What sets Frontier Acquisitions apart from our competition? The short answer is training, certifications and experience.

Our team is composed of industrycertified professionals with handson, real-world experience. We meet
DoD Directive 8140 information
assurance levels including IAT,
IAM, IASAE and CSSP. Our
certifications include those from
ISC2, SANS, ECPI, EC-Council,
Microsoft, CISCO and CompTIA to
name a few. We provide continuing
education for all of our employees. This

provides assurance to our customers that the most capable and knowledgeable professionals are on staff supporting their project.

Cyber Engineering

Frontier Acquisitions uses a systematic approach that emphasizes a balance between cost, schedule and risk. Our goal is to fully understand the customer mission, the risks associated with that mission, applicable laws/regulations/ standards and finally customer risk tolerance. We can then develop the security requirements and a risk strategy for integration into the systems/software engineering process. Our team of cyber engineers understands system/software engineering and the integration of cyber into the engineering process thereby baking-in security as opposed to bolting it on later. This proven process saves both time and money and is much easier execute in fast-paced the development environment we see in today's world.

The Frontier Acquisitions cyber engineering process is part of our DevSecOps strategy and has been tested numerous times in development efforts including the Air Force Big Data Platform and Defense Health Agency Solution Delivery Division. Our ability to leverage tools and experience to merge cybersecurity and engineering sets us apart from our competition.

Risk Management Framework (RMF):

Frontier Acquisitions has real-world experience with the NIST Special Publication 800 series as well as the DoDI 8500 series instructions. We have participated in writing, implementing and assessing compliance with these frameworks. No RMF task is too big for Frontier Acquisitions:

- Information System Security Officer (ISSO) support
- Blue Team support (we can identify and fix your vulnerabilities!)
- RMF security control assessment support (Security Control Assessor –Validator (SCA-V))
- DoD STIG and SRG implementation and assessment support
- Tailored RMF workflows for hybrid applications such as widgets and plug-ins
- Customized SCA-V-approved RMF artifacts (we can write your RMF package for you!)
- Compliance tool support (eMass, SCAP, ACAS, Radix, Application Scripts, etc.)

practices is skilled in the process of the process

Cloud Architecture:

Frontier Acquisitions understands cloud architectures and the security requirements associated with cloud deployments. The Frontier Acquisitions team has certified cloud engineers that have supported secure customer cloud migration efforts. Frontier Acquisitions has worked with AWS, Azure, and milCloud deployment efforts. Our knowledge and experience with FedRAMP means we understand cloud security and the restrictions and limitations that Government entities must consider when migrating to the cloud.

Cyber Intelligence: Cyber threat intelligence operations is exiting work. It is the kind of work our cyber team enjoys. Frontier Acquisitions has experience supporting government customers providing operational support including:

- Directing and performing operator actions for detected threats
- Performing operations including analyzing, reporting, countering and mitigating the threats
- Performing data analytics including event correlation
- Developing and refining tactics, techniques & procedures
- Code development and refinement including statistical & machine learning algorithms

Cybersecurity Consulting & Portfolio Management: The Frontier Acquisitions cyber team is composed of professionals with a variety of skills and experience. Our team includes experienced cyber engineers, consultants and IT experts with over 30 years of experience. Our cyber staff has extensive project management experience supporting government and commercial systems including both large and small cyber engineering projects. Frontier Acquisitions has the ability to draw on skillsets as required as well as provide consulting advice or step in as the project manager of any size project.
