## **Who We Are.....**

ExploreMore! has been serving gifted students in the tri-state area for over 20 years. Our program was created to meet the needs of students who love to learn and wish to go beyond what is taught in the classroom. ExploreMore! courses are for students from K-12th grade. We offer courses that are of high interest to our students in the areas of science, mathematics, writing, visual arts, performing arts, and technology that offer a learning culture where like-minded students come together to share their passion.

## **What Makes ExploreMore! Different.....**

We are student focused and bring classes that are based on input from our families to best meet their needs. Our environment values creativity, diversity, and experimentation and fosters this through hands-on, outside of the box teaching methods. Our teachers are passionate about their subject matter and work tirelessly to promote critical thinking and independent investigation. What truly sets us apart is our focus on the whole child. Our families are invited to lectures by world-renowned experts in gifted education. We want to be your resource for supporting, enriching, and engaging your bright child.

**Registrations can be made online at [www.exploremoregifted.org](http://www.exploremoregifted.org)**

Registration Deadline is January 12, 2020

# EXPLORE MORE GIFTED

## January 17 - Chem Night Out

Boom! Students will take an explorative lens to the chemical process on our Chem Night Out. Each student will take two classes: Slimy Science and Culinary Concoctions. Students will spend their night uncovering just what makes the scientific method so effective. During Slimy Science, students will watch their chemical reactions take place with our hands-on approach to teaching. Culinary Concoctions includes chemical reactions that are fun to watch and to eat! We are proud to offer a wide variety of experiments during our Chem Night Out that everyone is sure to enjoy.

## January 24 - Arts Night Out

Dazzle and shine through our Arts Night Out program. Students will discover their many gifts and talents as they work with paints during our Van Gogh painting experience. Their canvases will come to life as they swirl colors and learn new techniques with our experienced teachers! Once our students move on to their next class, they will create comedy sketches that will make even the most hilarious comedians jealous! Students will tackle the written word and have their classmates rolling with laughter! Our experienced teachers will find something that everyone is sure to enjoy!

## January 31 - STEM Night Out

We have something for everyone during our STEM Night Out this year. Back by popular demand is our Lego Mania class! Students work together to create dynamic structures while attempting to beat the clock and their classmates. This focus on Engineering will challenge students to think outside of the box. Afterwards, students will spend time working with robots and discovering their inner-workings. A short circuit has nothing on our bright students!

Students will be broken into age groups K-3 and 4-6. They will take both classes each night.
