DEADLINE: MARCH 8

THE **EXPLORE**MORE! DIFFERENCE

Our courses are in the areas of science, mathematics, writing, visual arts, performing arts, and technology that offer a learning culture where like-minded students come together to share their passions.

SPRING SESSION Grades K-6

Our Sun: Friend and Foe-

The Sun provides the energy that makes life on the Earth possible but can also pose great risks for humans and their technology. We'll explore how the Sun produces its energy, how we observe the Sun scientifically, and how solar activity can affect the Earth. As part of our activity, we'll view "live" data on the Sun from satellites and make our own observations of the Sun using equipment at The BB&T Observatory (weather permitting).

Lights, Camera, Action-

There is no such thing as being overdramatic in this class! Students will learn different acting exercises to help them grow as actors. Our young stars will practice their improvisation skills and how to have a strong stage presence. They the end of our rehearsal, students will have new skills in improv and stage acting!

All classes will be held at Thomas More University!
