March 7, 14, 21 from 9:00-11:30am

Cost for the entire Spring Session is \$125 and includes **ALL** materials  
Individual registrations are also available for \$60 per class

## Who We Are.....

ExploreMore! has been serving gifted students in the tri-state area for over 20 years. Our program was created to meet the needs of students who love to learn and wish to go beyond what is taught in the classroom. ExploreMore! courses are for students from K-12th grade. We offer courses that are of high interest to our students in the areas of science, mathematics, writing, visual arts, performing arts, and technology that offer a learning culture where like-minded students come together to share their passion.

## What Makes ExploreMore! Different.....

We are student focused and bring classes that are based on input from our families to best meet their needs. Our environment values creativity, diversity, and experimentation and fosters this through hands-on, outside of the box teaching methods. Our teachers are passionate about their subject matter and work tirelessly to promote critical thinking and independent investigation. What truly sets us apart is our focus on the whole child. Our families are invited to lectures by world-renowned experts in gifted education. We want to be your resource for supporting, enriching, and engaging your bright child.

## Registrations can be made online at [www.exploremoregifted.org](http://www.exploremoregifted.org)

Registration Deadline is March 2, 2020. Registration is not complete until payment has been confirmed.

# EXPLORE MORE GIFTED

## March 7- All the World's a Stage

Grades 2-6

Lights up on Thomas More's unique stage as students prepare stunning monologues and hilarious scenes. Our kids love to make each other laugh, so in that spirit, we have brought back one of our most popular classes. Here's the twist! We have been invited to Thomas More University's stage to learn all about the process of creating a real play and performing some impromptu scenarios. Included in this lesson will be Musical Theatre, Improv, and Comedic Expression. Parents can stick around after the show for a sneak peak at all that our students have worked on!

## March 14- Our Sun: Friend or Foe?

Grades 4-7

The Sun provides the energy that makes life on the Earth possible, but can also pose great risks for humans and their technology. We'll explore how the Sun produces its energy, how we observe the Sun scientifically, and how solar activity can affect the Earth. As part of our activity, we'll view "live" data on the Sun from satellites and make our own observations of the Sun using equipment at The BB&T Observatory (weather permitting).

## March 21- The Great Ohio Biodiversity Class

Grades 4-7

The Thomas More University's award-winning Biology Field Station will host a biodiversity class to study water quality and ecosystem of the Ohio River and surrounding watershed. This class will provide our environmentally conscious students an opportunity to learn more about our great resource and empower them to make a positive impact on the River and the surrounding environment.
