

The Florida Aquarium - Chiller & Cooling Tower Tampa, FL

- 300Ton Chiller, Cooling Tower & Foundation
- Piping and insulation
- Completion: April 2016

Project Summary

John Muller engaged AOC to provide the structural design, engineering, construction, and installation of a new 300ton chiller and cooling tower for the Rising Tides expansion. This project consisted of the demolition of the existing chiller and cooling towers, construction of new CIP columns, fabrication & installation of structural steel, installation of the cooling tower and chiller, electrical, piping and insulation.
