IMPORTANT INFORMATION ABOUT THIS URGENT FENCING NOTICE

- 1. The owner who gives an urgent fencing notice requires the owner who receives it to contribute to the fencing works and any subsidiary works* for a sufficient dividing fence that were carried out urgently in accordance with the **Fences Act 1968**.
- 2. If, within 30 days from the day this urgent fencing notice is given, the owner who receives it responds to the notice but does not agree to one or more of the matters specified in the notice, either owner may commence proceedings in the Magistrates' Court for orders about: the line that is the common boundary; whether or not a dividing fence is required and whether or not fencing works and any subsidiary works should be carried out; the nature of any fencing works and subsidiary works* to be carried out; the nature of the fence that constitutes a sufficient dividing fence; the way in which contributions for the fencing works and any subsidiary works should be apportioned; and other matters.
- 3. If, within 30 days from the day this urgent fencing notice is given, the owner who received it has not responded to the notice, the owner who gave the urgent fencing notice may commence proceedings in the Magistrates' Court for orders about the urgent fencing works and subsidiary works or contributions.
- 4. Section 32 of the Fences Act 1968 provides for the placement of rails and framing for a dividing fence that has rails and framing. Owners may agree about the side of the dividing fence on which the rails and framing are to be placed. However, if an agreement between owners or an order of the Magistrates' Court does not specify the side on which rails and framing are to be placed, the Fences Act 1968 provides for the side on which rails and framing must be placed. For a dividing fence between residential or commercial land and land over which the public has general access or over which there is a right of way, the rails and framing must be placed on the side of the dividing fence facing into the residential or commercial land. For a dividing fence between residential and commercial land, the rails and framing must be placed on the side of the dividing into the residential land. In all other cases, the rails and framing must be placed on the same side as the previous dividing fence (if a dividing fence is being replaced by a similar dividing fence) or on the side least subject to weathering (if a dividing fence is being replaced by a different type of dividing fence or if there was no previous dividing fence).

^{*} subsidiary works are other necessary works to allow the fencing works to take place, including design of a dividing fence, preparation or clearing of land, surveying and marking of common boundary or other proposed line of fence, obtaining approval and using temporary barriers
