

STELLA'S NUTTY BLACK SQUIRREL FACTS!

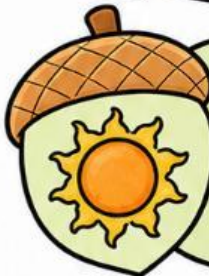

DID YOU KNOW?

1. Black squirrels are not a separate species. Many are eastern gray squirrels with extra-dark fur!

2. Their dark fur contains more of a pigment called melanin.

3. Black fur absorbs sunlight and may help squirrels stay warmer in cold weather.

4. They eat nuts, seeds, fruit, fungi, and sometimes insects.

5. They bury food in little caches to save for later.

6. Their fluffy tails help them balance and can wrap around them like a warm blanket!
