? Have you ever wondered how chocolate is made? Would you like to learn more about why money and trade are important? Take this class to learn the answers to these questions as we trade chocolate; work in an assembly line; create a human web; and study entrepreneurs. Oh yeah, and chocolate.

### **Backyard Adventurers**

Do you love looking at the small and not so small creatures that live in your backyard? Ever wonder what they eat and where they sleep? This class will take you on an adventure to discover all the critters that live in your own backyard. There will be several special visitors to this class. You never know what you might discover in this class.

### **Sign Time**

Students will be given an introduction into the world of American Sign Language. Basic sentence structure and language will be understood. This class will also give students the background into the culture of the deaf community as students develop their own signing style.

### **CSI: Exploremore!**

Imagine you're a forensic detective that arrives on the scene of a murder. You need to act fast in order to catch the killer. Did they leave any fingerprints? DNA samples? What about blood spatter? Solve riddles and hunt for clues using forensic science to solve the crime before the murderer strikes again!

### **Culinary Concoctions**

Put your creativity and scientific expertise to the test through our new cooking class. Chemical concoctions collide to create culinary masterpieces. With the help of our master chef, new understandings of the science of cooking will enlighten cooks of any skill level. Yum!
