

The Florida Aquarium - Moon Bay Exhibit

Tampa, FL

- Focal point exhibit in the Aquariums main lobby
- 500 s/f moon jelly fish touch experience
- Completion: May 2019

Project Summary

Rick Waterhouse and Pete Colangelo engaged AOC to collaborate in the design, value engineering and construction of the new moon jellyfish exhibit.

This project consisted of cordoning off the existing lobby exhibit, demolition of the existing exhibit and filtration system, fabrication & installation of structural steel and metal framing for the new exhibit signature wave wall, exhibitor platform, framing and structural support for touch tanks and sphere tank, fabrication of racking system for filtration equipment, plumbing, electrical, and all finishes.
