Who We Are.....

ExploreMore! has been serving gifted students in the tri-state area for over 20 years. Our program was created to meet the needs of students who love to learn and wish to go beyond what is taught in the classroom. ExploreMore! courses are for students from K-12th grade. We offer courses that are of high interest to our students in the areas of science, mathematics, writing, visual arts, performing arts, and technology that offer a learning culture where like-minded students come together to share their passion.

What Makes ExploreMore! Different.....

We are student focused and bring classes that are based on input from our families to best meet their needs. Our environment values creativity, diversity, and experimentation and fosters this through hands-on, outside of the box teaching methods. Our teachers are passionate about their subject matter and work tirelessly to promote critical thinking and independent investigation. What truly sets us apart is our focus on the whole child. Our families are invited to lectures by world-renowned experts in gifted education. We want to be your resource for supporting, enriching, and engaging your bright child.

Registrations can be made online at www.exploremoregifted.org

Registration Deadline is October 28, 2019. You can register on our website or by clicking this link: <https://exploremoregifted.wufoo.com/forms/exploremore-gifted-fall-2019-registration/> .

EXPLORE MORE GIFTED

Grades K-3

Jedi Mind Tricks- A long time ago, in a galaxy far away, our teachers began watching Star Wars. Now a new generation of Jedi emerge as new movies and stories are released. Learn about the physics of space and the power of storytelling through everyone's favorite hero's journey.

Architecture- Use Legos and paper to create new structures based on the Greek and Gothic styles of architecture. Compete against classmates to build the tallest structure in under two minutes. With all this building, you'll wonder how you ever lived without knowing how to create such feats.

Emoji Storytelling- Learn the parts of a story and create your own book with the emoticons we all know and love. Throughout the three week course, you will go through the process of creating a story while making your own world. At the end of your introduction to creative writing, you will have the ability to identify emotions and tell a pretty good story.

Creatures Featured- Animals are often man's best friend, but do you ever wonder how to properly care for them? Become a vet for a week and take your love of animals to the next level. Warning: a few guest appearances may occur.

Chemical Candies- What happens when you combine sugar, water, and heat? A pretty awesome chemistry experience! Our immersive experience features foods that you never

knew you could make with just a few simple ingredients. There is no better way to learn the scientific method than to eat it. Besides, who doesn't love candy?

Grades 4-6

Oh, How The Mind Wanders - We have been asked by many of our students just how come they know the answer and why they remember some things but not others. This class is the perfect opportunity for students to test their memories and their brains. Exercise isn't just for the heart. In this class, it's for the brain!

Mischief Managed- Enter a world of spells, goblins, and witchcraft as you solve mysteries with Harry Potter and his friends. Some of these riddles require decoding or potion making while others are based on knowledge of the magical world. Defeat Death Eaters and He Who Must Not Be Named while learning all about problem solving.

Pinterest Interests- Take a test of your comfort zone while creating some awesome crafts. Learn measurements and planning while learning about colors and materials. Students will also learn how to sell products and create a business. So much crafting, so little time.

Girl Power- Empower yourself with the ability to take on the world and break the glass ceiling! Our teacher will guide girls into discovering their passion for entrepreneurship. Throughout this class, girls will learn the importance of sticking together and develop skills to maintain confidence throughout their lives.

Inventor's Guide to the Galaxy- Travel through time and space to create a world in the unknown. First, you will create a society in a far off planet. Then you will learn about how the Earth's atmosphere accommodates life and how to replicate it. On the last day, you will create the most interesting invention you can think of! Spend time making your imagination into a reality in this brand new class of adventures!

Grades 7-9

This fall, our older students will have the opportunity to learn about how a business works. From the day they register, students will take this course on the road with them and begin to work on their best version of camp. What do they think will make ExploreMore! even better? How can we accomplish our goals on a timeline? They will spend time in the classroom as well as working alongside our directors and teachers as they learn all about the business from a new perspective!
