

MR. OWL'S AMAZING OWL FACTS!

♥ Wise by Nature! Awesome by Night! ♥

MR. OWL SAYS:

The wisest
children never
stop learning!

- 1** Owls can
turn their
heads about
270°!

(That's almost
all the way
around!)

- 2** Most owls
are awake
at night.
They are
called
NOCTURNAL
animals.

- 3** Owls have
excellent
hearing.
They can hear
tiny animals
moving under
leaves or snow!

- 4** Owls can
fly very
quietly.

Their special
feathers help
them sneak up
without making
much noise.

- 5** Owls don't
actually have
giant eyeballs
that move.
Instead, they
turn their heads
to look in
different
directions.

- 6** Baby owls
are called
OWLETS.

Just like baby
cats are
kittens!

- 7** Many owls
help farmers.
They eat mice
and other small
animals that can
damage crops.

- 8** There are
more than
250
kinds
of owls
around the
world!

MR. OWL ASKS:

If you could ask
Mr. Owl one question,
what would it be?

KEEP LEARNING EVERY DAY!
