

Maximize Your Social Security Income

As a Registered Social Security Analyst (RSSA), here's how I will help:

- I have been trained to advise you on all applicable Social Security rules that apply to your unique claiming decision.
- I will create a personalized Social Security plan tailored to your unique circumstances and specific retirement goals.

I will answer your questions:

- Whether you are single, married, divorced, widowed, disabled, self-employed, have a child with a disability, have a pension, or are an immigrant; I will provide comprehensive support.
- Should I wait until age 70? Can I collect benefits based on my spouse? Will my pension lower my benefits? I will provide a unique Social Security roadmap to optimize your benefits.

Your RSSA Social Security plan will include:

- For a modest fee, receive comprehensive analysis and advice that may provide you with thousands to hundreds of thousands more throughout your retirement.
- An in-depth look at your options, and the impact of other factors such as pensions, survivor benefits, and future earnings, to ensure you get the most money, and avoid reduced benefits.
- A personalized summary and comparison of your claiming options, specifying the monthly, annual, and lifetime benefits of your claiming options.
- I will provide the timing for when and how to file for your benefit options.
