

The Ferrell-Duncan Clinic Foundation, which was established by the Ferrell-Duncan Clinic in 1987, is grateful for this opportunity to play a meaningful role in this historic milestone of the University of Missouri Medical School and to fulfill our mission, “To Further Health Education and Provide for the Healthcare needs of the Community.”

This new fund will sponsor one of the two floors of the new University of Missouri Springfield Campus four year medical school. This floor will house the Person Centered Learning program. This model for the curriculum for first and second year medical students was pioneered and formalized by the University of Missouri Medical School. The University of Missouri Medical School has been a leader in this type of curriculum which has been adopted by the majority of medical schools in the nation.
